Authoring Your Life
Developing an Internal Voice to Navigate Life’s Challenges

Marcia B. Baxter Magolda
Foreword by Sharon Daloz Parks
Illustrated by Matthew Henry Hall

“Authoring Your Life: Developing an Internal Voice to Navigate Life’s Challenges provides a fine guide to addressing life’s challenges and demands…Accompanying these stories are exercises and questions designed to further break down barriers to communication. Any lending library needs this!”—Midwest Book Review

➤ Offers questions to help you uncover your strengths
➤ Provides exercises to identify barriers that may be preventing the development of your internal compass

This is a guide to addressing life’s challenges and competing demands. It will help you to reflect on the problems and setbacks you encounter to discover your own voice, uncover your authentic sense of values, build your confidence, and find meaning in your life. This is, however, far more than a self-help book; and it addresses multiple audiences.

Because everyone’s circumstances differ, and life unpredictable, this book does not offer simplistic solutions and steps to follow. Instead, Marcia Baxter Magolda immerses you in the stories of thirty-five adults whom she followed and interviewed for over twenty years. With her guidance, and using the self-authorship framework she developed, you will recognize in yourself many patterns and parallels from the protagonists’ stories of emotional and intellectual growth. By reflecting on these life stories, you will gain insights about your individual values and identity, and strengthen your sense of self-reliance to handle significant transitions and unexpected circumstances.

In addition to helping you identify the phases of your journey to self-authorship, Marcia Baxter Magolda offers reflective exercises and questions to help you uncover your strengths and identify the barriers that may be inhibiting you from building the internal, psychological compass that will serve as the foundation for your journey.

Offering advice on how to be “good company” for those who have set out on their journey to self-authorship, the book is also addressed to partners, family members, friends, teachers, mentors, and employers, so they can offer support to those that face these challenges.

The Author: Marcia B. Baxter Magolda (retired) was Distinguished Professor of Educational Leadership at the Miami University of Ohio and is a nationally recognized author and speaker on student development and learning. Her scholarship addresses the evolution of learning and development in college and subsequent adult life, and educational practice to promote self-authorship.

SELF HELP/ HIGHER EDUCATION
Bandwidth Recovery
Helping Students Reclaim Cognitive Resources Lost to Poverty, Racism, and Social Marginalization

Cia Verschelden
Foreword by Lynn Pasquerella

Bandwidth: the cognitive and emotional resources needed to deal with making good decisions, have healthy relationships

Presents strategies to promote growth of bandwidth and a healthy mindset

This book argues that the cognitive resources for learning of over half our young people have been diminished by the negative effects of economic insecurity, discrimination and hostility against non-majority groups based on race, ethnicity, sexual orientation, or gender identity, and other aspects of difference. Recognizing that these students are no different than their peers in terms of cognitive capacity, this book offers a set of strategies and interventions to rebuild the available cognitive resources necessary to succeed in college and reach their full potential.

Members of these groups systematically experience conditions in their lives that result in chronic stress and, therefore, decreased physical and mental health and social and economic opportunity. The costs of the many kinds of scarcity in their lives – money, health, respect, safety, affirmation, choices, belonging – is seriously reduced “mental bandwidth,” the cognitive and emotional resources needed to deal with making good decisions, learning, healthy relationships, and more. People who are operating with depleted mental bandwidth are less able to succeed in school starting in childhood and are much less likely to make it to college. For those who do make it, their bandwidth capacity often interferes with learning, and therefore, persisting and graduating from college.

Beginning with an analysis of the impacts on mental and physical health and cognitive capacity, of poverty, racism, and other forms of social marginalization, Cia Verschelden presents strategies for promoting a growth mindset and self-efficacy, for developing supports that build upon students’ values and prior knowledge and for creating learning environments both in and out of the classroom so students can feel a sense of belonging and community. She addresses issues of stereotyping and exclusion and discusses institutional structures and processes that create identity-safe rather than identity-threat learning environment.

Published in association with The Association of American Colleges and Universities (AAC&U).
The New Science of Learning
How to Learn in Harmony with Your Brain
SECOND EDITION
Terry Doyle and Todd Zakrajsek

Learning to learn is the key skill for tomorrow. This breakthrough book builds the foundation every student needs, whether a freshman or an adult learning a new language.

Better learning does not require more effort. It needs an understanding of how the brain learns.

The second edition of this bestselling student text has been considerably updated with the latest findings from cognitive science that further illuminate learning to help you understand what’s involved in retaining new information.

Beyond updating every chapter with insights from new research, this edition introduces a range of additional topics such as cognitive load, learned helplessness, and grit—all of which provide immediately usable information on how to regulate your life to maximize learning and fulfillment in college.

The premise of this book remains that brain science shows that most students’ learning strategies are highly inefficient, ineffective or just plain wrong. While all learning requires effort, better learning does not require more effort, but rather effectively aligning how the brain naturally learns with the demands of intellectual work. This book explicates what is involved in learning new material, how the human brain processes new information, and what it takes for that information to stick, even after the test.

This succinct book explains straightforward strategies for changing how to prepare to learn, engage with new course material, and set about improving recall of the newly learned material at will. This is not another book about study skills and time management strategies, but instead an easy-to-read description of the research about how the human brain learns in a way you can put into practice right away.

The Authors: Terry Doyle is the Chief Instructor for Faculty Development and Coordinator of the New Faculty Transition Program for the Faculty Center for Teaching and Learning at Ferris State University. Todd Zakrajsek is an Associate Professor in the Department of Family Medicine at UNC-Chapel Hill, and Executive Director of the Academy of Educators in the School of Medicine.

SELF HELP/EDUCATION
Open Mic Night
Campus Programs that Champion College Student Voice and Engagement

Edited by Toby S. Jenkins, Crystal L. Endsley, Marla L. Jaksch and Anthony R. Keith
With Robb Ryan Q. Thibault

While campuses across the United States have been offering spoken word programs for over 20 years, little attention has been paid to their purpose and impact beyond their contribution to the campus social aesthetic.

There is an increasing understanding that performance poetry and spoken word is much more than entertainment. Within disciplines such as English, Ethnic, Women’s, and Cultural Studies, scholarship has identified spoken word’s role in developing political agency among young adults; its utility for promoting authentic youth voice; and its importance as a tool of cultural engagement.

This book – compiled by scholar artists, including internationally recognized spoken word performers – offers guidance on using spoken word as a tool for college student engagement, activism, and civic awareness. It makes the case that campus event spaces need to transcend their association with the theatre or art departments to provide a venue where students are allowed to be different and find opportunities for personal and intellectual development and civic engagement. Open mic nights offer college students a way to speak out, advocate, lead, educate, and explore with their peers.

The Authors: Toby S. Jenkins is an Assistant Professor of Curriculum Studies at the University of South Carolina. Her first book, My Culture, My Color, My Self: Heritage, Community, & Resilience in the Lives of Young Adults was named to the American Association of Publisher's List of the Top 100 Books for Understanding Race in America. Crystal Leigh Endsley is Assistant Professor of Africana Studies at John Jay College of Criminal Justice, City University of New York. Her first book, The Fifth Element: Social Justice Pedagogy Through Spoken Word Poetry explores spoken word poetry as a tool for social justice, critical feminist pedagogy, and new ways of teaching and learning. She is an internationally renowned spoken word artist whose most recent work focuses on how spoken word poetry and performance can connect girls, impact their communities, and inform government policy. Marla L. Jaksch is an Associate Professor of Women's and Gender Studies and Coordinator of Competitive Post-Graduate Fellowships. Her research and teaching interests include: transnational feminisms, development, art and microfinance schemes, STEAM, visual culture, cultural tourism, heritage and preservation, feminist pedagogies and methodologies, and global community engaged learning. Anthony (Tony) R. Keith identifies as a poet, educator, and a nerd. As a poet, Tony has traveled around the world teaching through poetry and empowering young people to engage in the art of spoken word. He currently serves a Director of Programs at For Love of Children, an out-of-school time educational services provider for marginalized youth in Washington D.C.
Write More, Publish More, Stress Less!
Five Key Principles for a Creative and Productive Scholarly Practice

Dannelle D. Stevens

In this book, Dr. Dannelle D. Stevens offers five key principles that will bolster your knowledge of academic writing, enable you to develop a manageable, sustainable, and even enjoyable writing practice, and, in the process, effectively increase your publication output and promote your academic career.

Whether developing journal articles, book chapters, book proposals, book reviews, or conference proposals, this book will help you demystify the hidden structures and common patterns in academic writing and help you match your manuscript to the language, structures, and conventions of your discipline be it in the sciences, social sciences, or humanities.

Drawing on her experience as a writer and on her extensive research in the psychology of writing and the craft of scholarly writing, Dr. Stevens starts from the premise that most faculty have never been taught to write and that writers, both experienced and novice, frequently experience anxiety and self-doubt that erode confidence. She guides readers to understand themselves as writers and discover what has impeded or stimulated them in the past to establish positive new attitudes and sustainable habits.

She provides strategies for setting doable goals, organizing a more productive writing life, and demonstrates the benefits of writing groups, including offering a variety of ways in which you can experiment with collaborative practice. In addition, she offers reflections, exercises, and activities to spark your writing fluency and creativity.

Most importantly, believing that connecting your passions with your work is essential to stimulating your ideas and enthusiasm, this essential guide offers you the knowledge and skills to write more.

Have you ever wondered what happens in the earth underneath us? James has, and he wants to be a soil scientist. In Exploring Soils: A Hidden World Underground, James discovers that soil is not just dirt for digging in; it is an essential part of our world. He explores how plants and animals live in soil, how soils are formed, how they differ, and the ways that soil is essential in our lives.

Presenting a child-centered storyline written by Samantha Grover, a soil scientist and parent, and captivating illustrations from Camille Heisler, Exploring Soils will take you to an underground world filled with activity and discoveries.

The Author: Samantha Grover is a soil scientist. She and her plant ecologist partner have two young boys who are fascinated by the natural world. Their endless questions and the UNESCO International Year of Soils combined to inspire Dr. Grover to create her book to share the wonder of soils with a wider audience.

Animal Eco-Warriors
Humans and Animals Working Together to Protect Our Planet
Nic Gill

“Magnificent: fascinating and with deep accuracy and originality rarely found in non-fiction for young people....This will be irresistible for anyone who loves animals or the intricate interrelations between humans and the natural world.”— Jackie French

Join this amazing mob of animal eco-warriors on an action-packed adventure as they use their special talents to help solve our planet’s environmental problems.

From the nosy noses of biosecurity beagles at airports to rats learning to sniff out landmines in war-torn landscapes, animals are using their unique abilities to help make the world a better and safer place. With fantastic color photos of animal eco-warriors at work, this book is full of fun facts on how animals are helping humanity work towards a more sustainable future. There are also plenty of tips on how you can make a difference to the planet.

Featuring profiles of charismatic animals at work and their potential in daunting environmental issues in a positive way, Animal Eco-Warriors is a fun, educational read for children ages 9-13 years, teachers and librarians, and parents and families.

The Author: Nic Gill lives in Hobart with her three-legged cat, a family of ring-tailed possums, some Pekin frizzle bantams, countless native birds, and her human partner, James. She is featured in The Best Australian Science Writing 2016 and was bitten by an impressive array of animals while conducting research for her book, Animal Eco-Warriors. Five percent of her proceeds from Animal Eco-Warriors will go directly to supporting animal eco-warrior projects.

The Pilgrim Kings
A Story of the Magi
Gemma Corradi Fiumara

In this novel, the story of the legendary Magi comes to us in a surprising conjunction of fantasy and historical events. The likes of Herod the Great and Herod Antipas, John the Baptist and Jesus of Nazareth, Joseph Caiaphas and Pontius Pilate, Herodias and Salome, spring to life again to confront creatures of the imagination such as Caspar, Melchior, Balthazar, Leah, Purim, Deborah, Eliachim, and many others.

With the arrival of the Magi in Jerusalem, innumerable connections emerge among characters and events – progressively generating the plot of the novel.

There were rumors and prophecies circulating at that time in Jerusalem regarding a forthcoming king of the Jews, and King Herod is frantic with fears. At that same time a comet is sighted in the night sky. It is a visible light: the counterpart of the invisible angelic lights guiding each one of the Magi in search of the newborn king of the Jews.

The story progresses all the way to the spreading news of resurrection ... and further on to include Empress Helena, the relics of the Magi and their seizure by Frederick Barbarossa.

The Author: Gemma Corradi Fiumara is a training and supervising analyst with the Italian Psychoanalytic Society, and was formerly Professor of Philosophy at the Third University of Rome, Italy.

Writing on the Moon
Stories and Poetry from the Creative Unconscious by Psychoanalysts and Others
Edited by Bonnie Zindel

The first collection of creative writing by psychoanalysts, Writing on the Moon: Stories and Poetry from the Creative Unconscious by Psychoanalysts and Others is a collection of the best works published over the past 15 years in the Creative Literary Section of Psychoanalytic Perspectives accompanied imaginative introductions by literary editor Bonnie Zindel.

Some writings are raw and honest, some are dark and access our primal being. Others, filled with beauty, illuminate the internal life, the playful mind, and unconscious doodlings that might otherwise remain unformulated. The work is not scholarly or polite.

Creativity has long fascinated psychoanalysis, from Freud’s studies of Michelangelo and Leonardo to Marion Milner’s interest in artists and analysts. Plato called creativity “divine madness.”

The book’s contributors include Robert Stolorow, Thomas Ogden, and D.W Winnicott, and submissions come from as far as South Africa, Australia, England, France, Israel, and the United States – offering a glimpse into the private world of psychotherapists who hold so much in their work with patients.

The Author: Bonnie Zindel is a psychoanalyst in private practice in New York, and a faculty, supervisor, and training analyst at the National Institute for the Psychotherapies. A founding editor and Creative Literary Editor of Psychoanalytic Perspectives, she is the author of numerous articles on creativity.

Access 16 Project Book

Julitta Korol

This is a project book that guides you through the process of building a traditional Access desktop database that uses one Access database as the front-end (queries, reports, and forms) and another Access database to contain the tables and data. By separating the data from the rest of the database, the Access database can be easily shared by multiple users over a network. When you build a database correctly at the outset, this database can be migrated to another system with fewer issues and fewer objects that need to be redone.

Features:
• Understand the concepts of normalization
• Build tables and links to other data sources and understand table relationships
• Connect and work with data stored in other formats (Text, Word, Excel, Outlook and PowerPoint)
• Retrieve data with DAO, ADO, and DLookup statements
• Learn how to process text files for import and export
• Create expressions, queries and SQL statements
• Build bound and unbound forms and reports and write code to preview and print
• Incorporate macros in your database
• Work with attachments and image files
• Learn how to display and query your Access data in the Internet browser
• Secure your database for multi-user access
• Compact your database to prevent corruption resulting in data loss

The Author: Julitta Korol has published over two dozen computer books on using and programming Microsoft Excel and Microsoft Access. She lives on Long Island, New York.

500 pp, 7” x 9”
Paper, November 2017, 978 1 68392 094 6, $49.95 (S7)

COMPUTERS/ DATABASES

Android Pocket Primer

Oswald Campesato

Android Pocket Primer provides an overview of the latest Android mobile features to developers who are relatively new to this platform and its new Virtual Reality (VR) features. Featuring the new Google Pixel phone, readers will learn about various “core” concepts in Android, and also gain an understanding of how to use many Android APIs. Moreover, the appendices include an extensive set of references for extending your knowledge of Android. This hands-on title includes numerous code samples throughout. The focus is to provide code for Android features (such as buttons, text fields, and media-related APIs) that are likely needed in Android applications. The use of shorter code samples allows for more Android APIs to be included in this book. If you intend to become an expert in Android, this book will provide a stepping stone for your journey.

Features
• Gives a detailed overview of various features of the latest Android developments
• Provides code for Android features (such as buttons, text fields, and media-related APIs)
• Includes a chapter on Android VR, TV, and Auto
• Includes companion files with code samples derived in various ways, such as custom code (written by the author), variations of code from the Android documentation, and sections of code from discussions in online forums

The Author: Oswald Campesato (San Francisco, CA) specializes in D3, Java, Android, and CSS3/SVG graphics. He is the author/co-author of twenty books including jQuery, CSS3, HTML5 for Mobile and Desktop Devices, and Python Pocket Primer (Mercury Learning).

COMPUTERS/ PROGRAMMING/ MOBILE
C Programming
A Self-Teaching Introduction
R. Chopra

Unlike many C programming books written by C programmers, this brief, self-teaching introduction was written by an instructor familiar with the needs of students. The book defines key programming terms as it teaches the basics of C programming. It contains numerous real world programming examples showing first the algorithm, immediately followed by the program for the algorithm, and then its output. End-of-chapter exercises with “hints” help to review and master the material under discussion. An appendix with fifteen “C Lab projects” with their solutions is also included.

Features:
• Defines key programming terms as it teaches the C programming language
• Covers major topics such as arrays and pointers, structures and unions, file handling, and more
• Includes numerous real world programming examples showing first the algorithm, followed by the program itself, then the desired output

The Author: R. Chopra (PhD) is an assistant professor of computer science and engineering and has written several texts and journal articles.

200 pp, 7” x 9”
Paper & CD-ROM, May 2017, 978 1 68392 090 8, $44.95 (S7)
E-Book, May 2017, 978 1 68392 091 5, $24.95 (S7)

Computers/ Programming

Cloud Computing
An Introduction
R. Chopra

This overview of cloud computing in a “self-teaching” format contains state-of-the art chapters with tips and insights about cloud computing, its architecture, applications, information on security and privacy, and numerous case studies. It includes questions for discussion and “Cloud Computing Lab Experiments” to help in mastering its complex services and technologies. Recent research shows that cloud computing will be worth billions of dollars in new investments. Organizations are flocking to the cloud services to benefit from the elasticity, self-services, resource abundance, ubiquity, responsiveness, and cost efficiencies that it offers. Many government and private universities have already migrated to the cloud. The next wave in computing technology expected to usher in a new era will be based on cloud computing.

Features:
• Explores the basic advancements in the field of cloud computing
• Offers a practical, self-teaching approach with numerous case studies and lab experiments on installation, evaluation, security, and more
• Includes material on ESXi, MS AZURE, Eucalyptus, and more.

200 pp, 7” x 9”
Paper, May 2017, 978 1 68392 092 2, $44.95 (S7)
E-Book, Now Available, 978 1 68392 093 9, $24.95 (S7)

Computers/ Cloud Computing
Data Structures and Algorithms in C++
Pocket Primer
Lee Wittenberg

This book takes a minimalist approach to the traditional data structures course. It covers only those topics that are absolutely essential; the more esoteric structures and algorithms are left for later study. Suitable for an introductory data structures course or self-study, this book is written from the ground up in C++ (not translated from a Java-based text), and uses features of the C++ Standard Template Library to illustrate important concepts. A unique feature of the text is its use of literate programming techniques (originally developed by Donald Knuth) to present the sample code in a way that keeps the code from overwhelming the accompanying explanations.

Features:
• Takes a “minimalist” approach to the material that presents only essential concepts. This enables readers to focus on (and remember) just what they’ll need.
• Uses select features of the C++11 standard to simplify the sample code and make it easier to understand.
• Connects the concepts directly to the classes provided the Standard Template Library (STL), and shows how these classes can be implemented in C++.
• Uses “literate programming” techniques that allow the presentation of the sample code to more clearly show the details of the code as well as how the pieces fit together.

The Author: Lee Wittenberg (Professor Emeritus/Maryville College, TN) holds a degree from Stanford University and has taught computer science courses for over 30 years.

Pocket Primer

Microsoft Excel Functions and Formulas
FOURTH EDITION
Bernd Held, Theodor Richardson, and Julitta Korol

In this completely updated edition covering Excel 2016 and previous versions, Microsoft Excel Functions & Formulas 4/e demonstrates the secrets of Excel through the use of practical and useful examples in a quick reference format. Easy to use and equipped with a variety of functions, Microsoft Excel is the tool of choice when it comes to crunching numbers, building charts, and analyzing tables. With over 250 Excel worksheet examples, files, and added video tutorials, the book is an excellent resource for all Excel users who want to understand, create, and apply formulas. Experienced users will also find Microsoft Excel Functions & Formulas 4/e an excellent reference for many of the program’s advanced formulas and functions. The text is easy to understand with numerous step-by-step instructions and the actual, ready to use, Excel screenshots of the input and output from the formulas. A CD-ROM accompanies the book with video tutorials, worksheet files of examples for numerous functions, formulas, and all the figures from the text.

• Numerous step-by-step instructions and actual, ready to use Excel screenshots of the input and output from the formulas.

The Author: Bernd Held is the author of more than 40 books and 800 articles and reviews for various publications. Theodor Richardson is the Assistant Dean for the College of Business, Online at South University. Julitta Korol has published over two dozen computer books on using and programming Microsoft Excel and Microsoft Access.

**Network Security and Cryptography**

*Sarhan M. Musa*

*Network Security and Cryptography* introduces the basic concepts in computer networks and the latest trends and technologies in cryptography and network security. This book is a definitive guide to the principles and techniques of cryptography and network security, as well as their effective usage.

Primarily intended as a textbook for courses in computer science, electronics & communication, electrical and electronics, the book also serves as a basic reference and refresher for professionals in these areas.

**Features:**
- Introduces basic concepts in computer networks and the latest trends and technologies in cryptography and network security
- Includes end of chapter review questions

**The Author:** Sarhan M. Musa holds a PhD in electrical engineering and is currently an associate professor in the engineering technology department at Prairie View A&M University, Texas.

**Python 3**

*Pocket Primer*

*James R. Parker*

This book is an effort to give programmers sufficient knowledge of Python 3 to be able to work on their own projects. Although it covers all of the basic concepts of Python 3, the book also features a chapter on PyGame, which allows a programmer to handle graphics, mouse and keyboard interaction, and play sounds and videos, using the Lunar Lander game as a demonstration example. Another feature is the chapter on communication, which makes use of one of Python's best features: a collection of modules for sending and receiving email, communicating between computers, and working with Twitter and Web pages. Companion files that accompany this book contain all of the code examples as complete working programs. This means that there is no need to key them in, so they can be executed and perhaps modified or expanded.

- Features a chapter on PyGame, which allows a programmer to handle graphics, mouse / keyboard interaction, and play sounds and videos
- Explores communication in depth, making use of one of Python’s best features: a collection of modules for sending and receiving Email, communicating between computers, and working with Twitter and Web pages.
- Companion files contain all of the code examples as complete working programs

**Pocket Primer**

**Computers/ Programming/ Video Game Development**
This bestselling author demystifies SAP Controlling (CO) through an innovative and easy-to-understand Q & A format, using 450 + questions and over 200 illustrations & screenshots (including ERP 6.0). The book explains the important concepts / terms used in CO and provides you with several consulting, configuration, and usage tips on a variety of application components within CO. Separate chapters on SAP CO Tables and SAP CO Transaction Codes will help you navigate this complex software. This book will be an invaluable guide to everyone in the SAP community: beginners, end-users, programmers, and trainers.

- Includes screen-shots from the latest developments in SAP ERP, separate chapters on SAP CO Transaction Codes and SAP CO Tables.
- Uses over 450 questions, 200 screen shots and illustrations, 1300 CO transactions, and 70 SAP CO tables to help master this complex software.
- Includes a CD-ROM with CO templates, short cuts, and figures (including 4-color) from the book.

The Author: V. Narayanan is a Chartered Financial Analyst (CFA) and Project Management Professional (PMP).

This bestselling author demystifies the latest version of SAP Financial Accounting (FI) through an innovative and easy-to-understand Q & A format, using 440 + questions and over 180 illustrations and screenshots. The book explains the important concepts and terms used in FI and provides you with several consulting, configuration, and usage tips on a variety of application components within FI. Separate chapters on SAP FI Tables and SAP FI Transaction Codes will help you navigate this complex software. This book will be an invaluable guide to everyone in the SAP community: beginners, end-users, programmers, and trainers.

- Includes screen-shots from the latest version of SAP ERP, separate chapters on SAP FI Transaction Codes and SAP FI Tables.
- Uses over 450 questions, 200 screen shots and illustrations, 430 FI transactions, and 195 SAP FI tables to help master this complex software.
- Includes companion files with FI templates, short cuts, and figures (including 4-color) from the book.

Video Game Addiction

David Olle and Jean Riescher Westcott

A New Mexico woman, occupied for weeks with playing online games, was convicted of second-degree murder and child abandonment, after allowing her three and a half-year-old daughter to die of malnutrition and dehydration. A Philadelphia man was convicted of third-degree murder for killing his 17-month old daughter in a rage over a broken Xbox. In 2005 one study estimated that 40% of the players of World of Warcraft were addicted. Unfortunately, the number of these addictions is growing exponentially in most countries.

This book addresses the history, symptoms, causes, and available treatment for “video game overuse.” It examines numerous case studies and provides resources from several countries including the US, China, South Korea, and the UK.

- Questions and Answers about the medical definition/description of the condition; the source/causes; details of symptoms; available cure/treatment; and societal issues or public opinion such as legal issues, social/psychological ramifications, etc.
- Case studies from both the physician and patient perspectives
- Animations, figures, and photos to support, explain topics under discussion. In electronic versions these items are integrated as hyperlinks and “pop-ups” throughout the text
- Resources including Web sites, articles, blogs, and books that offer additional information on each subject

The Authors: David Olle is a freelance medical and science writer. Jean Riescher Westcott has written broadly on technology in books and online.

Advanced Thermodynamics

Mehrzad Tabatabaian

Designed for the senior/graduate level course in thermodynamics or for use as a reference for practicing engineers, this book includes the theoretical underpinnings and derivations necessary for advanced study as well as numerous applications from industry. Modern software tools, such as EXCEL and MathCAD, are used to solve mathematically challenging problems. Starting with the First and Second Laws of Thermodynamics, the book shows how the principles of thermodynamics apply to engine and power plant design. Applications include combustion of traditional fossil-fuels, pollutants and their effects, and alternative energy technologies—including fuel cells, solar power, and wind power.

- Includes a companion CD-ROM with files of images, figures, property data tables, and MATLAB codes
- Uses modern applications, e.g., alternative energy technologies to reinforce concepts
- Provides classical theoretical underpinnings and derivations
- Instructor’s resources available upon adoption.

The Author: Mehrzad Tabatabaian holds a PhD from McGill University and is currently the chairman of the Energy Efficiency and Renewable Energy Division at the British Columbia Institute of Technology. He has written numerous journal articles, has registered patents, and currently teaches courses in renewable energy and thermal engineering.

MLI Handbooks
Series Edited by Sarhan M. Musa
(Prairie View A&M University)

Alternative Energy Resource Handbook
Series edited by Sarhan M. Musa
G. R. Nagpal and S.C. Sharma
This book covers the various non-conventional energy systems such as solar energy, wind energy, energy from biomass and biogas, geothermal energy, energy from oceans, and chemical energy sources and more.
MLI Handbook Series
950 pp, 7” x 9”
Hardback, November 2017, 978 1 68392 122 6, $99.95 (S7)
Ebook, November 2017, 978 1 68392 123 3, $51.95 (S7)

Industrial Electronics and Control Handbook
Series edited by Sarhan M. Musa
A. K. Vanwasi and D. P. Joshi
This reference is designed for electrical engineering students and practicing engineers. Selected topics include power switching devices, power converters, applications of power devices, operational amplifiers, filters, digital circuits, uncontrolled rectifiers, open and closed loop controls, interference protection, industrial applications, and more.
MLI Handbook Series
850 pp, 7” x 9”
Hardback, November 2017, 978 1 68392 116 5, $99.95 (S7)
Ebook, November 2017, 978 1 68392 117 2, $51.95 (S7)

Electrical Engineering Handbook
Series edited by Sarhan M. Musa
P. L. Kapur
This reference book provides over 6,500 multiple choice and objective-type questions and answers for all types of electrical engineering topics: basic electronics, electrical circuits, electromagnetic theory, refrigeration, currents, power plants, batteries, electric devices, measurements, control systems, computer fundamentals, material science, machines, power systems, and more.
MLI Handbook Series
950 pp, 7” x 9”

Mechanical Engineering Handbook
Series edited by Sarhan M. Musa
R. K. Jain
This is a comprehensive book for quick reference and review of mechanical engineering topics in an objective type question/answer format. Contains over 6000 questions with answers. Selected topics include thermodynamics, nuclear power, engineering materials, machine design, measurements and instruments, refrigeration, hydraulics, heat transfer, strength of materials, and more.
MLI Handbook Series
1325 pp, 7” x 9”
Hardback, October 2017, 978 1 68392 130 1, $109.95 (S7)
Ebook, October 2017, 978 1 68392 131 8, $51.95 (S7)

Metallurgical Engineering Handbook
Series edited by Sarhan M. Musa
O. P. Gupta
This is a comprehensive book for quick reference and review of metallurgical topics in an objective type question/answer format. Containing over 6,000 questions with answers, it can be used as a review for all types of examinations.
MLI Handbook Series
680 pp, 7” x 9”
Hardback, November 2017, 978 1 68392 140 0, $99.95 (S7)
Ebook, November 2017, 978 1 68392 141 7, $51.95 (S7)

Modern Iron Making Handbook
Series edited by Sarhan M. Musa
R. H. Tukpary and V. R. Tukpary
This book deals with all of the key topics of iron making including blast furnace plants, operations and processes, raw materials, preparation, chemical processes, and more.
Advanced Engineering Mathematics
B. S. Grewal
This book is designed to cover all of the mathematical topics required in the typical engineering curriculum. Hundreds of examples with worked-out solutions provide a “self-study” format for both engineering students and as a refresher course for practicing engineers. Covers Algebra, Vectors, Geometry, Calculus, Series, Differential Equations, Complex Analysis, Transforms, Numerical Methods, Statistics, and special topics.
1350 pp, 7” x 9”
Hardback, November 2017, 978 1 68392 124 0, $79.95 (S7)
Ebook, November 2017, 978 1 68392 125 7, $49.95 (S7)

Modern Steel Making Handbook
Series edited by Sarhan M. Musa
R. H. Tupkary and V. R. Tupkary
This book deals with all of the key topics of steel making including bulk steel making, refining slags, efficient processes, furnace types, management practices, and more. The book is full of illustrative examples and charts, and figures to make complex concepts easy to understand.
MLI Handbook Series
550 pp, 7” x 9”

Ebook, June 2017, 978 1 68392 139 4, $34.95 (S7)

Solar Energy Handbook
Series edited by Sarhan M. Musa
G. D. Rai
This comprehensive book is an overview of solar energy topics and initiatives. Covers physics review, photovoltaic principles, off-grid and grid-connected systems, solar energy efficiency, and more.
MLI Handbook Series
1124 pp, 7” x 9”
Paper, September 2017, 978 1 68392 120 2, $109.95 (S7)
Ebook, September 2017, 978 1 68392 121 9, $59.95 (S7)

Control System Design
B. S. Manke
This book is an introduction to the controls that manage the operation of numerous machines, devices, and systems, from simple thermostats to hydroelectric power plants. Standard topics include the various types of controls: logic controls, linear controls, on-off controls, proportional and PID controls, embedded systems, and more.
350 pp, 7” x 9”
Hardback, August 2017, 978 1 68392 108 0, $54.95 (S7)
Ebook, August 2017, 978 1 68392 109 7, $34.95 (S7)

Machine Methods
M. Adithan
This reference is a brief introduction to the methods used in machine design. It uses a question and answer format to explain the key concepts in machine methods. Selected topics include: engineering drawing, soldering, welding, cutting tools, grinding, numerically controlled methods, turning and lathe work, measuring instruments, and more.
250 pp, 7" x 9"
Hardback, August 2017, 978 1 68392 132 5, $49.95 (S7)
Ebook, August 2017, 978 1 68392 133 2, $29.95 (S7)

Mechanical Engineering Exam Prep
Problems and Solutions
P. S. Mehta
This book provides over 1000 review questions and answers for all types of mechanical engineering exams. It covers all the aspects of mechanical engineering topics including thermodynamics, machine design, materials, and more.
MLI Exam Prep Series
200 pp, 7" x 9"
Paper, November 2017, 978 1 68392 134 9, $49.95 (S7)
Ebook, November 2017, 978 1 68392 135 6, $29.95 (S7)

Petroleum Refining Technology
Ram Prasad
This reference provides an overview of the methods used in petroleum refining. Selected topics include exploration, production and refining: crude oils, quality control, petroleum products, thermal conversion, manufacture of bitumens, pollution control in refineries, and more.
500 pp, 7" x 9"
Hardback, November 2017, 978 1 68392 106 6, $54.95 (S7)
Ebook, November 2017, 978 1 68392 107 3, $34.95 (S7)
Radar Systems and Radio Aids to Navigation
A. K. Sen and A. B. Bhattacharya
This comprehensive reference explains the many processes needed for creating radar systems and navigation aids. Selected topics include antennas, radar targets, Doppler radar, atmospheric probing, mathematical preliminaries, hyperbolic navigation, aircraft homing systems, and more.
658 pp, 7” x 9”
Paper, November 2017, 978 1 68392 118 9, $79.95 (S7)
Ebook, November 2017, 978 1 68392 119 6, $39.95 (S7)

Mathematical Methods for Physics
Using Maple & MATLAB
J. R. Claycomb
This book can be used by students and professionals in physics and engineering that have completed first-year calculus and physics. It will be useful for scientists and engineers seeking updates on the most recent packages included in MATLAB and Maple 2016. An introductory chapter reviews topics in algebra, trigonometry and complex numbers that are frequently used in physics. An early chapter serves the dual purpose of introducing basic Maple and MATLAB commands such as plotting features and unit conversion.
Claycomb: Houston Baptist University
500 pp, 7” x 9”
Hardback, December 2017, 978 1 68392 098 4, $89.95 (S7)
Ebook, December 2017, 978 1 68392 099 1, $49.95 (S7)

RE-ANNOUNCING!
Optics
An Introduction
A. Srivastava and Sarhan M. Musa
This book deals with the concepts of geometrical and physical optics and covers lasers, holography, and fiber optics. It contains numerous diagrams, worked-out examples, and related questions-answers to help students in the comprehension and appreciation of the concepts. A companion disc with animations, 4-color figures, etc., is included.
Musa: Prairie View A&M University
750 pp, 7” x 9”
Hardback & DVD, December 2017, 978 1 938549 70 0, $89.95 (S7)
E-Book, December 2017, 978 1 68392 147 9, $49.95 (S7)

MLI SCIENCE
Foundations of Physics
Steve Adams
This book is designed as a calculus-based introduction to the concepts of physics. Numerous examples, applications, and figures provide readers with simple explanations. Standard topics include vectors, conservation of energy, Newton’s Laws, momentum, motion, gravity, relativity, waves, fluid mechanics, and more.
Essentials of Physics Series
600 pp, 7” x 9”
Paper, October 2017, 978 1 68392 144 8, $69.95 (S7)

Numerical Methods in Engineering and Science
(C, and C++ , and MATLAB)
B.S. Grewal
This comprehensive text is an excellent resource for students and practicing engineers. Providing an excellent balance of theoretical and applied topics, it shows the numerical methods used with C, C++, and MATLAB.
725 pp, 7” x 9”
Hardback, November 2017, 978 1 68392 128 8, $79.95 (S7)
Ebook, November 2017, 978 1 68392 129 5, $49.95 (S7)

Assessing Service-Learning and Civic Engagement
Principles and Techniques
SECOND EDITION
Sherril B. Gelmon, Barbara A. Holland, and Amy Spring with Amy Driscoll and Seanna Kerrigan
This book offers a broad overview of many issues related to assessment in higher education, with specific application for understanding the impact of service-learning and civic engagement initiatives. This revised edition includes an additional chapter which explores recent changes in the assessment landscape and offers examples and resources for designing assessment strategies for community engagement in higher education. The original text includes narrative addressing assessment issues and strategies; detailed discussion of learning from multiple research projects performed over the past two decades about impact on multiple constituencies—students, faculty, communities, and institutions; and discussion of strategies for data collection, analysis, synthesis, and reporting. Specific assessment instruments for use with each constituency are provided, including suggestions for administration, preparation, and data analysis. This volume will be helpful for individuals seeking a comprehensive resource on assessment issues in higher education.

500 pp, 8 ½ x 11
Cloth, Dec 17, 978 1 945459 09 2, $95.00 (S5)
Paper, Dec 17, 978 1 945459 10 8, $49.95 (S5)

2016 National Survey of Senior Capstone Experiences
Expanding our Understanding of Culminating Experiences
Dallin George Young, Jasmin K. Chung, Dory E. Hoffman, and Ryan Bronkema
Senior capstone experiences, one of a number of high-impact educational practices promoted by the Association of American Colleges and Universities, provide students with an opportunity to integrate and apply what they have learned throughout their undergraduate years. Participating in capstone experiences have been linked to engagement in deep learning and gains in personal and social development, practical competence, and general education. The 2016 National Survey of Senior Capstone Experiences is an institution-level study designed to gather a national profile of campus efforts to promote student success in the senior year. This research report presents findings related to institutional priorities for the senior year, the types of capstone experiences offered, and the organization and administration of select capstone experiences.

Research Reports on College Transitions
225 pp, 8 ½” x 11”
Paper, September 2017, 978 1 942072 00 3, $30.00 (S5)

Academic Advising and the First College Year
Edited by Jenny R. Fox and Holly E. Martin
Academic advisors help students learn to make the most of their college years, not merely by completing requirements toward a degree but also by growing intellectually and developing all aspects of their identity. Many professional and faculty advisors are new to academic advising and may feel ill-equipped to do more than help students register for classes. This new edited collection provides an overview of the theory and best practice undergirding advising today while exploring the transition challenges of a wide-range of first-year college students, including those attending two-year colleges, coming from underrepresented backgrounds, entering underprepared for college-level work, and/or experiencing academic failure.

Published in partnership with NACADA: The Global Community for Academic Advising
250 pp, 8 ½” x 11”
Paper, September 2017, 978 1 942072 00 3, $30.00 (S5)
In this era of “Big Data,” institutions of higher education are challenged to make the most of the information they have to improve student learning outcomes, close equity gaps, keep costs down, and address the economic needs of the communities they serve at the local, regional, and national levels. This book helps readers understand and respond to this “analytics revolution,” examining the evolving dynamics of the institutional research (IR) function, and the many audiences that institutional researchers need to serve.

Internally, there is a growing need among senior leaders, administrators, faculty, advisors, and staff for decision analytics that help craft better resource strategies and bring greater efficiencies and return-on-investment for students and families. Externally, state legislators, the federal government, and philanthropies demand more forecasting and more evidence than ever before. These demands require new and creative responses, as they are added to previous demands, rather than replacing them, nor do they come with additional resources to produce the analysis to make data into actionable improvements. The IR function must become that of teacher, ensuring that data and analyses are accurate, timely, accessible, and compelling, whether produced by an IR office or some other source. Despite formidable challenges, IR functions have begun to leverage big data and unlock the power of predictive tools and techniques, contributing to improved student outcomes.

Beyond Access
Indigenizing Programs for Native American Student Success
Edited by Stephanie J. Waterman, Shelly C. Lowe, and Heather J. Shotton
Foreword by George S. McClellan

This book argues that two principal factors are inhibiting Native students from transitioning from school to college and from succeeding in their post-secondary studies. It presents models and examples of pathways to success that align with Native American students’ aspirations and cultural values.

Many attend schools that are poorly resourced where they are often discouraged from aspiring to college. Many are alienated from the educational system by a lack of culturally appropriate and meaningful environments or support systems that reflect Indigenous values of community, sharing, honoring extended family, giving-back to one’s community, and respect for creation.

The contributors to this book highlight Indigenized college access programs, meaning programs developed by, not just for, the Indigenous community, and are adapted, or developed, for the unique Indigenous populations they serve.
It has been proven that the better informed and trained ALL faculty members are, the better the educational process will be for achieving student retention and success. Providing adjunct faculty with up-to-date and innovative information further establishes a culture and an invitation to be involved in a life-long, transformative learning environment with ongoing professional development opportunities. The philosophy is to create a win-win, positive environment for all stakeholders which results in a fully engaged community for learners.

Creating the Path to Success in the Classroom
Teaching to Close the Graduation Gap for Minority, First-generation, and Academically Unprepared Students

Kathleen F. Gabriel

At a time when the numbers of underrepresented students – working adults, minority, first-generation, low-income, and international students – is increasing, this book, a companion to Teaching Underprepared Students, addresses the lack of specific guidance by providing faculty with additional evidence-based instructional practices geared toward reaching all the students in their classrooms, including those from groups that traditionally have been the least successful, while maintaining high standards and expectations.

Recognizing that there are no easy answers, Kathleen Gabriel offers faculty ideas that can be incorporated in, or modified to align with, faculty’s existing teaching methods. She covers topics such as creating a positive and inclusive course climate, fostering a community of learners, increasing engagement and students’ interactions, activating connections with culturally relevant material, reinforcing self-efficacy with growth mindset and mental toughness techniques, improving lectures by building in meaningful educational activities, designing reading and writing assignments for stimulating deep learning and critical thinking, and making grade and assessment choices that can promote learning.

Degrees That Matter
Moving Higher Education to a Learning Systems Paradigm

Natasha A. Jankowski and David W. Marshall

Concerned by ongoing debates about higher education that talk past one another, the authors of this book show how to move beyond these and other obstacles to improve the student learning experience and further successful college outcomes. Offering an alternative to the culture of compliance in assessment and accreditation, they propose a different approach which they call the Learning System Paradigm. Building on the shift in focus from teaching to learning, the new paradigm encourages faculty and staff to systematically seek out information on how well students are learning and how well various areas of the institution are supporting the student experience and to use that information to create more coherent and explicit learning experiences for students.

Sponsored by the National Institute for Learning Outcomes Assessment (NILOA)
Dynamic Lecturing
Research-Based Strategies to Enhance Lecture Effectiveness
Christine Harrington and Todd Zakrjaszek
Is the lecture an outmoded teaching method that inhibits active learning or is it a potentially powerful tool that is an essential part of every teacher’s repertoire?

This book presents up-to-date research on the different types of lecture, on what constitutes effective lecturing, and on the impact of lecturing when done appropriately and well. It fills the void in professional development resources on how to lecture, validating the practice when it’s aligned with the educational mission of creating engaged learning environments.

Christine Harrington and Todd Zakrjaszek demonstrate that, rather than lecture and active learning being mutually exclusive or either-or propositions, the effectiveness of the former can be greatly enhanced when combined with active learning techniques through what they define as dynamic lecturing; and provide context about the need to balance these approaches to meet the needs of students as they progress from novice to advanced learners.

Educating about Religious Diversity and Interfaith Engagement
A Handbook for Student Affairs
Edited by Kathleen M. Goodman, Mary Ellen Giess and Eboo Patel
Foreword by Kevin Kruger and Cindi Love
This book recognizes that student affairs professionals have little preparation or guidance in dealing with matters of spirituality, religion, secularism, and interfaith work at a time of greater diversity in students’ beliefs and that there is a need to engage with this aspect of student life. For those who don’t know how to begin and may be nervous about tackling a topic that has the potential to lead to heated disagreements, this book provides the resources and practical guidance to undertake this work.

This book provides student affairs practitioners with the tools they need to increase their comfort level and their ability to engage in discussions about belief in and out of the classroom, the contributors provide foundational knowledge, concrete teaching ideas, sample activities, and case studies that can be used in a variety of settings.

328 pp, 6” x 9”

Engaging Images for Research, Pedagogy, and Practice
Utilizing Visuals to Understand and Promote College Student Development
Edited by Bridget Turner Kelly and Carrie A. Kortegast
This book introduces practitioners and researchers of student affairs to the use of images as a means to gaining new insights in researching and promoting student learning and development, and understanding the campus environment. Visual research methods can surface and represent ideas in compelling ways and augment the traditional written word and numerical data methodologies of social science research.

The purpose of this book is to provide informative, rich examples of the use of visuals to understand and promote college student development research, pedagogy, and practice.

With the increased accessibility of cameras, the ability to engage in image production has become widely available. Individuals, including college students, faculty, and administrators, narrate the social world in new ways using visuals. While on the one hand students are using images to mobilize around social issues on campus, on the other, institutionally produced visual artifacts send messages about institutional culture and values.

In promoting visual literacy, this book offers new opportunities for student development administrators and faculty to utilize the visual sensory modality and image-
based artifacts to promote student success and belonging which are critical outcomes of higher education.

Guided by the core purpose of assessment, which is to enable faculty, administrators, and student affairs professionals with the information they need to increase student learning by making changes in policies, curricula, and other programs.

Enhancing Assessment in Higher Education
Putting Psychometrics to Work
Edited by Tammie Cumming and M. David Miller
Foreword by Michael J. Kolen
Assessment and accountability are now inescapable features of the landscape of higher education, and ensuring that these assessments are psychometrically sound has become a high priority for accrediting agencies and therefore also for higher education institutions. Bringing together the higher education assessment literature with the psychometric literature, this book focuses on how to practice sound assessment.

This volume provides comprehensive and detailed descriptions of tools for and approaches to assessing student learning outcomes in higher education. The book is

Hitting Pause
65 Lecture Breaks to Refresh and Reinforce Learning
Gail Taylor Rice
Pauses constitute a simple technique for enlivening and enhancing the effectiveness of lectures, or indeed of any form of instruction, whether a presentation or in an experiential setting. This book presents the evidence and rationale for breaking up lectures into shorter segments by using pauses to focus attention, reinforce key points, and review learning. It also provides 65 adaptable pause ideas to use at the opening of class, mid-way through, or as closers.

Pausing helps teachers apply these principles and create student engagement without requiring major changes in their lesson plans. With careful planning, they can integrate pauses into learning sessions with ease and significantly reinforce student learning. They will also gain feedback on students' comprehension.

Rice sets out the characteristics of good pauses, gives advice on how to plan them and how to introduce them to maximum effect. She provides compelling examples and concludes with a repertory of pauses readers can easily modify and apply to any discipline.

Juggling Higher Education Study and Family Life
Louise Webber
Women with families face particular challenges when they undertake Higher Education. Questions arise about coping with the demands of study, new family routines, and the changed identity when mother becomes student: Can I manage it all? How will my family react? Will they give me the time and support I need?

The author, herself a mother and lecturer...
when she completed her postgraduate studies, draws on the stories of the women in her study as they negotiate support from their partners and families. Applying theoretical perspectives, she suggests practical and effective strategies for combining study and family life. This book is a valuable guide for women in similar situations, and will enhance the understanding of tutors, lecturers and policymakers.

Jump-Start Your Online Classroom
Mastering Five Challenges in Five Days
David S. Stein and Constance E. Wanstreet

Jump-Start Your Online Classroom prepares a first-time online instructor to successfully manage the first few weeks of a course, including activities to help instructors plan, manage, and facilitate online instruction; and provides resources helpful during the beginning weeks of class. The authors address everyday problems and suggest solutions informed by their extensive research and experience. The five challenges are designed to be addressed in five days are to:

- Make the transition to online teaching
- Build online spaces for learning
- Prepare students for online learning
- Manage and facilitating the online classroom
- Assess learner outcomes in an online classroom

The book is based on the authors’ design and facilitation model that identifies five elements comprising an online learning environment: digital tools, participants, social practices, learning community, and outcomes.

Making Global Learning Universal
Promoting Inclusion and Success for All Students
Hilary Landorf, Stephanie Doscher, and Jaffus Hardrick

While there is wide consensus in higher education that global learning is essential for all students’ success, there are few models of how to achieve this goal. The authors of this book, all of whom are from one of the nation’s largest and most diverse research universities, provide such a model and, in doing so, offer readers a broad definition of global learning that both encompasses a wide variety of modes and experiences—in-person, online, and in co-curricular activities at home and abroad—and engages all students on campus. They provide a replicable set of strategies that embed global learning throughout the curriculum and facilitate high quality, high-impact global learning for all students.

The approach this book describes is based upon three principles: that global learning is a process to be experienced, not a thing to be produced; that it requires all students’ participation—particularly the underrepresented—and cannot succeed if reserved for a select few; and that global learning involves more than mastery of a particular body of knowledge.
ACADEMIC AND PROFESSIONAL TITLES

Mapping the Field of Adult and Continuing Education
An International Compendium
Edited by Alan B. Knox, Simone C. O. Conceicao and Larry G. Martin

The field of Adult and Continuing Education (ACE) has long been influential beyond its already porous borders and continues to be a source of important ideas, inspiration, and innovative practices for those in disciplines such as educational administration, social work, nursing, and counseling. Recognizing this, the American Association for Adult and Continuing Education commissioned the editors to create this compendium, which provides an invaluable resource to readers already established in the field, those entering the field, and to myriad neighbors of the field as well.

This four-volume compendium (also available as a combined e-book) brings together a host of national and international contributors to map the field of ACE in a series of brief articles addressing key theories and practices across its many domains and settings. These are arranged in four volumes, available either individually or as a set:

All four volumes are available as a single e-book, to make the most of the inter-relatedness of the various topics. This version uses live links in the table of contents and combined index (as well as keywords at the start of each article) to enable readers to follow their own topical interests and thus create unique learning pathways for themselves.

Meaningful and Manageable Program Assessment
A How-To Guide for Higher Education Faculty
Laura J. Massa and Margaret Kasimatis
In this book, the authors provide readers with a straightforward approach to doing assessment in a way that is meaningful, manageable, and sustainable over time. Including a straightforward overview of assessment concepts and principles and practical, easy-to-follow instructions for multiple assessment tools and key steps in the assessment process, this book is a handy, all-in-one how-to guide. In addition, the text guides readers toward the development of a culture of assessment. Writing in a conversational tone that has helped the authors to successfully teach assessment principles and practices to faculty and administrators from a variety of academic disciplines and institutions.

Overcoming Student Learning Bottlenecks
Decode the Critical Thinking of Your Discipline
Joan Middendorf and Leah Shopkow
Decoding the Disciplines is a widely-used and proven methodology that prompts teachers to identify the bottlenecks – the places where students get stuck – that impede learners’ paths to expert thinking in a discipline. The process is based on recognizing the gap between novice learning and expert thinking, and uncovering tacit knowledge that may not be made manifest in teaching.
Through “decoding”, implicit expert knowledge can be turned into explicit mental tasks, and made available to students. This book presents a seven-step process for uncovering bottlenecks and determining the most effective way to enable students to surmount them.
The authors explain how to apply the seven steps of Decoding the Disciplines – how to identify bottlenecks, unpack the critical thinking of experts, teach students how to do this kind of thinking, and how to evaluate the degree to which students have learned to do it.

Passport to Change
Designing Academically Sound, Culturally Relevant Short Term Faculty-Led Study Abroad Programs
Edited by Susan Lee Pasquarelli, Robert A. Cole, and Michael J. Tyson
There has been enormous growth in faculty-led short-term study abroad programs because they offer flexibility and expand opportunities for students and faculty members who wish to study and work abroad but do not have the resources or time to spend a semester or year away. These experiential programs offer unique opportunities for university faculty to teach their disciplines abroad while engaging students in direct, authentic cultural encounters for transformative change.
This volume provides a detailed framework and guidance on how to plan and implement a faculty-led study abroad program. Seasoned faculty leaders and administrators describe an overall program development process, comprehensively identify the elements for designing the curriculum, and offer advice and solutions to unique challenges inherent in various types of programs.

Student Affairs by the Numbers
Quantitative Research and Statistics for Professionals
Rishi Sriram

Student Affairs by the Numbers aims to be the go-to book for student affairs professionals who want to know the basics of quantitative research and statistics for their work. Books on assessment in student affairs tend to discuss processes more than research design and statistics. Most books on statistics share too much information for practitioners, overwhelming them and making it difficult to discern what they need to know. Since these books do not use examples from student affairs, it is even more difficult for practitioners to connect with new concepts.

Student Affairs professionals need to know how to design a study, collect data, analyze data, interpret results, and present the results in an understandable manner. This book will begin by establishing the need for these skills in student affairs and then quickly move to how to develop a research culture, how to conduct research, how to understand statistics, and concluding with how to change our research/assessment behaviors in order to make higher education better for students.

200 pp, 6" x 9", 27 illus

Teaching Interculturally
A Framework for Integrating Disciplinary Knowledge and Intercultural Development
Amy Lee
With Robert K. Poch, Mary Katherine O'Brien, and Catherine Solheim
Foreword by Peter Felten

Most faculty have multiple diversities present in any given classroom or academic program—whether from an influx of international students or an increase of students from low-income, first generation, and/or racial/ethnic minority populations—and are concerned about how to maintain a rigorous curriculum and ensure that all their students succeed. This book provides faculty and instructors with a theoretical foundation, practical tools, and an iterative and reflective process for designing and implementing an intercultural pedagogy. The authors bring to bear the expertise of their various disciplinary backgrounds to offer a responsive, integrative framework to develop and continually refine a pedagogy that both promotes deep disciplinary learning and supports intercultural outcomes for all students.

Understanding How We Learn
Applying Key Educational Psychology Concepts in the Classroom
Todd Zakrajsek and Donna Bailey

This succinct, jargon-free, and user-friendly volume offers faculty an introduction to 35 concepts from educational psychology that illuminate what’s going through the minds of learners as they grapple with new information.

The concepts are conveniently grouped under major topics, each introduced by a summary of the field, its origins, the latest relevant research, and the implications for teaching: Cognition and Thinking, Memory, Learning, Perceiving and Living in the World, Working in Groups, Motivation, and Perceptions of Self.

Within each section, Todd Zakrajsek and Donna Bailey provide summaries of each key concept, explaining the terminology, its background and relevance to student learning, and offering ideas and tips for (continued overleaf)
immediate application in teaching.

What’s Next for Student Veterans? Moving From Transition to Academic Success  
Edited by David DiRamio  
With the passage of the Post-9/11 GI Bill in 2008, more than 1.4 million service members and their families became eligible for higher education benefits, and veterans from the wars in Iraq and Afghanistan enrolled in colleges and universities in record numbers. The first wave of research about these new student veterans focused mostly on describing their characteristics and the transition from military service to civilian life and the college campus. This new edited collection presents findings from the second wave of research about student veterans, with a focus on data-driven evidence of academic success factors, including persistence, retention, degree completion, and employment after college.

EDUCATION  

Beijing Model of Gifted Education and Talent Development  
Zhongxiong Fang, Yi Zhang, Xiangyun Du, and Xingli Zhang  
In China, talent development has been one of the key areas of attention over the past 35 years, through constant exploration and research, a comprehensive gifted education system called the Beijing Model of Gifted Education and Talent Development (BMGETD) has gradually been developed. This book presents a summary of the educational practices used in and the research done on the BMGETD over these decades. This includes several patterns for gifted education such as acceleration in special classes, special classes without acceleration, enrichment within regular classes, and a joint program among high schools, universities, and professional academic institutions.

EDUCATION  

Chemistry in the Marketplace  
SIXTH EDITION  
Ben Selinger and Russell Barrow  
Chemicals are everywhere. Many are natural and safe, others synthetic and dangerous. Or is it the other way around? Walking through the supermarket, you might ask yourself: should I be eating organic food? Is that anti-wrinkle cream a gimmick? Is it worth buying BPA-free plastics?  
This sixth edition of Chemistry in the Marketplace provides fresh explanations, fascinating facts, and funny anecdotes about the serious science in the products we buy and the resources we use. With chapters on the chemistry found in different parts of our home, in the backyard, and in the world around us, Ben Selinger and Russell Barrow explain how things work, where marketing
Invisibly Blighted
The Digital Erosion of Childhood
Sandra Leaton Gray and Andy Phippen
Children carry the weight of other people's expectations on their shoulders, and in the technological age, that represents a bigger burden than it ever has before. This book is a manifesto for a different digital future for children in which their rights are respected and their identities are free. The authors explore new ways of understanding children's risk, schooling, biometrics, privacy issues, and technology innovation. Aimed at anyone who has sensed the cultural shift in childhood currently taking place, this book helps readers think more deeply about what it means to be a child in the digital world today.

Movement Environment Rating Scale (MOVERS) for 2–6-year-olds Provision
Improving physical development through movement and physical activity
Carol Archer and Iram Siraj
Physical development is a key component of the curriculum in the great majority of countries. But so far there has been no valid means of assessing the quality of the child's physical experience or the pedagogy and environmental quality of those physical experiences.

The Movement Environment Rating Scale (MOVERS) is a new method of measuring the quality of environment and pedagogy in which young children are encouraged to move and be physically active. It applies the methodology used in the ECERS-E and SSTEW rating scales, making it easy for educators already familiar with these well-established scales to adopt.

ACADEMIC AND PROFESSIONAL TITLES

Education

Sites of Resistance
Gypsies, Roma and Travellers in School, Community and the Academy
Andrew Ryder
This account of Gypsy, Roma, and Traveler policy and practice in education, social policy, and politics is enriched with reflection, theoretical analysis, and biographical narratives. It draws on the author’s 25 years’ experience of working as an activist, educationalist, and researcher for Gypsy, Roma, and Traveler rights.

*Sites of Resistance* is essential reading for service providers, campaigners, and academics. It illustrates how crucial it is that those at the margins have agency and are empowered in the quest for social justice and that those in school, community, and the academy who are working ‘with,’ ‘for,’ or ‘on’ Traveler communities reflect critically on their practice.

176 pp, 6 1/8” x 9 1/8”
Paper, November 2017, 978 1 85856 697 9, $32.95 (S5)

Young and Homeless
Tina Byrom and Sheine Peart
Why do young people become homeless and what might be done about it? This book is important reading for academics and students studying education, sociology, or social work who wish to explore and understand the experience of homeless young people. Their stories about their aspirations, experiences of schooling, and the family breakdowns that culminate in their becoming homeless challenges tired assumptions about homelessness. Through exploring one effective support service, the book presents positive and far-reaching strategies to assist young people in difficult predicaments back into secure accommodation.

150 pp, 6 1/8” x 9 1/8”
Paper, October 2017, 978 1 85856 804 1, $29.95 (S5)

Somali Parents and Schooling in Britain
Mohamed H. Kahin and Catherine Wallace
Although Somalis are among the largest communities to settle in the UK, the schooling needs of Somali children have received little attention, except for in Mohamed Kahin’s well-received book published in 1997, *Educating Somali Children in Britain*.

Drawing on the rich research findings from Kahin’s interviews with children and parents as well as on conversations with Kahin’s daughter, Sagal Kahin, Catherine Wallace sets out ways to maximize the achievement of Somali pupils in UK schools. Much of the book’s content will be applicable to other minority groups and to families in global societies of increasingly diverse ethnic, class, and cultural backgrounds.

128 pp, 6 1/8” x 9 1/8”
Paper, September 2017, 978 1 85856 823 2, $32.95 (S5)

Taking Action for Looked After Children in School
A Knowledge Exchange Programme
Catherine Carroll and Claire Cameron
Promoting the Achievement of Looked After Children (PALAC) is a knowledge exchange program that aims to support the development of practice in schools and to expand the evidence base to ultimately improve outcomes for children in care. Feedback on the first year of PALAC exceeded expectations, with practitioners using their projects to evaluate and adapt their practice.

Now PALAC’s leading researchers present a summary of the evidence, supported by numerous case studies, and reflect on its implications. This book will become a teaching resource for all professionals concerned with the education of children in care, such as designated teachers and Virtual School colleagues.

100 pp, 6 1/8” x 9 1/8”
Paper, Now Available, 978 1 78277 190 6, $21.95 (S5)

Rhizosphere biology is approaching a century of investigations wherein growth-promoting rhizomicroorganisms (PGPR) have attracted special attention for their ability to enhance productivity, profitability, and sustainability at a time when food security and rural livelihoods are a key priority. Bio-inputs — either directly in the form of microbes or their by-products — are gaining tremendous momentum, and harnessing the potential of agriculturally important microorganisms could help in providing low-cost and environmentally safe technologies to farmers. Advances in PGPR Research explores these recent developments and includes coverage of:

- low input biofertilizers and biofungicides used for sustainable agriculture
- molecular techniques to enhance efficacy of microbial inputs
- intellectual property issues in PGPR research

408 pp, 6 1/4" x 9 1/4"
Cloth, November 2017, 978 1 78639 032 5, $225.00 (S6)

**Almonds**

**Botany, Production and Uses**

*Edited by Rafel Socias i Compay, and Tom M. Gradziel*

This book provides a comprehensive overview of almond growing from a scientific and horticultural perspective, covering botany in addition to processing and industrial uses. Almonds are an important crop; they are highly regarded for their flavor, nutritional properties and culinary uses, and almond oil is used widely in food, cosmetic and pharmaceutical production. They are easy to transport and have long storability, facilitating global dissemination. Demand is constantly increasing and global production has more than doubled in the last 20 years.

The popularity of almonds and the increase in demand has required new plantings and a response to ongoing changes in cultural and climatic conditions. Almonds: Botany, Production and Uses meets the need for up-to-date information on this crop and covers:

- Botany and taxonomy
- Cultivation, genetics, and breeding
- Propagation, orchard management, and harvesting
- Pests and diseases
- Nutrition, marketing, and utilization

480 pp, 6 1/4" x 9 1/4"
Cloth, August 2017, 978 1 78064 837 8, $205.00 (S6)

**Gradziel: University of California**

**Cherries**

**Botany, Production and Uses**

*Edited by José Quero-García, A. Lezzoni, J. Pulawska, and Gregory Lang*

Sweet and sour cherries (*Prunus avium* and *Prunus cerasus*) are important fruit crops for which demand is high and growing. A significant number of new varieties, rootstocks, and training systems have been released or developed in recent years in order to improve the efficiency and profitability of cherry orchards.

Cherries: Botany, Production and Uses covers the genetics, ecophysiology, production, protection, and uses of cherries. Presenting up-to-date, scientific data and applied information, this book is invaluable for researchers, teachers, and all professionals working in the cherries value chain.

480 pp, 6 1/4" x 9 1/4"
Cloth, August 2017, 978 1 78064 837 8, $205.00 (S6)

**Lezzoni: Michigan State University**

**Lang: Michigan State University**
**Biocontrol Agents**
Entomopathogenic and Slug Parasitic Nematodes
*Edited by M. Abd-Elgawad, Tarique Hassan Askary, and J. Coupland*

This book describes entomopathogenic and slug parasitic nematodes as potential biocontrol agents in crop insect and slug pest management. Addressing research on these two nematodes from tropical, subtropical, and temperate countries, it covers the new techniques and major developments regarding mass production, formulation, application, commercialization, and safety measures. Plans for future strategies to make these beneficial nematodes cost-effective and expand their use by including them in integrated pest management programs in different agro-ecosystems are also discussed.

**Parthenium Weed**
Biology, Ecology and Management
*Edited by Stephen Adkins, Asad Shabbir, and Kunjithapatham Dhileepan*

This book explores the most important aspects of the biology, ecology, and management of “the world's worst weed.” Covering its mode of spread and its impacts upon agricultural production, the environment, and human health, it also reviews management techniques such as biological control, cultural, physical, and chemical approaches. Suitable for researchers of plant ecology and related subjects, it also considers the possible uses of Parthenium weed, its distribution, and the impacts of climate change.

**Invasive Alien Plants**
Impacts on Development and Options for Management
*Edited by Carol A. Ellison, Sean T. Murphy, and K. Sankaran*

Invasive alien plants pose a major threat to agriculture and livelihoods worldwide. This book considers those impacts and the options for biological control through a case study of mikania weed, a neotropical invasive plant to many countries in the tropical, humid forest zones of Southeast Asia. This perennial vine can smother agro-forestry and natural forest ecosystems as well as many crops within home gardens and plantation production systems. The design of policy frameworks to combat invasive species is considered in depth as is the use of classical biological control against mikania weed.

**Peas and Beans**
Anthony Biddle

This practical book provides an accessible overview of all aspects of pea and bean production, including botany and physiology, breeding, agronomy, weed management, pests and diseases, harvesting, nutritional value and uses. It also reflects on the constraints and future opportunities for peas and beans, exploring their role in food sustainability and crop rotation, and various factors affecting supply and demand such as climate change and breeding technologies.

Peas and beans are crops of economic, social, and agronomic importance, and this volume provides the specialist knowledge needed to ensure good quality standards are met. It includes:

- coverage of the main types of peas and beans grown on a significant scale or commercially produced in large area farming
- key information relating to the role of peas and beans in biological nitrogen fixation
- extensive coverage from the technology of cultivation to postharvest industry
- high-quality photos presented in full color throughout.

Plant Gene Silencing
Mechanisms and Applications
Edited by Tamas Dalmay
Plant gene silencing is a crucially important phenomenon in gene expression and epigenetics. This book describes the way small RNA is produced and acts to silence genes, its likely origins in defense against viruses, and its potential to improve plants. Plant gene silencing can be used to improve industrial traits, to make plants more nutritious or more valuable to consumers, to remove allergens, and to improve resistance to weeds and pathogens.

Seedlings
Biology of Plant Establishment
Stephen Adkins, I. Kranner, M. I. Daws, and W. Stuppy
Seedling establishment is the most critical phase in plant development, making the seedling an important area in basic and applied research. This new graduate-level textbook presents key topics such as different types of germination, the transition from seed to seedling, hormonal regulation of tropisms and morphogenesis and autotrophy acquisition, going on to consider seedling ecology, how seedlings survive in extreme environments and the seedling stage in weeds, agriculture and environmental plants. Written by authors from diverse fields of study and research, this textbook is an essential resource for students and researchers in plant ecology, botany, agriculture, conservation, and restoration ecology.
Modular Texts Series
256 pp, 7 1/2" x 9 3/4"  
Paper, January 2018, 978 1 84593 790 4, $72.50 (S6)

Temperate Agroforestry Systems
SECOND EDITION
Edited by Andrew M. Gordon and Scott M. Newman
Agroforestry is a land use system that allows for the concurrent production of trees and agricultural crops from the same piece of land. It has a rich history of development and has been practiced in some parts of the world for more than 6,000 years. The first edition of Temperate Agroforestry Systems concentrated on those areas within the temperate zones where the greatest advances, adoptions and modifications had taken place at that time: North and South America, China, Australia, New Zealand, the United Kingdom, and Continental Europe. The fully-updated edition now introduces the reader to other regions where temperate agroforestry research and development are contributing to sustainable food production systems, including India, Chile, and Scandinavia. Two previous chapters on North America and Continental Europe are also split into separate chapters for Canada and the United States and the United Kingdom and Europe.

The UK Pesticide Guide 2017
Edited by Martin A. Lainsbury
The UK Pesticide Guide 2017 has seven new active ingredient profiles. Two are confirmed as available in 2017 while five are currently only listed as Products also Registered (PARs). In addition, hazard precautions have been upgraded, and the roll out of extended buffer zones for some products continues with many products re-approved under new MAPP numbers. There are also seven new herbicide profiles—four in the main section and three as PARs; eight new fungicide profiles—six in the main section and two as PARs; and one new plant growth regulator (PGR) combination and one new molluscicide. The main section of the guide no longer includes eight herbicide profiles (tepraloxydim approval expires 30/11/2016), 17 fungicides (including prochloraz), four insecticides, and one PGR.

Paper, Now Available, 978 1 901396 68 3, $85.00 (S6)
Australasian Eagles and Eagle-like Birds
Stephen Debus

Eagles are awe-inspiring birds that have influenced much human endeavor. Australia is home to three eagle species, and in Melanesia there are four additional endemic species. A further three large Australian hawks are eagle-like. Eagles, being at the top of the food chain, are sensitive ecological barometers of human impact on the Earth's ecosystem services, and all of the six Australian species covered in this book are threatened in at least some states (one also nationally). Three of the four Melanesian tropical forest endemics are threatened or near-threatened.

In Australasian Eagles and Eagle-like Birds, Dr. Stephen Debus provides a 25-year update of knowledge on these 10 species as a supplement to the Handbook of Australian, New Zealand and Antarctic Birds (HANZAB) and recent global treatises, based partly on his own field studies. Included are the first nest or prey records for some Melanesian species.

This book places the Australasian species in their regional and global context, reviews their population status and threats, provides new information on their ecology, and suggests what needs to be done in order to ensure the future of these magnificent birds.

Paper, November 2017, 978 1 4863 0692 3, $37.95 (S5)

Australian Echinoderms
Biology, Ecology and Evolution
Edited by Maria Byrne and Timothy O’Hara

Echinoderms — including feather stars, sea stars, brittle stars, sea urchins and sea cucumbers — are some of the most beautiful and interesting animals in the sea. They play an important ecological role, and several species of sea urchins and sea cucumbers form the basis of important fisheries. Over 1,000 species live in Australian waters, from the shoreline to the depths of the abyssal plain, and the tropics to Antarctic waters.

Australian Echinoderms is an authoritative account of Australia's 110 families of echinoderms. It brings together comprehensive information on the identification, biology, evolution, ecology, and management of these animals in a single volume for the first time. Richly illustrated with 700 beautiful color photographs and written in an accessible style, it is the perfect companion of marine enthusiasts, marine conservation groups, ecologists, and academics as well as fisheries managers in Australia and anywhere these fascinating animals are studied.

624 pp, 8 ½” x 10 ⅜”, 700 color photos & illus
Cloth, September 2017, 978 1 4863 0762 3, $134.95 (S5)

Biostatistics for Animal Science
An Introductory Text
THIRD EDITION
Miroslav Kaps and William R. Lamberson

Designed to cover techniques for analysis of data in the animal sciences, this textbook provides an overview of the basic principles of statistics, enabling the subsequent applications to be carried out with familiarity and understanding, followed by more complex applications and detailed procedures commonly used in animal sciences. Each chapter begins by introducing a problem with practical questions, followed by a brief theoretical background, and is supplemented with an abundance of examples in SAS from animal sciences and related fields.

568 pp, 7 ½” x 9 ⅝”
Paper, August 2017, 978 1 78639 035 6, $75.00 (S6)

A Field Guide to Spiders of Australia
Robert Whyte and Greg Anderson
Foreword by Tim Low

Australians have a love-hate relationship with spiders. Spiders inspire fear, especially dangerous species such as the Redback and Sydney Funnelweb. Yet Peacock Spiders, whose males spread a colorful fan and wave their legs in a courtship dance to impress females, have won rapturous appreciation.
A Field Guide to Spiders of Australia covers all known Australian spider families, using over 1,300 stunning color photographs of live animals to enable identification of commonly encountered spiders to the family level and, in some cases, to genus and species. Highly accurate and vetted by experts, it contains the most up-to-date taxonomy information and is the most comprehensive account of Australian spiders ever published. With more than two-thirds of Australian spiders yet to be scientifically described, this field guide sets the scene for future explorations of the extraordinary Australian fauna.

464 pp, 5 1/2" x 8 1/2", 1300+ color photos Paper, September 2017, 978 0 643 10707 6, $37.95 (S5)

Fish Viruses and Bacteria: Pathobiology and Protection
Patrick T. K. Woo and R. C. Cipriano

Taking a disease-based approach, Fish Viruses and Bacteria: Pathobiology and Protection focuses on the pathobiology of and protective strategies against the most common, major microbial pathogens of economically important marine and freshwater fish.

The book covers well-studied, notifiable piscine viruses and bacteria, including new and emerging diseases which can become huge threats to local fish populations in new geographical regions if transported there via infected fish or eggs. A concise but thorough reference work, this book:

- Covers key viral and bacterial diseases of notable fish species;
- Reviews major well-established piscine pathogens as well as new, emerging, and notifiable diseases;
- Contains the most up-to-date research contributed by a team of over 50 world experts.

392 pp, 7 1/2" x 9 1/2"
Cloth, June 2017, 978 1 78064 778 4, $175.00 (S6)

Olfaction in Animal Behaviour and Welfare
Edited by Birte Lindstrom Nielsen

Evidence-based, yet entirely practical, this important new text builds upon the basics of neuroscience to describe the link between olfaction, animal behavior, and the importance of odors for animal welfare.

Focusing on animals managed by humans, and taking animal behavior as the starting point, the book is written in a straightforward style and features illustrated examples from many different species with in-depth research from acknowledged experts in the area.

From the scientific basis of olfaction and odor perception, the text covers pheromones, odorant learning, and behavioral tests before describing the role of olfaction in, for example, fear, foraging, and reproduction, and olfactory behavior in farm animals, zoo animals, laboratory animals, and companion animals.

Paper, September 2017, 978 1 78639 159 9, $75.00 (S6)

Reproductive Technologies in Farm Animals
SECOND EDITION
I. Gordon

Building on the successful structure of the first edition, this second edition has been revised to provide up-to-date accounts of the key techniques employed in manipulating reproduction in farm animals, including beef and dairy cattle, pigs, sheep, goats, buffaloes, camels, horses, and poultry.

A classic introductory text to the subject, the book is based on a comprehensive review of the current literature. It:

- Outlines different agricultural systems and explores the ethical implications of modern farming methods;
- Details the many new developments, including the commercial application of sexed semen and large-scale application of in vitro-produced cattle embryos;
- Provides a valuable synopsis of current and future reproductive technologies, such as cloning and the production of transgenic animals.

ENVIRONMENT & ECOLOGY

Discovering Australian Flora
An Australian National Botanic Gardens Experience
Fanny Karouta-Manasse

Australia’s complex, beautiful, and diverse flora is showcased in stunning botanic gardens across the continent. Through exquisite color photographs taken at the Australian National Botanic Gardens (ANBG), Fanny Karouta-Manasse celebrates the minute and intriguing details of these plants. Discovering Australian Flora explains how plants are displayed in the ANBG according to themes and provides clear and simple geographical, historical, and botanical information. It also describes the unique features of Australian flora, including their reliance on fire and ability to survive in poor soil, and looks in detail at the two dominant genera in the Australian landscape – Eucalyptus and Acacia.

This fresh and intimate view of some of Australia’s native flora will serve not only as a companion to visitors to the ANBG but will also allow others to explore the wonders of Australia’s botanical treasures. It will appeal to both local and overseas readers wishing to become more familiar with Australian native flora. The striking photographs will appeal to anyone with an appreciation and passion for nature’s beauty.

Environmental History and Ecology of Moreton Bay
Daryl McPhee

The south-east Queensland region is currently experiencing the most rapid urbanization in Australia. This growth in human population, industry and infrastructure puts pressure on the unique and diverse natural environment of Moreton Bay. Much loved by locals and holiday-goers, Moreton Bay is also an important biogeographic region because its coral reefs, seagrass beds, mangroves and saltmarshes provide a supportive environment for both tropical and temperate species. The bay supports a large number of species of global conservation significance, including marine turtles, dugongs, dolphins, whales and migratory shorebirds, which use the area for feeding or breeding.

Environmental History and Ecology of Moreton Bay provides an interdisciplinary examination of Moreton Bay, increasing understanding of existing and emerging pressures on the region and how these may be mitigated and managed. With chapters on the bay’s human uses by Aboriginal peoples and later settlers, its geology, water quality, marine habitats and animal communities, and commercial and recreational fisheries, this book will be of value to students in the marine sciences, environmental consultants, policy-makers and recreational fishers.

Fungi of Australia: Inocybaceae
P. Brandon Matheny and Neale L. Bougher

The family Inocybaceae are a diverse cosmopolitan group of gilled fungi. Until now, only a small number of species had been described from Australia, but with this major revision a total of 137 species are recognized, of which 101 are new to science. Ninety percent of these species (121 of the 137) are found only in Australia.

This authoritative account provides a major advance in knowledge for this diverse and widespread group with detailed descriptions, identification keys, and phylogenetic trees based on DNA sequences generated during the work. Every species is illustrated with colored plates and/or line drawings of microscopic features.

Fungi of Australia: Inocybaceae is a useful reference for professional and semi-professional mycologists in Australia and around the world.

A Multidisciplinary Introduction to Desalination
Edited by Alireza Bazargan

Although more than 70% of the globe is covered with water, only a small portion is suitable for direct human use, making the scarcity of freshwater one of our planet’s most serious challenges. In this context,
desalination, defined as “the separation of salts from water,” is one of the possible solutions for appeasing our ever-increasing thirst.

By drawing upon the expertise of a remarkable team of international authors, this book provides a simple, encompassing, and “multidisciplinary” introduction to desalination. The particular forte of this publication is its inclusive yet straightforward nature. In other words, the unique assortment of reader-friendly chapters is designed to cover the topic of desalination as a whole, and strike a delicate balance between the technical and non-technical.

Positive Energy Homes
Creating Passive Houses for Better Living
Robin Brimblecombe and Kara Rosemeier

Positive energy homes enable people to live healthy and comfortable lives with energy left over to share. Creating a house you love that produces surplus energy is surprisingly easy with a thorough understanding of how buildings work and careful attention to detail in construction. Positive Energy Homes provides home owners, architects, and builders with an understanding of the principles and technical details of building these houses.

The Passive House standard, with its well-proven track record, forms the basis for creating positive energy homes. This book explores the Passive House “fabric first” approach as well as the science and practicalities of effective ventilation strategies, smart options for heating and cooling, daylight harvesting, and efficient lighting and appliances. Positive Energy Homes offers a guide and inspiration for how positive energy living can be achieved through homes that power themselves and empower their occupants.

Woodland Development
A Long Term Study of Lady Park Wood
George Peterken and Edward Mountford

Lady Park Wood was set aside as a “natural” reserve for ecological research in 1944, and the trees, shrubs and ground vegetation have been recorded in detail ever since. These 70 years of observations now represent one of the largest and most detailed records in Europe of how a woodland develops under the influence of natural factors. This book is an invaluable read for researchers and professionals in nature conservation, ecological research, and forestry.

Social Science and Sustainability
Edited by Heinz Schandl and Iain Walker

Social Science and Sustainability draws on the wide-ranging experience of CSIRO’s social scientists in the sustainability policy domain. These researchers have extensive experience in addressing complex issues of society–nature relationships, usually in interdisciplinary collaboration with natural scientists. This book describes some of the evidence-based concepts, frameworks, and methodologies they have developed, which may guide a transition to sustainability.

Contributions range from exploring ways to enhance livelihoods and alleviate poverty to examining Australians’ responses to climate change, to discussing sociological perspectives on sustainability, and how to make policy relevant.

Securing Australia’s Future
Harnessing Interdisciplinary Research for Innovation and Prosperity
Simon Torok and Paul Holper

Recognizing rapid changes in the global economy, environment and policy, the Australian Government engaged the Australian Council of Learned Academies (ACOLA) to undertake detailed interdisciplinary research to help guide Australian thinking and policy decisions.

(continued overleaf)
Dozens of Australia’s finest minds assessed the opportunities available globally and domestically, charting a course for the future. The resulting findings can prepare Australia to address the challenges ahead and make the most of the opportunities.

Securing Australia’s Future synthesizes the major themes that emerge from ACOLA’s reports. The chapters examine Australia’s strengths, education, productivity and innovation, engagement with Asia, energy, and the environment. Each chapter includes key findings designed to optimize Australia’s prosperity and place in the region.

The future is a long game but its base must be built now. This book provides a vision for the nation, for its politicians, public servants, and industry leaders—a sound footing for securing Australia’s future.

INTERNATIONAL DEVELOPMENT

A Bucket of Water
Reflections on Sustainable Rural Development
Kanayo F. Nwanze
Foreword by Gordon R. Conway

The Sustainable Development Goals, which were adopted by 193 countries in 2015, set clear targets for ending hunger and undernutrition as well as tackling poverty, inequality, and the impact of climate change by the year 2030. The vision they represent is an inclusive one in which no one is left behind. It is also a collective one in which the environment must be protected for the benefit of all. The Goals will undoubtedly take billions of dollars to achieve, but they will also take the time, effort, and work of a critical group—rural people.

Drawing on decades of hands-on experience in agricultural research and rural development, Dr. Nwanze shows that any genuine effort to achieve sustainable development will fail if it does not include small-scale producers. He also communicates the reasons behind his heartfelt belief in the potential of these farmers. A Bucket of Water reflects on the work of the International Fund for Agricultural Development (IFAD) in tackling challenging issues in rural development and provides an accessible discussion of themes such as peace and development, the cost of inaction, engaging young people in farming, women’s contribution, farming as a business, and technology and research.

This book should be read by anyone studying rural and agricultural development in the context of international development or concerned about poverty and hunger.

Bringing Forth Prosperity - Capacity Innovation in Africa
Benjamin Bobo

Capacity innovation is the key to Africa’s transformation—with the appropriate catalysts—and innovation and transformation are but a matter of time in gestation. The first of two major catalysts necessary to prompting this change came at the adoption of the New Partnership for Africa’s Development. It is one of the most profound collaborations of African Heads of State. The second catalyst is proposed in this work in the form of the multinational corporation as change agent for the innovation process working in alliance with NEPAD as Africa’s spokesperson for innovation. The policy framework for African capacity innovation is the material product along with discourse for redress of corruption and security policy narrative for protecting the assets of multinational corporations.

Building Agricultural Extension Capacity in Post-Conflict Settings
Case Studies
Edited by Paul McNamara and Austen Moore
This book (a) investigates the experiences and issues involved with rebuilding extension systems (including public sector, private sector, and non-governmental organization extension) in post-conflict settings, (b) evaluates the impact of different extension policy approaches and practice in such settings, and (c) identifies the key elements needed to effectively rebuild agricultural extension systems and programs in post-conflict contexts. The chapters include country-specific case studies that provide a descriptive account and also analyze strategies, successes and failures, and lessons learned. A synthesis chapter examines insights and lessons learned across post-conflict settings, and identifies the elements and investments needed to rebuild extension systems and programs in these contexts. 248 pp, 6 1/4“ x 9 1/2”

Civil Society Organizations in Turbulent Times
A Gilded Web?
Edited by Linda Milbourne and Ursula Murray
Why have civil society organizations become trapped in a gilded web of privatized, neo-liberal arrangements, reinforcing the systems they were established to reform? Drawing on research from diverse fields, this book will reawaken the critical voices that could challenge the growing inequalities and failures of current social systems. 224 pp, 6 1/4“ x 9 1/2”
Paper, Jul 2017, 978 1 85856 815 7, $42.95 (S5)

Gender and Rural Globalization
International Perspectives on Gender and Rural Development
Edited by Bettina Bock and Sally Shortall
This book explores how rural gender relations are changing in a globalizing world and how they fundamentally impact the structure of agricultural life in rural areas and urban-rural relations. It analyzes the development of rural gender relations in specific places around the world and looks into the effects of the increasing connectivity and mobility of people across places. The themes covered are: gender and mobility, gender and agriculture, gender and rural politics, rurality and gender identity, and women and international development. Each theme has an overview of the state of the art in that specific thematic area and integrates relevant case studies. 344 pp, 6 1/4“ x 9 1/2”
Cloth, October 2017, 978 1 78064 625 1, $160.00 (S6)

Decentralized Governance of Adaptation to Climate Change in Africa
Edited by E. Friis-Hansen
Based on fieldwork carried out in Uganda, Zambia, Tanzania and Ghana, this book shows how local governance institutions change the ways that they work as they engage with climate change adaptation initiatives and how the tendency to centralize power and finance at a national level reduces the effectiveness and efficiency of real change on the ground.

The evidence of these studies is that central government and international projects are neither cost effective nor institutionally sustainable; what is needed is devolution of power and resources to the local level. It’s time to turn the old mantra on its head — to think globally but act locally.
160 pp, 6 1/4“ x 9 1/2”
Cloth, August 2017, 978 1 78639 076 9, $140.00 (S6)
Indigenous Knowledge
Enhancing its Contribution to Natural Resources Management
Edited by Paul Sillitoe
Incorporating indigenous knowledge (IK) is crucial to effective development. This global research-level book on IK and natural resources management addresses cutting edge issues relating to soil management and land degradation, weed and pest control, crop breeding and yields, agro-biodiversity conservation, food production and marketing, climate change adaptation, forest use and agroforestry. It also includes discussion of methodological issues such as IK's integration into agricultural science and technology, technology innovation and adoption, systematic approaches to local management, integration of social and ecological processes, participatory methods and “citizen” science, use of videos, the role of international agencies, power dynamics and gender issues.
272 pp, 6 ¾” x 9 ¾”
Cloth, November 2017, 978 1 78064 705 0, $160.00 (S6)

Shifting Cultivation Policies
Balancing Environmental and Social Sustainability
Edited by M. Cairns
Shifting cultivation supports as many as 300 million people in the Asia-Pacific region alone, but governments often regard it as a primitive and inefficient form of agriculture that destroys forests, causes soil erosion and robs lowland areas of water. These negative perceptions are not supported by research, yet they have been used as a pretext for acts verging on genocide.

We must urgently challenge these misconceptions and consider the policy implications. Supported and encouraged, swidden farming has the potential to play a major role in carbon sequestration and conservation of land and biodiversity, as well as retaining a cultural heritage of many thousands of years. This comprehensive analysis of past and present policy highlights successes and failures and emphasizes the importance of getting it right for the future.
1060 pp, 6 ¾” x 9 ¾”
Cloth, October 2017, 978 1 78639 179 7, $65.00 (S6)

Poor People’s Energy Outlook 2017

This edition is the second in a new suite of three PPEOs. It takes the Total Energy Access framework developed in previous editions and illustrates how it can be operationalized in terms of planning, energy planning (2016), financing (2017), and delivering at scale (2018).
90 pp, 6 ¼” x 9 ¼”
Paper, September 2017, 978 1 85339 983 1, $25.95 (S5)

HISTORY

Argentina Under the Kirchners
The Legacy of Left Populism
Marcela Lopez Levy
In 2003, Néstor Kirchner took power in a country still reeling from financial meltdown. He set out to reverse the extreme neo-liberal policies of the 1990s and ruled through heady years of unprecedented economic growth. Néstor was one half of a political couple. His wife Cristina Fernández de Kirchner won the race for the top job in 2007, and they swapped roles. In 2011, she was voted in for a second term with the highest support ever obtained in a presidential election. And yet in 2015, she was voted out on vague promises of “change.”

During the Kirchners’ administrations, inequality had fallen, per capita income had nearly doubled, the economy had grown as never before – so what did people want to change? Why did they vote for the first ever democratically elected right-wing government? How was society torn apart into two vitriolic and equal opposing halves?

The legacy of Kirchnerism offers key lessons for progressive politics everywhere and points to the challenges of taking on resurgent conservative forces in Argentina and around the world.

Paper, May 2017, 978 1 909014 05 3, $15.95 (S5)
The Hawkesbury River
A Social and Natural History
Paul Boon
The Hawkesbury River is the longest coastal river in New South Wales. A vital source of water and food, it has a long Aboriginal history and was critical for the survival of the early British colony at Sydney. The Hawkesbury’s weathered shores, cliffs, and fertile plains have inspired generations of artists. It is surrounded by an unparalleled mosaic of national parks, including the second-oldest national park in Australia, Ku-ring-gai National Park.

Until now, the Hawkesbury has lacked an up-to-date and comprehensive book describing how and when the river formed, how it functions ecologically, how it has influenced humans and their patterns of settlement, and, in turn, how it has been affected by those settlements and their people. With chapters on the geography, geology, hydrology, and ecology of the river and discussions of its use by Aboriginal and European people and its role in transport, defense, and culture, this highly readable and richly illustrated book paints a picture of a landscape worthy of protection and conservation.

PSYCHOLOGY

Above the Ground and Beneath the Clouds
Schizophrenia in Lacanian Psychoanalysis
Yannis Grammatopoulos
Above the Ground and Beneath the Clouds examines the history, conceptualization, and treatment of the psychotic sub-type of schizophrenia as it is advocated by psychoanalysis of Lacanian orientation, which is contrasted to modern psychiatry. The book's main focus is the status of the schizophrenic body and language. The ways in which these concepts can be of theoretical and clinical use in contemporary clinical settings are examined throughout.

The book consists of three parts. The first part comprises the theoretical investigation of schizophrenia in early 20th century psychiatry and in the theory and teaching of Freud, Lacan, and other influential psychoanalysts. The second part presents the fascinating case of the late 19th century Greek writer Georgios Vizyenos, who invented an extraordinary way to anchor the body before his admission to a psychiatric institution in 1896. The third part discusses the implications of those findings for the contemporary psychoanalytic diagnosis and treatment of schizophrenia.

The Access to Subjectivity
Phenomenology, Buddhism, and Psychotherapy
Cesar Ojeda
This book explores the conceptual and practical connections that exist between phenomenology, Buddhism, and psychotherapy. These three disciplines clearly have completely different origins, histories, conceptualizations and academic environments and, at first blush, there seems to be no real bond between them. However, this book shows that there are connections between these diverse approaches, but they have the peculiar character of being latent and hidden. Thus, phenomenology and the practice of mindfulness share a similar, though perhaps not explicit, goal: to exclude the ego. Notwithstanding this connection, they approach this task from quite separate roads, each of which conceals this implicit goal, giving the impression that both disciplines are irreducible and disconnected, as if they were completely distinct and closed systems.

Analysing Patients with Traumas
Separation, Illness, Violence
Franziska Henningsen
This book focuses on detailed case histories of patients with severe traumas. Franziska Henningsen takes us through the successive stages of analysis and provides a graphic impression of the progress of her diagnostic and therapeutic insights into traumatic processes and their treatment. Her main interest is in the development of the transference/countertransference relationship. Traumatic experience has to be actualized within that relationship if it is to be treated successfully. Only in this way can therapeutic change become a feasible proposition. Traumatic micro-processes and trauma-sequel phenomena in transference and countertransference are described and conceptualized. Henningsen demonstrates her point with examples taken from clinical practice: illnesses experienced as traumatic; separation traumas; childhood experiences of violence; adult experiences of violence; and war, torture, and displacement that can engender PTSD. This book is a genuinely original contribution to psychoanalytic treatment of traumas.

Paper, August 2017, 978 1 78220 335 3, $49.95 (S5)

Anxiously Attached
Understanding and Working with Preoccupied Attachment
Edited by Linda Cundy
Anxiously attached individuals feel chronically insecure and their relationships are often intense, angry, and enmeshed. In the spectrum of anxious attachment, some people tip into states of acute rumination following specific life events, while an extreme manifestation may be thought of as “borderline borderline” – inescapable brooding, raging, and inability to separate. Preoccupied clients can be difficult to work with, and these therapies often feel stuck or end badly.

Anxiously Attached contains four papers presented at a conference in February 2016. They address the origins of anxious attachment in specific features of parent-infant relationships, findings from research about developmental aspects, typical features, concerns, and defenses in adults, and how these may be presented in psychotherapy. Enmeshed dynamics in adult relationships, including the therapeutic relationship, are also highlighted, where threat of separation and loss activate intense attachment seeking.

Bion in Buenos Aires
Seminars, Case Presentation and Supervision
Wilfred R. Bion
Edited by Aguayo, de Cortinas and Regeczkey
These newly discovered clinical seminars of Wilfred Bion, which include supervisions, personal case presentations, and lectures on psychoanalytic theory, represent his initial
foray into many years of work that have inspired South American analysts for nearly a half a century.

208 pp, 6" x 9"
Paper, November 2017, 978 1 78220 520 3, $53.95 (S5)

A Bridge Over Troubled Water
Conflicts and Reconciliation in Groups and Society
Edited by Gila Ofer
In a world dominated by conflicts that rapidly turn into wars, this book presents a multifaceted perspective on conflicts and their resolution that is applicable to individuals, groups and society.

The writers represent different countries and cultures, focusing on problems that are endemic to their own localities that yet have a wider and deeper resonance. We are introduced to conflict and division in Bedouin society, the Roma people living in Greece, citizens’ reflective communities in Serbia, continuing territorial and ideological differences in Israel and the middle-east, and tensions of difference in the psychoanalytic community itself.

The book throws light on some of society’s most intractable problems, generating compassion and understanding in place of hatred and division. If we have mostly become wary of hope and optimism in an embattled world, the message that reconciliation and forgiveness are possible, and that there are practical steps to achieving this, rather than idle dreams, makes this an important book with relevance to all those trying to make sense of present times and finding their role as responsible citizens.

240 pp, 6" x 9"
Paper, August 2017, 978 1 78220 577 7, $43.95 (S5)

The Clinical Paradigms of Melanie Klein and Donald Winnicott
Comparisons and Dialogues
Jan Abram and R. D. Hinselwood
The book:
• introduces the distinctive psychoanalytic basic principles of both Melanie Klein and Donald Winnicott;
• compares and contrasts the way in which their concepts evolved; and
• shows how their different approaches contribute to distinctive psychoanalytic paradigms.

An essential read for those new to psychoanalytic ideas, this book also offers an introduction to both of these schools of British Object Relations psychoanalysis for experienced psychoanalysts who wish to develop an understanding of how the conceptualizations of these two schools might be compared and contrasted.

Paper, November 2017, 978 1 78220 310 0, $40.95 (S5)

Clinical Dialogues on Psychoanalysis with Families and Couples
Edited by David E. Scharff and Monica Vorchheimer
This book widens the scope of clinical and theoretical contributions on Couple and Family Psychoanalysis by collecting case presentations and discussions by analysts from Europe, North America, Latin America, China, and Australia. The rich cross-fertilization across countries and analytic orientations stimulates cross-cultural thinking and deepens clinical exploration.

Coaching in Islamic Culture
The Principles and Practice of Ershad
Christian van Nieuwerburgh and Raja’a Yousif Allaho
This book is the result of a collaboration between two authors who share a passion and commitment for coaching. Its aim is to enthuse readers and provide guidance about the appropriate use of coaching within Islamic culture. This book provides a culturally relevant coaching framework for use in Islamic context, which allows Muslims to develop in ways that are aligned with their faith and traditions.

The complete coaching framework presented here is called Ershad.

Paper, August 2017, 978 1 78220 199 1, $40.95 (S5)
Confusion of Tongues
A Return to Sandor Ferenczi
Miguel Gutierrez-Pelaez
Sandor Ferenczi, Sigmund Freud’s brilliant pupil as well as an innovative psychoanalyst, was silenced by various generations of his contemporaries until, in the past decades, his work began to be rediscovered. Certain aspects of his trauma theory, in fact, had never been thoroughly addressed, particularly the connection he made between trauma and language.

Miguel Gutiérrez-Peláez offers a new reading of Ferenczi by proposing a dialogue between the Hungarian psychoanalyst’s work, philosophy, and contemporary psychoanalysis. Among the subjects covered, the book delves into the vulnerability of children and Ferenczi’s never-ending search for a cure, the complex issue of war trauma and, more specifically, his anticipatory work in understanding the effects on the human psyche of the horrific experiences in concentration camps during World War II. These issues are raised against the backdrop of captivating figures like Jacques Lacan, Emmanuel Lévinas, Giorgio Agamben, Derrida, Nietzsche, and Primo Levi, among others. The result is a unique insight into Ferenczi’s “confusion of tongues,” a novel concept that can help us to understand contemporary trauma.

Consulting to Chaos
An Approach to Patient-Centred Reflective Practice
Edited by John Gordon, Gabriel Kirtchuk, Maggie McAllister, and David Reiss
In clinical work, an awareness of patients’ subjective experiences, particularly their perceptions of interpersonal relationships, is indispensable. This book seeks to improve care and treatment planning by describing a structured approach to eliciting patients’ core relationship patterns. These patterns consist of the roles and scenarios into which they repeatedly cast themselves and others with whom they interact. Maladaptive patterns, in which vicious cycles and self-fulfilling prophecies of misperception, misunderstanding, or provocation escalate, cause pain and havoc in personal relationships and can adversely affect both professionals’ decisions and the overall delivery of treatment. This book shows how to use vital information not often made available to treatment teams in order to understand such potential pitfalls rather than succumb to them.

The Courage to Fight Violence Against Women
A Multidisciplinary Approach
Edited by Paula L. Ellman and Nancy R. Goodman
In this edited book, psychoanalysts show how violence against women can be seen, known, and represented on the world stage and in psychoanalytic treatment. The editors present psychoanalytic ideas and understanding in an effort to comprehend violence against women. Observing the active witnessing of the contributors to this book elucidates the way trauma is transformed into resilience and healing. Scholars and psychoanalysts from Argentina, Mexico, Peru, the United Kingdom, and the United States together address this serious problem along with the consideration of depictions of violence against women in film, art, drama, and poetry. With courage, multiple modalities of intervention become possible. Additionally, psychoanalysts develop psychoanalytic commentary of the presentations, bringing the psychoanalytic mind to the larger arena of the many courageous efforts at fighting violence against women.

Death and the City
On Loss, Mourning, and Melancholia at Work
Susan Kahn
Organizations can face many different endings – sharp and brutal, premature, or carefully planned and premeditated – all have emotional collateral damage. We are working in an environment where crises, failure, and demise are everyday features. Closure, merger, downsizing, redundancy, liquidation, insolvency, administration – this is the dialect of organizational life in a recession driven economy. Such vulnerability at work creates challenges for decision making, operational and communication delivery, as well as the loss and suffering of individuals involved.

Death and the City provides an in-depth portrait of an organization in a palliative state. It transports the analytic concepts of mourning and melancholia and of the death drive into the workplace, and brings this important but under-explored, stream of psychoanalytic thought to the fore as a means of interrogating and further understanding organizational life.

Engaging Infants
Embodied Communication in Short-Term Infant-Parent Therapy
Frances Thomson-Salo
The book begins by describing, within a psychodynamic approach, some traits an infant may bring to an intervention, followed by descriptions of interventions in several specialized perinatal settings.

Several chapters focus on parent-infant families who have experienced considerable anxiety and depression, and those who have experienced trauma and lived borderline experiences or mental illness.

Infant-parent therapy in pediatric contexts, infants in groups, and relating to infant and parents in the context of family violence are briefly described. Interventions where something seemed missed are detailed to guide thinking about how a therapist listens to counter-transference and to guide in intervening. The book concludes with the importance of what therapist factors such as authenticity and playfulness in the therapist-patient relationship contribute to the therapeutic alliance, including an infant’s alliance and transformational moments, as well as the transference that infants develop to a therapist, and review of factors contributing to this approach being effective.

Essential Ingredients of Counselling and Psychotherapy with Children and Young People
Gary Winship and Shelley G. MacDonald
The book is targeted at practitioners working with children and young people and will make essential reading for anyone undertaking training in the helping professions where the elements of psychotherapy and counseling are requisite to practice.

Psychotherapy with children and young people has traditionally routed practitioners in psychoanalytic theory. Essential Ingredients pays heed to this lineage with fresh perspectives on the ingredients in practice that will help tackle the impediment to flourishing in children.

Faces of the Freudian I
The Place of the Ego in Psychoanalysis
Mikkel Reher-Langberg
In this book, Reher-Langberg undertakes a systematic analysis of the notion of the Ego, such as it evolves throughout the writings of Sigmund Freud. This is done in close readings of central works, representing the different phases in the development of Freud’s thinking, from the “Studies on Hysteria” to “The Ego and the Id.”

In weaving together a consistent narrative of Freud’s thought around the notion of the Ego, and pointing out a constancy of perspectives amidst theoretical developments, Reher-Langberg’s book offers the reader a key to navigating the complexity of Freud’s thinking. Presenting a chronologically broad, yet philosophically precise, survey of Freud’s writings, the book also offers a focused introduction to Freud’s work, of interest to Freud scholars both within and outside the clinical field.

The Hidden Language
Fairy Tales and the Social Unconscious
Ravit Raufman and Haim Weinberg
The book combines two main perspectives: the study of the social unconscious and the study of fairy tales. Examining different versions of fairy tales told by different ethnic communities teaches us about the relations between universal and local/cultural aspects of the social unconscious. Exploring the unique status of fairy tales as located on the border line between concrete/somatic and abstract/linguistic realms sheds light on different levels of the human mind.

The book focuses on a specific phenomenon common in fairy tales: a realization of idiomatic expressions—a phenomenon in which an abstract/mental idea is hidden behind a concrete event embedded in the plot. Deciphering the abstract idea out of the pictorial world of the fairy tale enables one to understand the stories in a way which is otherwise unavailable. The book suggests interdisciplinary examination, reminding us of the rich, deep messages hidden in fairy tales and connecting us to early developments in the field of psychoanalysis, by suggesting new interpretation of old, ancient material.

The Fictions of Dreams
Dreams, Literature, and Writing
Otto M. Rheinschmidt
The Fictions of Dreams explores the close connection between the narrative nature of dreams and the narrative devices employed in literature and creative writing. The book is unique in its confluent approach, linking the fictions of dreams with literary fictions and case studies which illuminate the centrality of dream analysis in therapeutic work.

The interconnected worlds of dreaming and fiction writing tend to employ the same narrative devices: the memorial mode (Patrick Modiano), multi-temporality (Gabriel Garcia Marquez), poeisis (Kafka, Ted Hughes, Colm Toibin), historical consciousness (Irene Némirovsky), and “infinite connectivity” (Patrick White).

The theories employed are psychoanalysis, literary criticism, quantum physics, chaos theory, sleep research, the study of historical consciousness, theories of the ancient dreamers (Artemidorus, Aristotle), and theories of the social nature of dreaming. Case studies, actual dream fictions, will be used to illuminate the dream theories presented.

Paper, Now Available, 978 1 78220 420 6, $46.95 (S5)

Freud
The Unconscious and World Affairs
Rene Major and Chantal Talagrand
This book sheds a new light on Freud, who from the beginning was aware that the psychoanalytic edifice he was constructing – which revealed in each individual an “ego not master in its own house” – had clear implications for understanding collective human behavior, including religion, morality, and civilization.

The authors’ political focus is unusual, and their choice of quotes from lesser-known sources holds great interest. Freud's
interlocutors include Oskar Pfisrer, the Swiss pastor and lay analyst; Einstein; and the American diplomat William Bullitt, with whom Freud wrote a study of President Wilson, entitled Thomas Widrow Wilson: A Psychological Study.

René Major and Chantal Talagrand present psychoanalysis itself as political. What is at stake is liberation from all forms of bondage of the self, the other and the world. While focusing on the uniqueness of inner life, Freud never lost sight of humanity as a whole. By highlighting Freud’s involvement in the political realities of his era, this book draws attention to the inextricable link between psychoanalytic and sociopolitical perspectives. In other words, it includes psychoanalysis in the urgent affairs of the world.

From Anxiety to Zoolander
Notes on Psychoanalysis
Anouchka Grose

From Anxiety to Zoolander: Notes on Psychoanalysis is a collection of 20 essays on psychoanalytic themes. Written in an accessible style, it is readable by a total newcomer to the subject while also being relevant to clinicians, trainees, patients, and students from different disciplines. While many of the essays focus on clinical questions, they also speak about art, comedy, fashion, fame, and fiction. Freud and Lacan are central points of reference, but the book as a whole is far from doctrinaire, with all areas of psychoanalytic theory being up for discussion.

Clinical topics include acting out, narcissism, gender, transference, diagnosis, and the Oedipus complex, tracing the ideas through Freud and the post-Freudians and examining their relevance to the contemporary psychoanalytic clinic. Non-clinical topics include Louise Bourgeois’ notes on her analysis, the phenomenon of stand-up comedy and the humiliation of the audience, Paris Hilton’s televised friendship auditions, and Ben Stiller’s comic masculinity in “Zoolander.”

While each essay is self-contained, the book overall argues for the continued relevance of Freudian ideas in the treatment of psychic suffering, as well as in the interpretation of social and cultural phenomena.

The Greening of Psychoanalysis
André Green’s New Paradigm in Contemporary Theory and Practice
Edited by Rosine J. Perelberg and Gregorio Kohon

The influence of André Green on psychoanalysis has been immeasurable. His theoretical, clinical, and cultural contributions have identified him as one of the most important psychoanalytic thinkers of our times. The present book brings together a group of eminent psychoanalysts from different parts of the world, all of whom presented the Papers included in this volume at the 2015 Conference on The Greening of Psychoanalysis. Every one of these texts conveys a rich sense of continuing a conversation, always creative, albeit challenging, forever engaging and fruitful, with André Green. This book is an invitation to the reader to join in.

Group Analysis in the Land of Milk and Honey
Edited by Robi Friedman and Yael Doron

Group Analysis in the Land of Milk and Honey is a collection of beautifully written clinical essays by group analysts in Israel — a society which suffers from chronic war and violence. Israeli group conductors share their experience and their special skills concerning the reflection of terror and existential anxiety in their group- analytic therapy groups.

The topics range from the influence of society on the individual, the nature of the “group”, combined individual and group therapy, groups with mentally ill and elderly patients, and coping with aggressive patients and the self-destructive processes that are ubiquitous in a society threatened with extinction. These group analysts discuss breaking of boundaries, “democracy in action”, leadership, paternalism and fanatic identifications. The special place of Shoah survivors and of Arab and Jewish conflict make this book unique. The book conveys (continued overleaf)
both the trauma and the creativity of Israeli society.

**Handbook of Narrative Psychotherapy for Children, Adults, and Families**

Theory and Practice

Jan Olthof

The Handbook of Narrative Psychotherapy for Children, Adults and Families combines philosophical, scientific and theoretical insights in the field of narrative psychotherapy and links them to sources of inspiration such as poetry, film, literature and art under the common denominator “narrative thinking.”

Sections on theoretical issues alternate with a large number of case histories drawn from different therapeutic contexts. The reader can browse at will through the many examples of therapeutic sessions, in some cases including literal transcriptions, in which narrativity in all its forms is the point of departure. What language does the body speak? What messages do seemingly random slips of the tongue convey? How can a painting help a client to find words for his or her story?

**Help Your Group Thrive**

A Workbook and Planning Guide

Ann Steiner

This easy-to-use manual is recommended for leaders of all types of groups – discussion groups, peer support, organizations, and workplace teams. You’ll find discussion of the different types of groups, leadership styles and roles.

Worksheets help you figure out your preferred leadership style, along with facilitation tools, sample group agreements, online netiquette information, and numerous modifiable written forms for starting and maintaining effective groups.

Practical advice and worksheets help you design your group, select potential members, and understand common group challenges. These valuable tools will take you from defining your group’s mission to helping your group thrive.

**Holistic Therapy for People with Dissociative Identity Disorder**

Edited by Patricia Frankish and Valerie Sinason

This book puts forward a model of therapy and support for people with DID that provides individual therapy, staff support, and a safe place to live. It relies upon the ideas of Bowlby by providing a secure base and recognizes the attachment needs. It also includes staff who are trained to provide a therapeutic environment and also receive support to do their work. The fourth element after the base, the staff, and the training, is the individual therapy. Together it has been possible to adopt a holistic approach which leads to a significant improvement in quality of life for individuals with DID and confidence for commissioners and teams in the approach. By including the perspective of all the players and presenting a practical model for successful working, the book will be invaluable to anyone looking to commission or provide services for this client group.

**Identity, Narcissism, and the Other**

Jean Arundale

Practitioners of psychoanalysis find three central themes to be recurrent and ubiquitous in every analysis: issues around identity, the struggle to know the self, to understand the self and to be the self in an authentic way. Intricately entangled with self-identity is the problem of narcissism, essentially viewed as a defensive retreat to a mental state characterized by an unconscious belief in the special value of the self and the diminution of the other. The motive for seeking psychoanalytic treatment is often to improve the quality of relationships with the other, which is clearly jeopardized by
narcissistic states; the person undergoing psychoanalysis might hope to re-discover a resilient self and a sense of personal identity, and to overcome narcissism sufficiently to be able to form relationships.

However, there are a multitude of inherent anxieties involved in close and intimate relationships. As Freud pointed out, even in our most intimate relationships there is an element of hostility. Threats to both the self and other, and various anxieties around libidinal contact, will be examined in this book using case material, and the relationship between these three important themes, identity, narcissism and the other, separate but interconnected, will be explored. It will be proposed that the key to relating to the other is empathy: entering into the mind of the other to experience what it is to be them; to move around their internal world, feeling, observing, thinking, connecting, identifying with the other’s objects and experiencing with empathic understanding the otherness of the person.

An Integrated Approach to Short-Term Dynamic Interpersonal Psychotherapy
A Clinician’s Guide
Joan Haliburn
Short-term dynamic interpersonal psychotherapy is an integrated, trauma-informed, contemporary, dynamic way of working with a range of mental health difficulties. Flexible though structured, phase-oriented, focussed and time-limited, it is informed by the Conversational Model, Attachment and Interpersonal Theories and Brief Psychodynamic Psychotherapies, which are briefly described. It provides clinicians with a way of working with patients whose difficulties do not warrant long term therapy, who prefer a talking therapy or who have failed cognitive/behavior therapies.

The book also covers the use of short-term dynamic interpersonal psychotherapy in issues of grief and bereavement; difficulties arising from life-changing medical diagnosis; relational and functional difficulties resulting from chronic major mental illness; and emergency psychiatry where patients present with disturbances which require prompt, empathic connection and assessment in order to maintain continuity of care.

Key Concepts of Lacanian Psychoanalysis
REISSUED EDITION
Edited by Dany Nobus
In this classic work, eight crucial Lacanian ideas are explained through detailed exploration of the theoretical and/or practical context in which Lacan introduced them, the way in which they developed throughout his works, and the questions they were designed to answer. The book does not presuppose any familiarity with Lacanian theory on the part of the reader nor a prior acquaintance with Lacan’s Écrits or seminars. Originally published in 1998, the ideas within are more relevant than ever, and this newly reissued volume will prove invaluable to today’s scholars of Lacanian thought.

248 pp, 6” x 9”
Paper, Now Available, 978 1 85575 702 8, $40.95 (S5)
The Lacan Tradition
Edited by Lionel Bailly, David Lichtenstein, and Sham Ambiavagar

The Lacanian tradition is unique among psychoanalytic schools in its influence upon academic fields such as literature, philosophy, and cultural and critical studies.

This volume highlights the clinical usefulness of such concepts as the paternal metaphor, the formula of fantasy, the psychic structure, the central role of desire, and the interlinking of the individual subject in the matrix of the Other. While these themes are woven through all the Papers, each is a highly individual reflection upon some aspect of Lacanian theory, practice, or history.

It is the editor’s hope that these pages will open the reader’s eyes to the fertility and importance of the Lacan tradition and bring it closer into the fold of psychoanalytic thought.

Lacanian Psychoanalysis with Babies, Children, and Adolescents
Further Notes on the Child
Edited by Carol Owens and Stephanie Farrelly Quinn

Lacan did not say or write very much about the psychoanalysis of children. There is no doctrine of the psychoanalysis of children in his work. Instead, his 1956-1957 seminar on “the object relation” and his “Note on the Child” of 1969 have been adopted by Lacanian analysts working with children as providing essential coordinates for direction in their clinical work. This book is the result of inviting psychoanalysts of the Lacanian orientation working with children around the globe to theorize and conceptualize that work.

Contributors articulate these precise particularities of the direction of the treatment and psychoanalytic work with children. Contributions consider and explore the effects of new technologies, biomedicine, and the discourses of global capitalism and neo-liberalism upon the constitution of new child subjectivities and their correlative psychopathologies; inventions and reinventions of the role and function of the “father,” the scope and value of differential diagnosis; the child as “symptom” in and of “the system,” and ultimately, guidelines for a specifically Lacanian direction of the treatment with children.

Larger than Life
Six Women and their Battle with Obesity as seen through the Eyes of a Dramatherapist
Katerina Couroucli-Robertson and Ian Robertson

Larger Than Life describes a dramatherapeutic intervention of 12 sessions in which six women take part. The reader is taken behind the scenes and experiences what it means to be overweight or obese—the despair and depression that can result from failed attempts to become slim as well as the satisfaction and joy that can come from effective therapy.

The book begins with a discussion on the issue of obesity, attitudes toward large women through the ages, current ways of dealing with the problem, and why psychotherapy might be an effective method of treatment. The six participants are then introduced in the form of an initial interview, in which readers find out about their attitudes toward food and eating and the problems they face in their everyday lives. This is followed by a discussion of dramatherapy and why it might be an effective means of treating eating disorders. Then, the 12 sessions are transcribed, including much of the dialogue that takes place, together with an explanation of the activities and a commentary on the progress made by the participants. In an interview at the end of the intervention, the participants talk about the group and what they gained from it. The therapist then summarizes what she considers was achieved. Finally, in brief telephone conversations that take place three years later, the possible long-term effects of the intervention are discussed with the participants.

Lost Goddesses
A Kaleidoscope on Porn
Giorgio Tricarico
Porn is a complex symbol of our current world and a shining example of the “Shadow” of the Western culture. While many books essentially show its negative sides, the risks of addiction, the danger of damaging the relationship between sexes, and so on, this work focuses on porn as a phenomenon of our times, exploring its several colors and trying to capture its inner logic and essence.

Despite its pervasive ubiquity on the internet and in the lives of many, porn is apparently the ultimate taboo in the consulting room. In fact, very rarely does a patient mention something detailed about his or her use of porn.

This work aims at deepening some aspects of internet pornography from the perspective of Analytical Psychology, seeing it as symbol of the complexity of the human psyche, emerged in a specific moment of the history of consciousness. Porn is put in relation with technology, with consumerism, with our neglecting the body, with the dictatorship of the image, with the individual and the collective shadow, and with the unconscious nostalgia of the sacred and the divine. Lost Goddesses is not only addressed to psychotherapists but to anyone interested in understanding porn as a phenomenon of the society of technology, its inner logic, and its multiple layers and connections.

The Marks of a Psychoanalysis
Luis Izcoovich
Is someone radically different after an analysis? Since Freud, psychoanalysis has been questioned about what the psychoanalytic experience can change in someone’s life beyond shedding light on symptoms. Drawing on literature, philosophy, and a range of psychoanalytic theorists and practitioners, Luis Izcoovich addresses the effects of psychoanalysis on the individual who has the desire and the courage to enter an analytic treatment and take it to its endpoint. The subject bears the marks of his childhood, and these have repercussions on the choices that he makes in life. Do these marks determine him, or does he have a choice in making his destiny? How do the transformations brought about in the transference change the subject? And does the analysis leave a distinguishing and locatable mark? Luis Izcoovich attempts to answer these questions from a Lacanian perspective.

Mindbrain, Psychoanalytic Institutions and Psychoanalysts
A New Metapsychology Consistent with Neuroscience
Antonio Imbasciati
In this book, the author criticizes the isolationism of traditional psychoanalytic associations compared to those of other branches of psychology and their suspicion of neuroscience. Today, effective neuroscience is investigating the unconscious affects, which psychoanalysis has always done with different methods and a different language. In this perspective, the author points out how Freud’s energy-drive theory,
although contradicted by scientific progress, has continued to characterize, almost like a *monstre sacré*, a religiousness underpinning the spirit of psychoanalytic institutions: the icon of Freud. This spirit is accompanied by confusion between different psychoanalytic theories which are often incompatible with one another. The author blames the poor social image that psychoanalysis has earned in the past few years on this confusion of theories and haughty withdrawal into a single presumed orthodoxy.

**Obsessions**

The Twisted Cruelty
Francesco Bisagni

This book explores the interrelatedness between obsessive compulsive disorders, thinking disorders, and depression. The issue is considered both from a psychiatric viewpoint and from a psychodynamic perspective. The age of the cases presented in the book ranges from childhood through adolescence to adulthood. *Obsessions: The Twisted Cruelty* is a challenging contribution to the contemporary clinical debate, especially regarding the role of analytically-oriented psychotherapy in the treatment of OCD and how to deal with the psychiatric treatment and combine the two approaches while keeping the focus on the transference-countertransference interplay. After the first theoretical chapter, the relationship between obsessions and thinking impairments is discussed with specific reference to delusional ideation. A section entitled “the anal conundrum” follows. Encopresis and anal masturbation during childhood are discussed as well as the identification of the child with a maternal “fecal object.” The last section explores the connection with depression and some specific features of sadism. The author explores the Bionian and post-Bionian perspective on the one hand as well as developments of the post-Jungian theory such as the applications of the complexity theory and the contemporary definitions of complex and archetype. The recent contributions of neuroscience research are also considered.

**Out of This World**

Suicide Examined
Antonia Murphy

The book approaches suicide from the point of view of the suicidal state of mind and is intended to help us understand more about this condition. In its essence, suicide is examined as a largely unconscious, aggressive act having its roots in a perceived or real experience of thwarted childhood needs. The wounds of the suicidal person are often long held and deep. The suicidal person is pursued by haunting losses and the suicidal act comes from deep disturbance created by this and from the idea of death as an acting out of some form of suicidal fantasy. The quasi delusional and split quality of the act is examined — namely that suicide is both an act for and against the self. Consequently a strong case is made for the contribution of psychotherapy to the project of suicide prevention since it is in this...

Psychoanalysis Online 3
The Teleanalytic Setting
Jill Savege Scharff

Psychoanalysis Online 3: The Teleanalytic Setting is a highly topical, continuing conversation on the role of technology in psychoanalysis and its tremendous potential for outreach to patients in the global economy. It describes the essentials of a framework for teleanalysis that is secure in terms both of technology and ethical stance. The technology is a third in the therapeutic alliance, and its impact needs to be analyzed like every other element in the field.

Teleanalysis appears to some people to be a distancing methodology, but the authors report surprising closeness across a distance. Teleanalysis offers a window into the analytic pair’s experience of time, space, deprivation, fantasy, and physicality and shows unconscious dynamics displayed graphically on the image on the screen. The book looks at the convenience and impact of internet use among various communities including LGBTQI in terms of defense against and transition to intimacy and gives clinical evidence of transformation made possible through the therapeutic aspects of technology.

Psychoanalytic, the NHS, and Mental Health Work Today
Edited by Alison Vaspe

Psychoanalytic thinking contributes to effective mental health work on many levels, from Balint’s “Flash” technique in the brief GP/patient encounter to the psychiatric medical and nursing care in secure units, where the most challenging patients need to be held. Starting with the historical contribution of psychoanalysis to the NHS in the 1940s, this book goes on to explore two key psychoanalytic concepts that remain highly relevant to the work of mental health: containment and counter-transference.

The contributors include psychoanalysts, psychotherapists, organizational consultants, consultant psychiatrists, and a leading practitioner in the field of primary care. Between them, they address a wide range of contemporary issues, including the complexity of work with traumatized individuals, including refugees; the wide-ranging psychoanalytic contribution to child and adolescent services; the impact on commissioning of a market culture skewed towards targets and quick wins; and the working conditions that can cause staff to neglect and abuse their patients, and/or become ill themselves. Detailed case vignettes and discussion illustrate the psychoanalytic understanding required, if the NHS is to continue to tackle the complex mental health problems that face our society today.

Psychodynamic Child and Adolescent Psychotherapy
Theories and Methods
Liselotte Grunbaum and Karen Vibeke Mortensen

This book is both a textbook and book of reference for all child and adolescent psychotherapists. It addresses both novices, who need to learn the theories and methods of the work, and also experienced psychotherapists, who want to expand their knowledge, at the same time getting a readily-accessible update and revival of the many ways in which psychodynamic child and adolescent psychotherapy enters into contemporary practice. The book offers a clear, methodologically precise and updated introduction to the theories, methods and practice of the field.

The authors demonstrate through practical examples what psychodynamic child and adolescent psychotherapy is, and how a psychotherapy can be planned and carried out, expounding the necessary preconditions, settings and methods. A personal understanding of the complexity of the therapeutic relationship is presented together (continued overleaf)

**The Marriage of Shamanic And Contemporary Psychology**

**David England**

This book presents the ancient wisdom of shamanic theory and practice in a form which is fit for use within the mainstream of twenty-first century psychotherapeutic endeavor, including an extensive explanation of Shamanic Psychology and a practical description of the ceremonies of the Shamanic Journey and Soul Retrieval.

The book reflects on key aspects of contemporary psychological thinking – infant and adult attachment patterns, developmental trauma, the survival personality, imagination and dreams, the spiritual dimension in psychotherapy and counselling – and in extended discussion relates these subjects to the maps and models of Shamanic Psychology, the practice of Shamanic Journey and Soul Retrieval ceremonies, and the psychotherapeutic application of both.

The resulting marriage of shamanic and contemporary psychology and practice is called “Soulfulness.” A counterpoint to the main text is a reflection on a Russian folktale “The Bold Knight, the Apples of Youth, and the Water of Life,” which both implicitly reflects the shamanic landscape and has a powerful psychological resonance.

Paper, August 2017, 978 1 78220 475 6, $46.95 (S5)
**Staying Attached**
Fathers and Children in Troubled Times
*Gill Gorell Barnes*

This book is about the changing social contexts for fathering since the end of the Second World War and the social moves from patriarchal fatherhood to the multiple ways of doing “dad.” The book questions why fathers have been marginalized by therapists working with children and families. It proposes that theories of psychotherapy, including attachment theory, have failed to sufficiently take fathers’ love for their children and the reality of changing social fatherhoods into account, consequently affecting related practice. Different contemporary family structures and multiple variations of relationship between fathers and children are considered in this book.

Examples are given for thinking about fathers in different relationship transitions, including “non-live-in” fatherhoods, re-entering children’s lives after long absences, fathering following acrimonious divorce, and a range of social fatherhoods. Depression and mental illness are addressed. Work developed with fathers to keep them connected to their children, both in and out of the family court, is described and explored.

**Stepping into Emotionally Focused Couple Therapy**
Key Ingredients of Change
*Lorrie L. Brubacher*

This volume makes Emotionally Focused Couple Therapy (EFCT) widely accessible to therapists of different orientations. It provides clinicians with practical tools, an experiential tour through case examples, and simple exercises to step into EFT. An overview of the change events includes both client processes and therapist interventions moment-to-moment.

**Systemic Desensitisation for Panic and Phobia**
An Introduction for Health Professionals
*Rhona M. Fear*

Panic disorder and phobia are difficulties that are commonly encountered in our consulting rooms. This book puts forward a different method of recovery than covered by the many books that are available on the subject. The author presents this method both as a former patient, and as a therapist of almost 30 years standing. It has been proven to be highly successful.

Having described the common physiological and psychological symptoms of panic disorder and phobia, the author then describes how the professional utilizes this method. Two extended case studies are also presented, one of agoraphobia, the other of driving phobia.
The Tavistock Learning Group
Exploration Outside the Traditional Frame
Clive Hazell and Mark Kiel
In The Tavistock Learning Group, authors Clive Hazell and Mark Kiel attempt to expand the heuristic, theoretical, and applied dimensions of Group Relations paradigms by pairing classical Group Relations concepts with typically non-Tavistock psychology paradigms and social sciences concepts.

Under the broad domain of psychologically-informed constructs, Lacanian psychoanalysis, existential philosophy and bioenergetics are applied.

Under a somewhat broader range of social science conceptualization, the capacity for abstraction is linked with anti-work in groups, the large group is re-imagined as an extension of community dynamics and dysfunction, and the role of symbol systems, symbology and semiotics are examined in relation to sophisticated work groups. Lastly, non-Tavistock models of group development and conceptualization are re-interpreted and explained using a group-as-a-whole framework.

Textbook of Applied Psychoanalysis
Edited by Salman Akhtar and Stuart W. Twemlow
The Textbook of Applied Psychoanalysis is a unique and original contribution to the field of psychoanalysis. Emphasizing and underscoring the need for interdisciplinary discourse in understanding the dialectical relationship between mind and culture, this volume addresses a multiplicity of realms. These include anthropology, religion, philosophy, history, as well as evolutionary psychology, medicine, race, poverty, migration, and prejudice. Dimensions of social praxis such as education, health policy, and cyberpsychology are also addressed.

The enrichment of our understanding of the fine arts and performing arts by the application of psychoanalytic principles and the enhancement of psychoanalysis by bringing such arts to bear upon it also form areas of this book’s concern. This magisterial volume brings distinguished psychoanalysts, philosophers, musicians, poets, businessmen, architects, and movie critics together to create a chorus of modern, anthropologically-informed and culturally sensitive psychoanalysis. Students and teachers of diverse disciplines of humanities, liberal arts, and mental health professions would find this book of immense use.

Thinking Through Fairbairn
Exploring the Object Relations Model of Mind
Graham S. Clarke
Thinking through Fairbairn offers parallel perspectives on Fairbairn’s work. It explores an extended interpretation of his “psychology of dynamic structure” and applies that model to a number of different areas. Fairbairn’s Scottish origins are explored through his relationship with the work of Ian Suttie and Edward Glover.

A new extended object relations model of fantasy and inner reality that reflects Fairbairn’s approach as represented by his contribution to the Controversial Discussions is also developed. In cooperation with Paul Finnegan, this version of Fairbairn’s model is applied to an understanding of multiple personality disorder or dissociative identity disorder. This model is combined with Fairbairn’s theory of art to provide an understanding of some “puzzle” films based in trauma and dissociation.

Fairbairn’s theory is presented here as a synthesis of classical and relational approaches, and his appropriation by relational theorists as a precursor to exclusively relational approaches challenged. The deep structure of Fairbairn’s object relations model is developed through a detailed comparison with Glover’s ego-nuclei model. Fairbairn’s nuanced view of instinct and affect is investigated and some parallels with neuropsychoanalysis developed. Finally some ways that the developed model might be further enhanced to become a general
model are suggested.

**Touching the Real**
Trauma, History, and Psychoanalysis
*Leslie Chapman*

In this book, Leslie Chapman explores the whole notion of trauma and how it can be conceptualized in terms of the Lacanian Real. In the process, he also looks at how trauma is situated within history, both in terms of the individual human subject, and within a wider social historical context.

One of Chapman’s claims is that the histories of such cataclysmic events as the Great War and the Holocaust that focus on their traumatic aspects are in fact attempts to “manage” and “detoxify” their Real and unbearable effects. The same argument is applied to historical abuse, with a particular focus on the Jimmy Savile case. In both situations, argues Chapman, the construction of a “trauma narrative” is used to create a distance between the Real of the trauma and the present day.

**Trauma, Trust, and Memory**
Social Trauma and Reconciliation in Psychoanalysis, Psychotherapy, and Cultural Memory
*Edited by Andreas Hamburger*

Trauma is one of the most important topics discussed throughout the clinical, social and cultural field. Social traumatization, as we meet it in the aftermath of genocide, war and persecution, is targeted at whole groups and thus affects the individual’s immediate holding environment, cutting it off from an important resilience factor; further on, social trauma is implemented in a societal context, thus involving the surrounding society in the traumatic process. Both conditions entail major consequences for the impact and prognosis of the resulting individual posttraumatic disorders as well as for the social and cultural consequences. This volume connects clinical and epidemiological studies on the sequelae of social trauma to reflections from social psychology and the humanities.

Post-war and post-dictatorial societies are in particular marked by the effects of massive, large group traumatization, and if these are not acknowledged, explored, and mourned, the unprocessed cumulative trauma that has become deeply embedded in the collective memory leads to periodical reactivations. To address social trauma, an interdisciplinary approach is required. Psychoanalysis, psychology, and psychiatry describe individual coping and consequences, but society as a whole also has to be studied, where traumatogenic actions such as the persecution of religious, societal, and ethnic groups emerge and continue, and it is society and culture as a whole that has to deal with the historical scars and traces.

**Twenty-First Century Psychoanalysis**
*Thomas Svolos*

If psychoanalysis will survive in the twenty-first century, this book’s wager is that it will be Lacanian psychoanalysis. Today, the survival of psychoanalysis is in question. Even Jacques Lacan himself, at the peak of his influence when psychoanalysis was a dominant discourse, did not believe that psychoanalysis would triumph and merely posed questions about the survival of psychoanalysis, when future subjects would want something else.

This book articulates a possible future for Lacan and psychoanalysis through an exploration of the historical trajectory of psychoanalysis and a survey of the ways Lacanian psychoanalysis offers a unique response to the pressing clinical demands of our time.

Much of the book stages this possible future through explications of the specific ways in which Lacanian concepts have developed as a reading of the clinical and broader psychic and social phenomena of our moment in history. Psychosis, which is an increasing clinical phenomena, and

(continued overleaf)
addiction, which is often described as a contemporary epidemic, are given longer treatment here while other chapters address central concepts such as trauma, fantasy, the symptom, the body, transference, knowledge, and love.

A Web of Sorrow
Mistrust, Jealousy, Lovelessness, Shamelessness, Regret, Hopelessness
Salman Akhtar
Bringing together the experiences of mistrust, jealousy, lack of love, shamelessness, regret, and despair, this short but far-reaching book elucidates human sorrow in striking sociocultural and clinical details.

176 pp, 6” x 9”
Paper, June 2017, 978 1 78220 566 1, $39.95 (S5)

Akhtar: Jefferson College of Medicine

Who’s Behind the Couch?
The Heart and Mind of the Psychoanalyst
Edited by Robert Winer and Kerry L. Malawista
Who’s Behind the Couch?: The Heart and the Mind of the Psychoanalyst explores the analyst’s mind at work, not so much from a theoretical perspective, but rather from the complexities and richness inherent in every moment-to-moment clinical encounter. As analysts we are all continually challenged to find what might work best with a particular patient, but we don’t often hear senior analysts share their personal struggles, feelings, and sensibilities.

While this book will be of interest to practitioners, it should also be of interest to those considering or engaging in treatment. At a time when the relevance of psychoanalysis is challenged, personal reflections of the analyst enrich our understanding of the deep and meaningful relationship that illuminates the depth and vibrancy of psychoanalytic practice today.

384 pp, 6” x 9”
Paper, June 2017, 978 1 78220 072 7, $54.95 (S5)

Your Secret Mind
Getting to Know and Living with Your Unconscious
Hans Steiner and Rebecca Hall
This book will help the reader get to know their unconscious mind through a series of exercises. Results will serve all curious readers well, especially psychotherapists, writers, artists, actors and others working in the world of creativity. It is important for all of us to achieve a deeper understanding of who we are, with the satisfaction that commonly comes with that. Readers will be able to set free their hidden selves to direct their lives in new and satisfying directions.

Humans have a complex unconscious mind, containing vital information about who we are, where we were and where we are going. Sigmund Freud deserves the most credit for pointing systematically to channels of access. Today’s neuroscience has tested these points of access and is suggesting new ones. This book introduces five well-established methods of gaining useful access to our unconscious mind.

272 pp, 6” x 9”
Paper, June 2017, 978 1 78220 495 4, $45.95 (S5)

TOURISM

Conflicts, Religion and Culture in Tourism
Edited by Razaq Raj and Kevin A. Griffin
Conflicts, Religion and Culture in Tourism presents the role which faith plays in cross-cultural conflict resolution and opens dialogue and activism by being responsive to common challenges of peacemaking and coexistence within and among the world’s many traditions. It contains current and diverse empirical research insights on aspects of religious traditions, conflicts and challenges, presented via a range of contemporary case studies, related to ancient, sacred and emerging tourist destinations and new forms of pilgrimage, faith systems and quasi-religious activities. CABI Religious Tourism and Pilgrimage Series

Food and Wine Tourism
Integrating Food, Travel and Territory
SECOND EDITION
Erica Croce and Giovanni Perri
This established textbook explores how regions present themselves to tourists experiencing the culture, history, and ambience of a location through the food and wine they produce. It provides practical suggestions and guidelines for establishing a food-related tourism destination and discusses the environment, understanding the food tourist, supply issues, marketing, and best practice strategies. It includes numerous case studies from around the world and plentiful pedagogical features to aid student learning.

224 pp, 7 1/2” x 9 5/8”
Paper, June 2017, 978 1 78639 127 8, $75.00 (S6)

Managing Outdoor Recreation
Case Studies in the National Parks
SECOND EDITION
Robert E. Manning, Laura E. Anderson, and Peter Pettengill
This fully updated second edition presents a conceptual framework of outdoor recreation management in the form of a series of management matrices. It then illustrates this framework through new and updated case studies in US national parks and concludes with the principles of outdoor recreation management.
Written by a team of authors with extensive academic and practical experience in the field of outdoor recreation, the book:
• Develops and presents a matrix-based framework of strategies and practices for managing outdoor recreation in a sustainable way.
• Illustrates applications of the best management practices through a series of case studies in diverse national parks.
• Includes lecture slides and online matrices to aid the teaching of outdoor recreation management to a new generation.
240 pp, 7 1/2” x 9 5/8”
Cloth, Jul 2017, 978 1 78639 014 1, $140.00 (S6)
Paper, Now Available, 978 1 78639 101 8, $65.00 (S6)

Linking Urban and Rural Tourism
Strategies in Sustainability
Edited by Susan L. Slocum and Carol Kline
Destinations rely on regional strategies to support and enhance the tourism product through regional partnerships and integration. Integrated tourism is defined as tourism that is explicitly linked to the economic, social, cultural, natural, and human structures of the region in which it occurs. Integrated tourism has evolved to include numerous meanings and definitions but all of which have a vertical approach.
The first of its kind, this book moves away from the vertical approach and provides insight into inclusive regional development strategies that support both the needs of urban and rural areas while enhancing the tourist experience, supporting the positive impacts of tourism and mitigating the negative. Regional studies tend to portray either an urban or rural focus without acknowledging that these spaces often constitute joint governance structures, similar historical and cultural roots, and economic dependencies. Sustainable tourism promotes sourcing locally, such as using rural agricultural products in urban tourism experiences. Furthermore, innovative marketing strategies linking tourism heritage, attractions, food and drink trails, and artisans with urban visitors are emerging.
240 pp, 6 1/4” x 9 3/5”

Mass Tourism in a Small World
Edited by David Harrison and Richard Sharpley
The economic links arising from tourism that now exist between what used to be regarded as “developed” and “developing” societies make it imperative that they are considered component parts of a global system rather than distinct entities. The central focus of this book is mass tourism across a range of societies. It focuses on the theoretical perspectives on mass tourism (including systems approaches, political economy, ethics, sustainability, and environmentalism), the historical context of mass tourism, and the current challenges to domestic, intra-regional, and international mass tourism. With the inclusion of international case studies, it is an essential resource for researchers and students within tourism studies.
256 pp, 6 1/2” x 9 1/2”
Cloth, Jul 2017, 978 1 78064 854 5, $140.00 (S6)

Tourism and Resilience
Edited by Richard Butler
Resilience relates to the ability of organisms, communities, ecosystems, and populations to absorb and withstand the impacts and effects of external forces while retaining their integrity and ability to continue functioning. The concept is particularly applicable to tourism destinations and attractions which are exposed to the potentially harmful and sometimes severe effects of tourism development and visitation. This book discusses the concept of resilience and its application to tourism. It compares the relevance of resilience to sustainability, the former focusing on the well-being and survival of the places affected and the latter focusing on the agent of impact, tourism itself.
232 pp, 6 1/2” x 9 1/2”
Cloth, Jul 2017, 978 1 78064 833 0, $140.00 (S6)

Advanced Concepts for Renewable Energy Supply of Data Centres
Edited by Jaume Salom, Thorsten Urbaneck, and Eduardo Oro
The rapid increase of cloud computing, high performance computing (HPC) and the vast growth in Internet and Social Media use have aroused the interest in energy consumption and the carbon footprint of Data Centers. Data Centers primarily contain electronic equipment used for data processing (servers), data storage (storage equipment), and communications (network equipment). Collectively, this equipment processes, stores, and transmits digital information and is known as information technology (IT) equipment.
Advanced Concepts for Renewable Energy Supply of Data Centres introduces a number of technical solutions for the supply of power and cooling energy into Data Centers with enhanced utilization of renewable energy sources in order to achieve low energy Data Centers. Because of the high energy density nature of these unique infrastructures, it is essential to implement energy efficiency measures and reduce consumption before introducing any renewable energy source. A holistic approach is used with the objective of integrating many technical solutions such as management of the IT load, efficient electrical supply to the IT
systems, Low-Ex air-conditioning systems, interaction with district heating and cooling networks, re-use of heat, free cooling (air, seawater, groundwater), optimal use of heat and cold storage, electrical storage and integration in smart grids.

**River Publishers Series in Renewable Energy**
238 pp, 6 1/8” x 9 1/5”
Cloth, Now Available, 978 87 93519 42 8, $89.00 (S6)

**Autonomous Decentralized Systems and their Applications in Transport and Infrastructure**

*Edited by Kinji Mori and Takashi Kunifugu*

Cyber-physical-social systems (CPSS) integrate computing, physical assets, and human networks. This book describes state-of-the-art CPSS in electric power systems, including detailed approaches on social constructs, which are a critical aspect of the end-user realm, and is divided into the three application areas of the electric grid. This book will be invaluable to academics and research-led professional engineers engaged in cyber-physical social system applications for power engineering.

250 pp, 6 1/8” x 9 1/5”
Cloth, Jul 2017, 978 87 93519 01 5, $160.00 (S6)

**Building the Future Internet through FIRE**
2016 FIRE Book - a Research and Experimentation based Approach

*Edited by Martin Serrano, Michael Boniface, John Domingue, Nikolaos Isaris, Thanasis Korakis, and Hans Schaffers*

The Internet as we know it today is the result of continuous activity for improving network communications, end user services, computational processes, and information technology infrastructures. The Internet has become a critical infrastructure for the human being by offering complex networking services and end-user applications that together have transformed all aspects, mainly economical, of our lives. Recently, with the advent of new paradigms and the progress in wireless technology, sensor networks, and information systems, and the inexorable shift towards the everything-connected paradigm

(continued overleaf)
first known as the Internet of Things and lately envisioning into the Internet of Everything, a data-driven society has been created. In a data-driven society, productivity, knowledge, and experience are dependent on increasingly open, dynamic, interdependent, and complex Internet services. The challenge for the Internet of the Future design is to build robust enabling technologies, implement and deploy adaptive systems, and to create business opportunities which consider increasing uncertainties and emergent systemic behaviors where humans and machines seamlessly cooperate.

**River Publishers Series in Information Science and Technology**

250 pp, 6 1/8” x 9 1/2”
Cloth, Now Available 978 87 93519 12 1, $100.00 (S6)

**Code of Practice for Electrical Energy Storage Systems**

The Institution of Engineering and Technology

The purpose of this Code of Practice is to provide a reference to practitioners on the safe, effective, and competent application of electrical energy storage systems.

It also provides an understanding of the common terms and operating modes of electrical energy storage systems. Building on the IET’s technical briefing: *Electrical Energy Storage: An Introduction* this will also provide detailed information on the specification, design, installation, commissioning, operation, and maintenance of an energy storage system.

The scope covers all types of electrical and electrochemical energy storage systems; integration into low voltage power systems; industrial, commercial and domestic applications; and systems aligned with existing standards, regulations, and guidance.

80 pp, 6 1/4” x 9 1/2”
Paper, Now Available, 978 1 78561 278 7, $100.00 (S6)

**Data Security in Cloud Computing**

Edited by Vimal Kumar

This edited book covers a wide range of issues on data security in cloud computing. Many organizations have already embraced the idea of a centralized cloud due to its benefits of economy, reliability and scalability. These benefits, however, are traded with the loss of control since data is stored, computed upon and accessed on the cloud, which gives rise to a number of challenging data security issues. This one-stop reference is organized into six sections, covering all major aspects of securing data in cloud computing and data security challenges in emerging technologies such as the Internet of Things (IoT) and Bring Your Own Device (BYOD) technologies.

650 pp, 6 1/8” x 9 1/2”
Cloth, September 2017, 978 1 78561 220 6, $175.00 (S6)

**Computer Systems for Healthcare and Medicine**

Edited by Piotr Bilski and Francesca Guerriero

The development of modern civilization leads us to solve new problems which did not exist before. The contemporary world faces a great challenge of aging societies, where increasing numbers of senior citizens require constant medical attention. Advanced technologies must be implemented to ensure the safety and well-being of elderly people, patients in hospitals, and disabled persons. These include both sophisticated data acquisition systems and data processing algorithms aimed at the constant and discreet monitoring of persons while raising alarm if immediate attention is required.

*Computer Systems for Healthcare and Medicine* presents a novel look at the introduced problems, including proposed solutions in the form of automated data acquisition and processing systems, which were tested in various environments. Characteristic features include a wide range of sensors used to monitor the situation of the person, and accurate decision making algorithms, often based on the computational intelligence domain.

**Introduction to Digital Wireless Communications**

Hong-Chuan Yang

This book provides an introduction to advanced wireless transmission technologies in current and future wireless
Microwave Gauging
Accurate Sensing, Measurement and Monitoring in the Industrial Environment
Nathan Ida
This book deals with the sensing of sheet products for a variety of properties including dimensions, moisture, electrical properties and curing state, among others, through the use of open microwave resonators. Starting with an introduction on the ideas and tools needed, the book proceeds through the whole design process, including simulation, experimentation, prototyping and finally testing a complete system. One of the goals of the book is to present a coherent and entirely practical approach to the design of open resonator microwave sensors.

Network as a Service for Next Generation Internet
Edited by Qiang Duan and Shangguang Wang
Flexible and effective service provisioning for supporting diverse applications is a key requirement for the next generation Internet. However, the current Internet lacks sufficient capability for meeting this requirement. Network-as-a-Service (Naas) offers a promising approach to separating network architecture and infrastructure to make this possible and has been widely adopted in Cloud computing. This book provides a comprehensive survey of Naas technologies, trends, applications, and future directions for network service provisioning.
400 pp, 6 1/8” x 9 1/5”

Iris and Periocular Biometrics
Edited by Christian Rathgeb and Christoph Busch
This book covers iris and periocular recognition, a prominent field in Biometrics Recognition and Identity Science in the areas of security, computing, and communications research and technologies. Selected topics cover a wide spectrum of current research, focusing on periocular recognition to augment the biometric performance of the iris in unconstrained environments, paving the way for multi-spectral biometric recognition on mobile devices. Divided into three parts, this text covers the most recent research and future directions as well as security related topics.

Network Based High Speed Product Development
SECOND EDITION
Edited by Peter Lindgren
Networks are vital because the competition is not business against business, but network against network. Networks are vital because an increasing part of product development is carried out in all types of networks containing physical, ICT, dynamic, and virtual networks. Speed and pressure on time in product development seems to continue to increase because customer demands for new products seem to continue to increase. However, a business seldom possesses all needed competencies, and managers see product development based on networks as an important solution to meet the strong competition of the future global markets and the strong demand for innovation and innovativeness. The evolution of market demands and focus (required) on competencies of businesses could be characterized as a development from a focus on efficiency, to a focus on quality and flexibility, to a focus on speed and innovativeness.
This is why it is interesting and important to research and discuss product (continued overleaf)
development and especially to understand high speed product development of individualized products in fragile market segments. Consequently, findings and learning on aspects like enablers, management tools, technological tools, product development models, product development processes and network tools to speed new product development are presented in this book.

**Power Transformer Condition Monitoring and Diagnosis**
Edited by Ahmed Abu-Siada

This must-read book on power transformer monitoring will incorporate current power transformer condition monitoring techniques from principles to practice. Each chapter will cover the fundamentals and theory of the topic, convey techniques to measure relevant parameters, and assess or interpret the results. The book will include factory acceptance tests, receiving end pre-commissioning tests, and commissioning tests. It will also include the limitations and challenges, and approaches to overcome these limitations.

300 pp, 6 1/8” x 9 1/5”
Cloth, October 2017, 978 1 78561 254 1, $160.00 (S6)

**RFID Protocol Design and Optimization for the Internet of Things**
Alex X. Liu

RFID systems are a very pervasive and low-cost technology used to automatically identify and track tags attached to objects, which contain electronically stored information. RFIDs are used in countless applications such as object tracking, 3D positioning, indoor localization, supply chain management, automotive, inventory control, anti-theft, anti-counterfeit, and access control. In this book, the author aims to demystify complicated RFID protocols and explains in depth the principles, techniques, and practices in designing and optimizing them.

500 pp, 6 1/8” x 9 1/5”
Cloth, October 2017, 978 1 78561 203 9, $185.00 (S6)

**Sliding Mode Control of Vehicle Dynamics**
Edited by Antonella Ferrara

This book is a comprehensive work on vehicle dynamics control through sliding mode control. This edited volume covers the control of longitudinal, lateral, and vertical dynamics of four-wheeled vehicles, both of conventional (i.e. combustion driven) type as well as fully-electric. In addition, one chapter is devoted to motorcycles and one to the roll-over control in heavy vehicles. The topic is important not only for general safety of vehicular traffic, but also for future automated driving. This book is a must-read for both researchers and industry engineers in this field.

350 pp, 6 1/8” x 9 1/5”
Cloth, Jul 2017, 978 1 78561 209 1, $175.00 (S6)

**Security, Privacy and Trust in the Internet of Things**
Hannan Xiao and Ying Zhang

The Internet of Things (IoT) describes physical objects and devices connected via the Internet. This covers a wide range of sensing and wireless technologies such as RFID tags, sensors, Smart phones, 3G/4G, Wi-Fi, Bluetooth, GPS, NFC, etc. that sense the environment and/or communicate with each other. Typical applications are for smart environments, healthcare, transportation, manufacturing, supply chain management, and surveillance. This new title covers the issues of Security, Privacy, and Trust within the context of IoT applications.

500 pp, 6 1/8” x 9 1/5”
Cloth, October 2017, 978 1 78561 203 9, $185.00 (S6)

**Soft Robots for Healthcare Applications**
Design, Modeling, and Control
Shane Xie

This book presents a systematic investigation of the design, modeling, and control of soft robots actuated by PMAs. It includes a thorough review of the research in the field, new insights into emerging technologies, and developments for use in soft robots for...
Trust Communications with Physical Layer Security for 5G and Beyond
Edited by Trung Q. Duong
This book provides readers with comprehensive insights into the theory, models, and techniques of Physical Layer Security and its applications in 5G and other emerging wireless networks. It covers recent advances in wireless communication and PHY security for 5G networks and beyond, including IoT, cognitive radio networks, massive MIMO, device-to-device communications, mm-wave communications, and energy harvesting communications. The potential of Physical Layer Security with a view to designing more secure communications in advanced networks of the future is also explored.
350 pp, 6 1/4” x 9 1/2”
Cloth, November 2017, 978 1 78561 235 0, $145.00 (S6)

User-Centric Privacy and Security in Biometrics
Edited by Claus Vielhauer
Biometrics is a growing field of influence and significance in the security, communications, networking, and computing fields. This book covers the major and critical system security challenges, developments, techniques, and applications for biometric systems (confidentiality, authenticity, integrity, privacy, reliability, convenience, and usability). It includes state-of-the-art contributions from international experts in the field which survey and evaluate how biometric techniques can enhance and increase the reliability of security strategies in a variety of applications.

ACADEMIC AND PROFESSIONAL TITLES
Antimicrobial Peptides
Discovery, Design and Novel Therapeutic Strategies
SECOND EDITION
Edited by Guangshun Wang
Antimicrobial peptides (AMPs) have attracted extensive research attention worldwide. Harnessing and creating AMPs synthetically has the potential to help overcome increasing antibiotic resistance in many pathogens. In addition to covering the current advances in AMP research, this volume also describes new methods and strategies for AMP prediction, design and applications that overcome obstacles in developing them into therapeutic agents.

Thoroughly updated and revised, the second edition contains new chapters covering: linear AMPs; disulfide-linked AMPs; the genetic basis of bacterial resistance and antibiofilm strategies; advances in AMP technologies that cover surface coating, biodetection, nanoparticles, formulation, and delivery; as well as understanding innate immunity and the basis for immune boosting.

Written by a group of established investigators, Antimicrobial Peptides is a valuable resource for postgraduate students, researchers, educators and medical and industrial personnel.

288 pp, 6 1/2" x 9 1/2"
Cloth, November 2017, 978 1 78639 039 4, $175.00 (S6)

Cultural Contexts of Health
The Use of Narrative Research in the Health Sector
WHO Regional Office for Europe
Storytelling is an essential tool for reporting and illuminating the cultural contexts of health: the practices and behavior that groups of people share and that are defined by customs, language and geography. This report reviews the literature on narrative research, offers some quality criteria for appraising it and gives three detailed case examples: diet and nutrition, well-being and mental health in refugees and asylum seekers.

Written by a group of established investigators, Cultural Contexts of Health is a valuable resource for postgraduate students, researchers, educators and medical and industrial personnel.

288 pp, 6 1/2" x 9 1/2"
Cloth, November 2017, 978 1 78639 039 4, $175.00 (S6)
Evaluation of Certain Food Additives

Eighty-second Report of the Joint FAO/WHO Expert Committee on Food Additives

World Health Organization

This report represents the conclusions of a Joint FAO/WHO Expert Committee convened to evaluate the safety of various food additives, including flavoring agents, with a view to concluding as to safety concerns and to preparing specifications for identity and purity.

The first part of the report contains a general discussion of the principles governing the toxicological evaluation of and assessment of dietary exposure to food additives, including flavoring agents. A summary follows of the Committee’s evaluations of technical, toxicological and dietary exposure data for 10 food additives (Allura Red AC; carob bean gum; lutein esters from Tagetes erecta; octenyl succinic acid (OSA)-modified gum arabic; pectin; Quinoline Yellow; rosemary extract; steviol glycosides; tartaric acid; and xanthan gum) and five groups of flavoring agents (alicyclic, alicyclic-fused and aromatic-fused ring lactones; aliphatic and aromatic amines and amides; aliphatic secondary alcohols, ketones and related esters; cinnamyl alcohol and related substances; and tetrahydrofuran and furanone derivatives).

Global Diffusion of eHealth - Making Universal Health Coverage Achievable

Report of the Third Global Survey on eHealth

World Health Organization

This WHO Global Observatory for eHealth’s third, global survey, of which 125 countries participated in, investigates how eHealth can support universal health coverage in Member States. The report considers eHealth foundations built through policy development, funding approaches, and capacity building in eHealth through the training of students and professionals. It then observes specific eHealth applications such as mHealth, telehealth, electronic health records systems, and eLearning and how these contribute to the goals of UHC.

154 pp, 8 1/4" x 11 3/4"

Paper, Now Available, 978 92 4 151178 0, $42.00 (S6)

Global Guidelines for the Prevention of Surgical Site Infection

World Health Organization

The aim of these guidelines is to provide a comprehensive range of evidence-based recommendations for interventions to be applied during the pre-, intra- and postoperative periods for the prevention of surgical site infection (SSI), while also considering aspects related to resource availability and values and preferences.

Although the guidelines are intended for surgical patients of all ages, some recommendations do not apply to the pediatric population due to lack of evidence or inapplicability and this is clearly stated.

184 pp, 8 1/4" x 9 3/4"

Paper, Now Available, 978 92 4 156539 4, $48.00 (S6)
Guidance for Managing Ethical Issues in Infectious Disease Outbreaks

World Health Organization

Infectious disease outbreaks are frequently characterized by scientific uncertainty, social and institutional disruption, and an overall climate of fear and distrust. Invariably, the countries most affected by outbreaks have limited resources, under-developed legal and regulatory structures, and health systems that lack the resilience to deal with crisis situations. Policy-makers and public health professionals may be forced to weigh and prioritize potentially competing ethical values in the face of severe time and resource constraints.

This document seeks to assist policy-makers, health care providers, researchers, and others prepare for outbreak situations by anticipating and preparing for the critical ethical issues likely to arise. In addition to setting forth ethical principles applicable to infectious disease outbreaks generally, it shows how these principles can be adapted to different epidemiological and social circumstances.

66 pp, 6 1/4" x 9 3/5"
Paper, Now Available, 978 92 4 154983 7, $30.00 (S6)

Handbook of Speckle Filtering and Tracking in Cardiovascular Ultrasound Imaging and Video

Edited by Christos P. Loizou

This is the first book to combine speckle imaging and video filtering and tracking, and their applications. It provides different levels of material to researchers interested in developing imaging and video systems with better quality by limiting the corruption of speckle noise in their systems. Supporting sample imaging and video datasets will also be made available on the web, as well as sample source codes of the algorithms presented in this book via a MATLAB® toolbox available to download from the editors’ website.

500 pp, 6 1/8" x 9 1/5"
Cloth, October 2017, 978 1 78561 290 9, $160.00 (S6)

Handbook on Developing National Action Plans to Prevent Child Maltreatment

World Health Organization

Reports estimate that at least 55 million children in Europe may experience maltreatment during childhood, but this publication’s message is that child maltreatment can be prevented by taking a multisectoral, multifactorial public health approach to prevention. This handbook lays out steps to develop an action plan to prevent child maltreatment. It is intended for use alongside other resources developed by the WHO Regional Office for Europe and aims to assist countries to implement the European child maltreatment prevention action plan 2015-2020.

60 pp, 6 1/8" x 9 3/5"
Paper, Now Available, 978 890 5222 1, $30.00 (S6)

Health Benefits of Green Tea

An Evidence-based Approach

Edited by Y. Hara, C. S. Yang, M. Isemura and I. Tomita

This book provides evidence to support the health-promoting components of green tea for human health. It explores the significance of green tea and its catechins represented by epigallocatechin gallate (EGCG), demonstrating their beneficial effects on diseases including cancer, obesity, arteriosclerosis, diabetes, hepatitis, and neurodegenerative diseases. The present status of human studies and avenues for future research are discussed. It is written by a team of experts from across the globe and makes significant Japanese findings available to international researchers. It is an essential resource for researchers interested in the biochemistry and pharmacology of green tea, and functional foods and beverages.

296 pp, 6 1/4" x 9 3/5"
Cloth, November 2017, 978 1 78639 239 8, $175.00 (S6)

Health System Efficiency
How to Make Measurement Matter for Policy and Management
Jonathan Cylus, Irene Papanicolas, Peter C. Smith and WHO Regional Office for Europe

The desire for greater efficiency motivates a great deal of decision-making, but the routine use of efficiency metrics to guide decisions is severely lacking. To improve efficiency in the health system we must first be able to measure it and must therefore ensure that our metrics are relevant and useful for policy-makers and managers.

In this book the authors explore the state of the art on efficiency measurement in health systems and international experts offer insights into the pitfalls and potential associated with various measurement techniques. The authors show that: 1) the core idea of efficiency is easy to understand in principle — maximizing valued outputs relative to inputs, but is often difficult to make operational in real-life situations; 2) there have been numerous advances in data collection and availability, as well as innovative methodological approaches that give valuable insights into how efficiently health care is delivered; 3) our simple analytical framework can facilitate the development and interpretation of efficiency indicators.

Health Policy Series
264 pp, 6 1/4” x 9 3/8”
Paper, Now Available 978 92 890 5041 8, $60.00 (S6)

Hospital Safety Index
Guide for Evaluators (with booklet of evaluation forms)
SECOND EDITION
World Health Organization

This guide provides a step-by-step explanation of how to use the Safe Hospitals Checklist, and how the evaluation can be used to obtain a rating of the structural and nonstructural safety, and the emergency and disaster management capacity, of the hospital. The results of the evaluation enable hospital’s own safety index to be calculated. The Hospital Safety Index tool may be applied to individual hospitals or to many hospitals in a public or private hospital network, or in an administrative or geographical area. In this respect, it provides a useful method of comparing the relative safety of hospitals across a country or region, showing which hospitals need investment of resources to improve the functioning of the health system.

The purpose of this Guide for Evaluators is to provide guidance to evaluators on applying the checklist, rating a hospital’s safety and calculating the hospital’s safety index. The evaluation will facilitate the determination of the hospital’s capacity to continue providing services following an adverse event, and will guide the actions necessary to increase the hospital’s safety and preparedness for response and recovery in case of emergencies and disasters.

Throughout this document, the terms “safe” or “safety” cover structural and nonstructural safety and the emergency and disaster management capacity of the hospital.

220 pp, 6 1/2” x 8 7/8”
Paper, Now Available 978 92 4 154898 4, $60.00 (S6)

Innov8 Approach for Reviewing National Health Programmes to Leave No One Behind
Technical Handbook
World Health Organization

As called for by the Sustainable Development Goals, Ministries of health and others involved in the delivery and design of health programs in all countries are grappling with the question of how to ensure that no one is left behind.

Many are working to reduce inequities in health service access and health status, including through reforms towards universal health coverage (UHC), enhanced intersectoral action, stronger social participation, gender-responsive and rights-based programming and health inequality monitoring.

This handbook supports these efforts and is a resource as part of the Innov8 approach to reviewing national health programs to leave no one behind. Innov8 entails an 8-step review process undertaken by a multidisciplinary national review team. It responds to the practical question of how to make concrete, meaningful and evidence-based programmatic action to tackle inequities and other shortfalls in the realization of human rights and gender
equality and to address the wider social determinants of health. The Innov8 Technical Handbook is a user-friendly resource that includes background readings, country examples and analytical activities to support a programmatic review process.

Spiral Bound, Now Available, 978 92 4 151139 1, $60.00 (S6)

International Ethical Guidelines for Health-related Research Involving Humans
Council for International Organizations of Medical Sciences (CIOMS)
In the new 2016 version of the ethical guidelines, CIOMS provides answers to a number of pressing issues in research ethics. The Council does so by stressing the need for research having scientific and social value, by providing special guidelines for health-related research in low-resource settings, by detailing the provisions for involving vulnerable groups in research and for describing under what conditions biological samples and health-related data can be used for research.
A CIOMS Publication
136 pp, 8 1/4" x 11 3/4"
Paper, Now Available, 978 92 3093 088 9, $30.00 (S6)

Interventions for the Control of Non-typhoidal Salmonella spp. in Beef and Pork
Meeting Report and Systematic Review
World Health Organization
The FAO/WHO systematic review covered interventions from primary production to the end of processing to control Salmonella in pork and beef. FAO and WHO also issued to all Member Countries a public “call for data” on control measures for Salmonella in pork and beef. Several replies were received in response to the call, a couple of which included previously unavailable information.

Microbiological Risk Assessment Series
292 pp, 8 1/4" x 11 3/4"
Paper, Now Available, 978 92 4 156524 0, $60.00 (S6)

mhGAP Intervention Guide for Mental, Neurological and Substance-use Disorders in Non-specialized Health Settings - Version 2.0
Mental health Gap Action Programme (mhGAP)
World Health Organization
The mhGAP Intervention Guide (mhGAP-IG) for Mental, Neurological and Substance-use Disorders for Non-specialist Health Settings is a technical tool developed by WHO to assist in implementation of mhGAP. The Intervention Guide has been developed through a systematic review of evidence followed by an international consultative and participatory process.

The mhGAP-IG presents integrated management of priority conditions using protocols for clinical decision-making. The priority conditions included are: depression, psychosis, bipolar disorders, epilepsy, developmental and behavioral disorders in children and adolescents, dementia, alcohol use disorders, drug use disorders, self-harm/suicide and other significant emotional or medically unexplained complaints.

The mhGAP-IG is a model guide and has been developed for use by health-care providers working in non-specialized health-care settings after adaptation for national and local needs.

Paper, Now Available, 978 92 4 154979 0, $48.00 (S6)

Nepal Earthquake 2015
An Insight into Risks - a Vision for Resilience
SEARO
On April 25, 2015, at 11:56 NST, with a mighty shudder, the earth released the pent-up seismic energy trapped within in the form of an earthquake that lasted 55 seconds. That brief span of time was enough to cause thousands of deaths, injure several thousand people, bring down buildings and shanties alike, split apart roads, damage health facilities and schools, cause avalanches and landslides, and demolish priceless heritage structures. A strong aftershock followed on
May 12th, killing an additional 200 people and injuring another 2,500. More landslides occurred in already unstable areas and fragile structures eventually collapsed. About 2.8 million people were displaced, and 4.2 million affected. Of these, many lived in remote, hard-to-reach areas, and were socioeconomically below the poverty line.

Despite these challenges, the earthquake response can be considered one of the best in recent years. Across the country, health workers fulfilled their duties admirably. As the injured flocked to hospitals at all levels, mass casualty management procedures were rolled out and referral networks activated.

Nepal came through well, as the country had prepared for such an eventuality. It had given primacy to preparedness and had strengthened many of the key health facilities so that they continued to function efficiently. Health staff and rapid response teams had also been trained, such that health care was provided to its people without pause. This book traces Nepal’s heroic response, looks into the constant risks Nepal lives with, and shares the insights it has gained through this catastrophe.

Implementation of REMPARK will increase the independence and quality of life of patients and improve their disease management, treatment, and rehabilitation.

Patient Safety Assessment Manual
SECOND EDITION
WHO Regional Office for the Eastern Mediterranean
The Patient Safety Assessment Manual is a component of the WHO Patient Safety Friendly Hospital Initiative. The manual integrates different standards that are directly related to the recommended WHO patient safety interventions and challenges. These standards cover five patient safety domains: leadership and management, patient and public involvement, safe evidence-based clinical practices, safe environment and lifelong learning. The manual is intended to provide health care professionals with practical guidance on how to identify patient safety gaps at the hospital level. These gaps can then be addressed through an improvement program supported by a patient safety culture at the institutional level.

Oxygen Therapy for Children
A Manual for Health Workers
World Health Organization
This manual is part of a series of resources for improving the quality of care for severely ill children in health facilities. It supports the improved use and availability of oxygen therapy in low resource settings, addressing the need for appropriate detection of hypoxaemia and use of pulse oximetry, oxygen delivery systems, and monitoring of patients on oxygen therapy. This practical bedside manual can be used in most areas of the world and adapted to country-specific circumstances.

Parkinson’s Disease Management through ICT
The REMPARK Approach
Edited by Joan Cabestany and Angels Bayes
Parkinson’s Disease Management through ICT: The REMPARK Approach presents the work done, main results, and conclusions of the REMPARK project (2011 – 2015) funded by the European Union. The REMPARK system was proposed and developed as a real Personal Health Device for the Remote and Autonomous Management of Parkinson’s Disease, composed of different levels of interaction with the patient, clinician, and carers, and integrating a set of interconnected sub-systems: sensor, auditory cueing, Smartphone, and server. The sensor subsystem, using embedded algorithms, is able to detect the motor symptoms associated with PD in real time. This information, sent through the Smartphone to the REMPARK server, is used for an efficient management of the disease.
Personal Protective Equipment for Use in a Filovirus Disease Outbreak
Rapid Advice Guideline
World Health Organization
Filoviruses (Ebola and Marburg) are highly contagious pathogens which cause severe and often fatal illness in humans. Health workers are at increased risk of infection with these viruses because of their close and prolonged contact with severely ill patients with a high viral load. The West African Ebola outbreak taught public health planners important lessons about how best to protect those providing clinical care. These lessons—of what works, what does not, what is most practical and effective—have been collated, assessed by experts in clinical care and infection control and form the basis for these recommendations. This is an important step forward in evidence-based protection and safety for health care delivery during outbreaks.

Public Health Aspects of Mental Health Among Migrants and Refugees
A review of the evidence on mental health care for refugees, asylum seekers and irregular migrants in the WHO European Region
WHO Regional Office for Europe
The increasing number of refugees, asylum seekers and irregular migrants poses a challenge for mental health services in Europe. This review found that these groups are exposed to risk factors for mental disorders before, during and after migration. The prevalence of psychotic, mood and substance-use disorders in these groups varies but overall resembles that in the host populations. Refugees and asylum seekers, however, have higher rates of post-traumatic stress disorder. Poor socioeconomic conditions are associated with increased rates of depression five years after resettlement.

Q Fever
Svetoslav P. Martinov
Information on the changing epidemiology and expanding nosological range of Q fever in humans has gained much attention in the past decade. Q fever is a zoonotic disease caused by the highly infectious pathogen Coxiella burnetii and has global distribution with important health, social and economic implications. Knowledge that C. burnetii is included in the arsenal of bacteriological weapons as an agent with potential bioterrorist threat must be borne in mind for the strategic importance of this microorganism.

This book summarizes and analyzes the scientific facts and developments about Q Fever researched worldwide to propose a system for monitoring, control, and prevention covering the main necessary actions, measures, and activities in the fight against this fever. There is an uneven level of knowledge of Q fever in animals and humans in various countries on the planet, while the assessment of the relevance of the problem is often ambiguous and unrealistic in terms of veterinary, medical, social, and economic aspects, which can result in an incomplete diagnosis, inaccurate information about the spread of disease, and lack of purposeful struggle.
Quality Assurance of Pharmaceuticals 2016
WHO Guidelines, Good Practices, Related Regulatory Guidance and GXP Training Materials
World Health Organization
Quality assurance of pharmaceutical products is a continuing concern of the World Health Organization (WHO). Despite efforts made around the world to ensure a supply of quality and effective medicines, substandard products still compromise health-care delivery in many countries.

To respond to the global need for adequate quality assurance of pharmaceuticals, WHO’s Expert Committee in Specifications for Pharmaceutical Preparations has, over the years, made numerous recommendations to establish standards and guidelines and to promote the effective functioning of national regulatory and control systems, and the implementation of internationally-agreed standards by trained personnel.

More than 80 relevant international guidelines, standards and good practices endorsed by the Committee are reproduced in this volume, providing guidance covering all aspects of quality assurance, including good manufacturing practices (GMP).

Selected Practice Recommendations for Contraceptive Use 2016
World Health Organization
This document is the third edition of WHO’s selected practice recommendations for contraceptive use. It provides guidance regarding “how” to use contraceptive methods safely and effectively. The goal of the document is to improve access to and quality of family planning services by providing policy-makers, decision-makers, and program managers with recommendations that can help develop or revise national guidelines on the provision of hormonal contraceptives, intrauterine devices, barrier methods, fertility awareness-based methods, male and female sterilization, and emergency contraception.

112 pp, 8 1/2” x 11 1/2”
Paper, Now Available 978 92 156540 0, $30.00 (S6)

Selection and Application of Methods for the Detection and Enumeration of Human-pathogenic Halophilic Vibrio spp. in Seafood Guidance
World Health Organization
One of the challenges in the development of global risk assessments for halophilic Vibrio spp. is the availability of appropriate datasets from around the world which could be considered to be representative of the range of conditions under which halophilic Vibrio spp. grow and become a problem for seafood safety. Even when data are available, the different methodologies used to generate that data often make it difficult to compare and consolidate globally representative datasets. In order to begin addressing this the Codex Committee on Food Hygiene recommended that the range of test methods available for quantifying V. para-haemolyticus (total and pathogenic) and V. vulnificus in seawater and bivalves be looked at with a view to providing guidance that would facilitate performance evaluation of the methods.

This document has been developed in response to that request and is intended to provide sufficient information on methods (but not details of the methods) to inform the selection of the most appropriate methods according to the potential end use of the data generated, for example, harvest area monitoring, post-harvest process verification, end product monitoring, and outbreak investigation.

Microbiological Risk Assessment Series
88 pp, 8 1/2” x 11 1/2”
Paper, Now Available, 978 92 4 156528 8, $30.00 (S6)
Survey of the Quality of Medicines Identified by the United Nations Commission on Life Saving Commodities for Women and Children

World Health Organization

This publication presents the results of a survey of the quality of 13 essential but overlooked life-saving commodities identified by the UN Commission on Life-Saving Commodities for Women and Children. The survey had two objectives: to determine products of good quality already available in selected 49 of the world’s poorest countries identified under the “Every Woman Every Child” (EWEC) movement, and to evaluate the quality of target medicines collected at the first level of the distribution chain. The survey provided a snapshot picture of the quality of the sampled products and generated information about the availability of the target medicines in selected countries.

142 pp, 8 1/2” x 11 3/4”

Paper, Now Available, 978 92 4 151111 7, $42.00 (S6)

Technical Specifications for Oxygen Concentrators

World Health Organization

The purpose of this guidance document is for the appropriate selection, procurement, utilization and maintenance of oxygen concentrators. This document also focuses on recommendations for the appropriate use and maintenance of oxygen concentrators in an effort to increase the availability, management and quality of oxygen concentrators and, ultimately, to improve health outcomes in LRS. This document is intended to serve as a resource for the planning and provision of local and national oxygen concentrator systems for use by administrators, clinicians and technicians who are interested in improving access to oxygen therapy and reducing global mortality associated with hypoxaemia.

64 pp, 8 1/2” x 11 3/4”

Paper, Now Available, 978 92 4 150988 6, $30.00 (S6)

Vector Surveillance and Control at Ports, Airports, and Ground Crossings

World Health Organization

This handbook aims to provide guidance to Member States on the practical aspects of maintaining sanitary standards at international borders of ports, airports, and ground crossings as laid out in the International Health Regulations (2005). It provides technical advice for developing a comprehensive program for systematic monitoring of disease vectors and integrated vector control at points of entry. In addition, it serves as reference for port health officers, regulators, operators, and other competent authorities in charge of implementing the IHR (2005) at points of entry and on conveyances.

Also available in Spanish and Russian, contact Stylus.

89 pp, 8 1/2” x 11 3/4”

Paper, Now Available, 978 92 4 154959 2, $30.00 (S6)

What is the evidence on the reduction of inequalities in accessibility and quality of maternal health care delivery for migrants?

WHO Regional Office for Europe

The number of female migrants of childbearing age is rapidly increasing, which entails specific needs for maternal health
services. Through a systematic review of the academic literature and a critical interpretive synthesis of policy frameworks, the authors of this review assess interventions and policies that improve the accessibility and quality of maternal health care for migrants in the WHO European Region.

The review demonstrated that most migrant women have poorer maternal health outcomes than other women throughout the WHO European Region. Identified risk factors are linked not only to pregnancy, childbirth and the postpartum period but also to events before conception. Restricted entitlement and problems with familiarity, knowledgeability, acceptability, availability and affordability jeopardize migrant women’s access to maternal health care. Ensuring universal access to care and providing culturally sensitive care will enhance access to and the quality of maternal health care and eventually improve migrant maternal health.

**WHO Classification of Head and Neck Tumours**

**FOURTH EDITION**

**Edited by Adel K. El-Naggar, John K. C. Chan, Jennifer R. Grandis, Takashi Takata, and Pieter J Slootweg**

The WHO Classification of Head and Neck Tumours is the ninth volume in the 4th Edition of the WHO series on histological and genetic typing of human tumors. This authoritative, concise reference book provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies evaluating response to therapy and clinical outcome.

Diagnostic criteria, pathological features, and associated genetic alterations are described in a disease-oriented manner. Sections on all recognized neoplasms and their variants include new ICD-O codes, epidemiology, clinical features, macroscopy, pathology, genetics, and prognosis and predictive factors.

The book, prepared by 135 authors from 35 countries, contains more than 600 color images and tables, and more than 2700 references.

**WHO Recommendations on Antenatal Care for a Positive Pregnancy Experience**

**World Health Organization**

“To achieve the Every Woman Every Child vision and the Global Strategy for Women’s Children’s and Adolescents’ Health, we need innovative, evidence-based approaches to antenatal care. I welcome these guidelines, which aim to put women at the centre of care, enhancing their experience of pregnancy and ensuring that babies have the best possible start in life.” — Ban Ki-moon, former UN Secretary-General

Within the continuum of reproductive health care, antenatal care provides a platform for important health-care functions, including health promotion, screening and diagnosis, and disease prevention. It has been established that, by implementing timely and appropriate evidence-based practices, antenatal care can save lives.

Endorsed by the United Nations Secretary-General, this is a comprehensive WHO guideline on routine antenatal care for pregnant women and adolescent girls. It aims to complement existing WHO guidelines on the management of specific pregnancy-related complications. The guidance captures the complex nature of the antenatal care issues surrounding healthcare practices and delivery, and prioritizes person-centered health and well-being — not only the prevention of death and morbidity — in accordance with a human rights-based approach.
