

CABI new books

2023

CABI is not like other publishers

CABI is an international not-for-profit organisation that improves people's lives worldwide by providing information and applying scientific expertise to solve problems in agriculture and the environment. CABI is also a global publisher producing key scientific publications, including world renowned databases, as well as compendia, books, eBooks and full text electronic resources.

The profits from CABI's publishing activities enable us to work with farming communities around the world, supporting them as they battle with poor soil, invasive species and pests and diseases, to improve their livelihoods and help provide food for an ever growing population.

CABI is an international intergovernmental organisation and we gratefully acknowledge the core financial support from our member countries (and lead agencies) including the United Kingdom (Department for International Development), China (Chinese Ministry of Agriculture), Australia (Australian Centre for International Agricultural Research), Canada (Agriculture and Agri-Food Canada), The Netherlands (Directorate-General for International Cooperation) and Switzerland (Swiss Agency for Development and Cooperation).

Welcome to the CABI Books Catalogue 2022

This catalogue contains our recent and forthcoming monographs, textbooks and practitioner titles across our full range of publishing areas.

Contents

02 agricultural science	14 veterinary science and medicine
04 forestry, ecology and the environment	18 animal sciences
07 plant and crop science	20 tourism, hospitality and leisure
09 horticulture	24 title index
12 human health, food and nutrition	26 author index
	29 how to order

Textbooks

Indicates the publication is a textbook and available for inspection by lecturers wishing to evaluate it for course use. Please visit cabidigitallibrary.org/books/textbooks to find out more.

A number of textbooks are now enhanced by open resources, to improve the learning experience for students and researchers. Including lecture slides, maps, images and other material, these resources provide additional information to supplement CABI's publishing products: www.cabi.org/bookshop/openresources

Open Access

Indicates that the publication is Open Access.

CABI believes that a crucial way to solve problems in agriculture and the environment is by creating, managing, curating and disseminating information. Discover and download CABI's open access books here: cabidigitallibrary.org/open-access

New in paperback

Indicates that this title is now available in paperback for the first time.

eBooks

Most CABI titles are available in eBook format, and these are indicated throughout this catalogue. eBooks are available for individual purchase on CABI Digital Library, as well as major eBook retailers and institutional suppliers. Find out more at cabidigitallibrary.org/books/ebook-collections

Chapters

CABI books can now be purchased at the chapter level on CABI Digital Library: cabidigitallibrary.org/books

Please note: all details were correct at the time this catalogue went to press, but may be subject to change without notice. Please refer to cabidigitallibrary.org/books for up-to-date title information.

US publication may be up to **2 months after** UK publication.

Managing Risk in Agriculture

A Development Perspective

Edited by **Ashok K. Mishra**, Arizona State University, USA, **Subal C. Kumbhakar**, **Gudbrand Lien**, Lillehammer University College, Norway

The book addresses and documents farmers' risks in developing and emerging economies. It draws lessons from experimental economics on measuring risk preferences, attitudes, gender differences in managing risks, and risk management strategies in countries across Africa and Asia

Sep 2023 | HB | 9781800622265 | 304pp
£95 | €110 | \$130

Gender and the political economy of fisheries and aquaculture

Meryl Williams, **Victoria Syddall**

Fisheries and aquaculture have flourished, yet in the fish value chain, gender equality is declining. The book examines how growth in scale and intensity of the fish sector, changes in market orientation and gender-blind governance measures may create a human disaster by examining three commodity cases in the value chain: shrimp, tuna and seaweed.

Sep 2023 | HB | 9781789247145 | 200pp
£75 | €115 | \$135

Biological Control Programmes in Canada, 2013-2022

Edited by **Meghan A. Vankosky**, Saskatoon Research and Development Centre, Canada, **Véronique Martel**, Laurentian Forestry Centre, Canada

Reports on the status of biological control research and on biological recommendations for biological control for target pests under agricultural, forest or urban control programmes employed in Canada.

Aug 2023 | HB | 9781800623255 | 550pp
£165 | €190 | \$220

Algal Biotechnology

Edited by **Qiang Wang**

This book features recent developments from cyanobacteria to eukaryotic algae, from theoretical biology to applied biology. It also includes the latest advancements in algal-based synthetic biology, including metabolic engineering, artificial biological system construction and green chemicals production

Aug 2023 | HB | 9781800621930 | 400pp
£115 | €135 | \$155

Nanoformulations for Sustainable Agriculture and Environmental Risk Mitigation

Edited by **Zeba Khan**, Aligarh Muslim University, India, **Nicoleta Anca Sutan**, University of Pitesti, Romania

Nanotechnology research and its application in agriculture has become a major focus in recent years. This book is essential reading for graduate students, researchers and practitioners involved in the application of nanotechnology in agriculture.

Jun 2023 | HB | 9781800623071 | 208pp
£95 | €110 | \$130

Sustainable Agricultural Intensification

A Handbook for Practitioners in West Africa

Edited by **Fred Kizito**, International Institute of Tropical Agriculture, Ghana, **Mateete Bekunda**, International Institute of Tropical Agriculture, Tanzania, **Jonathan Odhong**, International Institute of Tropical Agriculture, Ibadan, Nigeria,

Irmgard Hoeschle-Zeledon, International Institute of Tropical Agriculture, Ibadan, Nigeria, **Willemien Brooijmans**, International Institute of Tropical Agriculture (IITA), Ibadan, Nigeria

This book shows how sustainable intensification is possible in smallholder livelihood farming systems and can be achieved through the delivery, application, and adoption of evidence-based recommended technologies and knowledge.

Jun 2023 | HB | 9781800621992 | 208pp
£95 | €110 | \$130

Farmer Innovations and Best Practices by Shifting Cultivators in Asia-Pacific

Edited by **Malcolm Cairns**, Independent scholar and researcher, Thailand

This book, the third of a series, shows how shifting cultivators from the Himalayan foothills to the Pacific Islands have devised ways to improve their farming systems. It considers the importance of swidden agriculture to food security and livelihoods, and its environmental significance across multiple cultures, crops and forest systems.

Apr 2023 | HB | 9781800620094 | 1100pp
£49.99 | €60 | \$70

Speculation by Commodity Index Funds

The Impact on Food and Energy Prices

Scott H. Irwin, University of Illinois at Urbana-Champaign, USA, **Dwight R. Sanders**, Southern Illinois University Carbondale, USA

This book documents a curated selection of papers on the impact of index investment on commodity futures prices. The 10 papers follow the evolving speculation debate with new author forewords highlighting the contribution and impact. Essential reading for scholars and researchers interested in futures markets, commodity prices, and speculation.

Apr 2023 | HB | 9781800622081 | 304pp
£95 | €110 | \$130

Gender-responsive Researchers Equipped for Agricultural Transformation

Trainer's Manual for the Gender-Responsive Plant Breeding Course

Margaret Najjingo Mangheni, Makerere University, Uganda, **Hale Ann Tufan**, Cornell University, USA

This manual presents the content and step-by-step training process for the Gender-Responsive Plant Breeding course implemented by Makerere and Cornell Universities over a period of 5 years (2016-2020) under the Gender-responsive Researchers Equipped for Agricultural Transformation (GREAT) project funded by the Bill & Melinda Gates Foundation.

Oct 2022 | ePub | 9781800620513 | 172pp

Oct 2022 | ePDF | 9781800620520 | 172pp

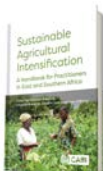

Next-generation Sequencing and Agriculture

Edited by **Philipp Bayer**, University of Western Australia, Australia, **David Edwards**, University of Western Australia, Australia

This book summarises the impacts that the genome sequencing revolution has had in all areas across animal and plant agriculture, including cattle, orphan crops, cash crops, and more, with reference to applications in many species and locations. It explains new techniques and their use in understanding epigenetics, breeding and conservation.

Jul 2022 | HB | 9781789247824 | 216pp

£85 | €100 | \$115

Sustainable Agricultural Intensification

A Handbook for Practitioners in East and Southern Africa

Edited by **Mateete Bekunda**, International Institute of Tropical Agriculture, Tanzania, **Jonathan Odhong**, International Institute of

Tropical Agriculture, Nigeria, **Irmgard Hoeschle-Zeledon**, International Institute of Tropical Agriculture, Nigeria

This book aims to demonstrate how sustainable intensification (SI) of smallholder livelihood farming systems can be achieved through the delivery, application, and adoption of evidence-based recommended technologies and knowledge.

Apr 2022 | HB | 9781800621602 | 184pp

£70 | €85 | \$100

Science Communication Skills for Journalists

A Resource Book for Universities in Africa

Edited by **Charles Wendo**, SciDev.Net, Uganda

This book covers science communication skills and provides hands-on guidance together with examples, learning activities, graded and ungraded quizzes to facilitate learning. There are five academic review papers reflecting on key science journalism and communication issues in Africa.

Oct 2022 | PB | 9781800621428 | 192pp

£45 | €55 | \$65

Youth and the Rural Economy in Africa

Hard Work and Hazard

Edited by **James Sumberg**, Institute of Development Studies, UK

There are many accepted views about the role and position of youth in the African agricultural economy. This book challenges those assumptions by analysing new studies, particularly of gender and social difference. It is a major contribution to current debates and development policy about youth, agriculture and employment in rural Africa.

May 2022 | PB | 9781789249828 | 200pp

£40 | €45 | \$55

Apr 2021 | HB | 9781789245011 | 200pp

£95 | €115 | \$130

Conservation Agriculture in Africa

Climate Smart Agricultural Development

Edited by **Saidi Mkomwa**, African Conservation Tillage (ACT), Nairobi, **Amir Kassam**, University of Reading, UK

Conservation Agriculture (the use of no tillage systems) to preserve soil structure and integrity has become an increasingly important step towards sustainable farming. This book brings together conservation agriculture and climate smart decision making processes for the first time, focusing on Africa.

Jan 2022 | HB | 9781789245745 | 536pp

£175 | €210 | \$245

Climate Change and Global Health

2nd Edition

Edited by **Colin Butler**, University of Canberra, Australia, **Kerryn Higgs**, University of Tasmania, Australia

This new edition provides a substantially updated, authoritative, critical and yet accessible perspective on public health aspects of climate change, including chapters on "cross-cutting" issues (e.g. mental health) and the impacts on several regions, including China, Africa and South Asia.

Nov 2023 | HB | 9781800620001 | 360pp
£115 | €135 | \$155

Conservation of Dragonflies

Sentinels of Freshwater Conservation

Michael J. Samways, Stellenbosch University, South Africa

This is the first, comprehensive, single-authored, modern text on the conservation of this iconic group of insects. Dragonflies are sensitive to the health of freshwater systems, and the quality of vegetation along rivers and around ponds. Dragonflies are excellent indicators in these times of great concern over the quality of our freshwater supplies.

Oct 2023 | HB | 9781789248371 | 376pp
£95 | €115 | \$130

Entomovectoring

Using Insects to Deliver Beneficial Organisms, Substances and Devices

Edited by **Heikki M.T. Hokkanen**, University of Eastern Finland, **Ingeborg Menzler-Hokkanen**, University of Eastern Finland

Entomovectoring is a set of techniques for using insects as vectors of beneficial organisms or substances which they can transmit directly into field crops or horticultural plants in greenhouses. Entomovectoring has great potential to help develop sustainable, pesticide-free production systems.

Sep 2023 | HB | 9781800621770 | 304pp
£95 | €110 | \$130

The Concept of Ecostacking

Techniques and Applications

Edited by **Jinjun Wang**, **Ingeborg Menzler-Hokkanen**, University of Eastern Finland, **Hongbo Jiang**, **Huai Liu**, all at Southwest University, China

Ecostacking is a new concept and approach aiming to ensure that multiple levels of mechanisms and interactions from genes to ecosystem attributes are combined in a synergistic manner to provide best possible level of ecosystem services in agricultural systems. The focus is on ensuring services for biological control and for pollination, but other services such as nutrient cycling, and maintenance of soil health are included.

Sep 2023 | HB | 9781789248692 | 320pp
£95 | €115 | \$135

Soil Ecology

Sina M Adl, University of Saskatchewan, Canada

Soil Ecology is a new textbook which approaches this complex subject using a unique organism-based approach. It is suitable for undergraduate or graduate

level courses in soil microbiology, soil ecology, ecological agriculture, forest management, soil remediation and environmental management, and as a comprehensive resource for professional soil scientists and ecologists.

Sep 2023 | PB | 9781800621336 | 456pp
£55 | €65 | \$75

Sep 2023 | HB | 9781800621329 | 456pp
£120 | €140 | \$160

Urban Pest Management

An Environmental Perspective
2nd Edition

Edited by **Partho Dhang**, Independent Consultant, Philippines

Bringing together ideas from academia and business, this book covers modern methods of urban pest control, their impacts on human health and the environment, and strategies for integrated management that limits the use of chemicals. It is aimed at researchers and policymakers in pest management, medical entomology and environmental science.

Sep 2023 | HB | 9781800622920 | 304pp
£95 | €110 | \$130

Crop Pollination by Bees, Volume 2

Individual Crops and their Bees

2nd Edition

Keith S. Delaplane, University of Georgia, USA

Volume 2 of a practical guide to bees and how they pollinate essential crops. Provides simple, succinct advice on how to increase bee abundance and pollination. Very useful for farmers, horticulturalists, gardeners, and those interested in insect ecology and conservation, including students of entomology and crop protection.

Sep 2023 | PB | 9781786393524 | 128pp
£45 | €60 | \$75

Biology and Management of the Formosan Subterranean Termite and Related Species

Edited by **Nan-Yao Su**, University of Florida, USA, **Chow-Yang Lee**, University of California, Riverside

The Formosan subterranean termite, *Coptotermes formosanus*, is the most destructive and invasive termite species globally. It is listed in the world's 100 most harmful invasive species in the Global Invasive Species Database. This book is a comprehensive overview of the biology and control of this economically important pest.

Aug 2023 | HB | 9781800621572 | 304pp
£95 | €110 | \$130

Parasitoid Wasps of South East Asia

Buntika A. Butcher, Chulalongkorn University, Thailand, **Donald Quicke**, Chulalongkorn University, Thailand

Parasitoid wasps are important both ecologically and economically, with interesting life histories. Understanding them leads to a better understanding of evolution and biodiversity generally. This is the only book which describes parasitoids of SE Asia.

Jul 2023 | HB | 9781800620599 | 352pp
£125 | €144 | \$169

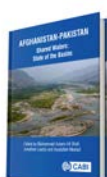

Courtship and Mate-Finding in Insects

A Comparative Approach

Raymond J. C. Cannon, formerly of the Food and Environment Research Agency, UK

This beautifully illustrated book describes the incredible variety of courtship behaviours and natural history of a wide range of insects. It will be of interest to students of biology, professional entomologists and amateur naturalists with a desire to know more about the behaviour of the small creatures with which we share the planet.

Mar 2023 | HB | 9781789248609 | 704pp
£175 | €210 | \$236

Afghanistan-Pakistan Shared Waters

State of the Basins

Edited by **Muhammad Azeem Ali Shah**, IWMI, Pakistan, **Jonathan Lautze**, IWMI, South Africa, **Asadullah Meelad**

An overview of the three most important Afghanistan-Pakistan River Basins, in collaboration with water professionals and government agencies. Key aspects include water resources, land resources, ecological health, environment, climate change, and the social and economic conditions for sustainable management of these precious resources.

Mar 2023 | HB | 9781800622357 | 176pp
£115 | €135 | \$155

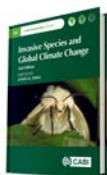

Psocids as Global Pests of Stored Products

Edited by **Christos G. Athanassiou**, University of Thessaly, Greece, **Manoj K. Nayak**, Department of Agriculture and Fisheries, Queensland, Australia

Psocids are a group of insect pests of stored products. They are widespread and damaging. This book summarises current knowledge of Psocid biology and management and points the way to future psocid research. The book is essential reading for all those involved in stored product and post-harvest pest management and research.

Jan 2023 | HB | 9781789245523 | 136pp
£95 | €115 | \$130

Invasive Species and Global Climate Change

2nd Edition

Edited by **Lewis Ziska**, USDA-ARS, USA

This book explores the nexus of climate change and biological invasions, resulting impacts and ways to reduce vulnerability and increase the resiliency and sustainability of managed and unmanaged ecosystems (1) the background and science; (2) case studies; (3) Management: detection and prevention; and (4) management: control and adaptation.

Dec 2022 | HB | 9781800621435 | 352pp
£110 | €125 | \$150

Tourism, Recreation and Biological Invasions

Edited by **Agustina Barros**, CONICET, Argentina, **Ross T. Shackleton**, University of Lausanne, Switzerland, **Lisa Rew**, Montana State University, USA, **Jose Cristóbal Pizarro Pinochet**, University of Concepción, Chile, **Aníbal Pauchard**, Universidad de Concepción, Chile

This book provides a detailed review on the role of tourism and recreation in promoting biological invasions, and how invasions may affect these activities. It reviews management options and solutions to minimize the impacts from invasive non-native species in relation to tourism. It covers diverse regions and varied invasive organisms.

Dec 2022 | HB | 9781800620452 | 208pp
£95 | €110 | \$130

Climate Change, Adaptation and Gender

Policy, Practice and Methodological Underpinnings

Mamta Mehar, Independent Consultant, New Delhi, India, **Narayan Prasad**, Indira Gandhi National Open University, India

This book offers a wide, in-depth study of the gender-climate change-agriculture nexus. Despite more than 40 years of research exploring this nexus, there is still ambiguity around the foundations, connections, and approaches for planning gender-inclusive climate policies. This volume aims to clear that ambiguity.

Nov 2022 | HB | 9781789249897 | 208pp
£95 | €110 | \$125

Transgenic Insects

Techniques and Applications

2nd Edition

Edited by **Mark Q. Benedict**, Centers for Disease Control and Prevention, USA, **Maxwell J. Scott**, North Carolina State University, USA

This book describes the huge opportunity to modify insect phenotypes through genetic engineering to benefit human health and agriculture. Precise DNA modifications and gene drive approaches are much more focused with improved safety. The development of modelling, ethical considerations, public response and regulatory oversight is covered.

Nov 2022 | HB | 9781800621152 | 624pp
£150 | €175 | \$205

Key Questions in Environmental Toxicology

A Study and Revision Guide

J.P.F. D'Mello, formerly Scottish Agricultural College, UK

Questions review the origin, characterization and environmental distribution of major pollutants, followed by their absorption and metabolic disposition in living organisms, and their implications for human morbidity, ecological impact and biodiversity. A selection of questions types and full answer rationales keep learning varied and engaging.

Aug 2022 | PB | 9781789248524 | 304pp
£25 | €28.99 | \$33.50

Butterflies of Cyprus

A Field Guide and Distribution Atlas

Eddie John, Cyprus Butterfly Study Group, UK, **Christodoulos Makris**, Cyprus Butterfly Study Group, Cyprus

This book is the first, comprehensive, authoritative field guide and distribution atlas for the butterflies of Cyprus, assembled by authors with a combined experience spanning over 50 years of study of the island's butterflies.

Jul 2022 | HB | 9781800621251 | 424pp
£95 | €110 | \$130

Encyclopedia of Scale Insect Pests

Edited by **Takumasa Kondo**, Agrosavia, Colombia, **Gillian W. Watson**, Natural History Museum, UK

Scale insects are major pests worldwide. They are one of the most invasive plant pest groups and cause billions of dollars damage to a wide variety of crops each year. *The Encyclopedia of Scale Insect Pests* is the most comprehensive, fully illustrated work on scale insect pests worldwide.

Jun 2022 | HB | 9781800620643 | 640pp
£275 | €315 | \$370

Key Questions in Urban Pest Management

A Study and Revision Guide

Partho Dhang, Independent Consultant, Philippines, **Philip Koehler**, University of Florida, USA, **Roberto Pereira**, University of Florida, USA, **Daniel D. Dye II**, Brooker, Florida, USA

This book is intended as a study and revision guide for students following programmes of study in which urban pest management is an important component. It contains over 500 multiple-choice questions (and answers) set at three levels – foundation, intermediate and advanced.

May 2022 | PB | 9781800620155 | 216pp
£19.99 | €23.99 | \$27.99

The Fruit Fly Fauna (Diptera : Tephritidae : Dacinae) of Papua New Guinea, Indonesian Papua, Associated Islands and Bougainville

Richard A. I. Drew, Griffith University, Australia, **Meredith C. Romig**, Griffith University, Australia

A taxonomic treatise of the tropical fruit flies of Papua New Guinea, Indonesian Papua, associated islands and Bougainville, with an updated record of all known species of Dacinae that occur in this geographic area including descriptions of 66 new species out of an entire list of 296 known species covered.

Jan 2022 | HB | 9781789249514 | 136pp
£85 | €100 | \$115

Pest Management in Cotton

A Global Perspective

Edited by **Graham A. Matthews**, Emeritus Professor, Imperial College London, UK, **Thomas A. Miller**, University of California Riverside, USA

This book describes the background and present state of pest management in cotton crops throughout the world. Cotton is one of the most economically important crops globally, and new, emerging pests driven by climate change, for example, are proving increasingly problematic. The book highlights new techniques in cotton crop protection.

Jan 2022 | HB | 9781800620216 | 312pp
£95 | €110 | \$130

Invasion Biology

Hypotheses and Evidence

Edited by **Jonathan M. Jeschke**, Leibniz-Institute of Freshwater Ecology and Inland Fisheries, Germany, **Tina Heger**, Technical University of Munich, Germany

There are many hypotheses describing the interactions involved in biological invasions, but it is largely unknown whether they are backed up by empirical evidence. This book fills that gap by assessing research hypotheses and applying it to a number of invasion hypotheses, using the hierarchy-of-hypotheses (HoH) approach.

Jan 2022 | PB | 9781800621619 | 192pp
£45 | €50 | \$60

History and Future of Plants, Planet and People

Towards a New Ecologically Sustainable Age in People's Relationships With Plants

Alan Hamilton, Kunming Institute of Botany, China, **Pei Shengji**, Kunming Institute of Botany, China

This book describes how plant conservation projects benefit from working with local communities and stakeholders and the use of ethnobotanical knowledge. It has been written by two very experienced conservation scientists with very different backgrounds; Alan Hamilton from the West and Pei Shengji from China.

Dec 2023 | HB | 9781789248920 | 280pp
£75 | €90 | \$105

Genetics of Salt Tolerance in Plants A Central Dogma Perspective and Strategies for Enhancement

Edited by **Showkat Ahmad Ganie**, **Shabir Hussain Wani**, Sher-e-Kashmir University of Agricultural Sciences and Technology of Kashmir, India

This book presents the current state of knowledge on plant salt tolerance acquired through meticulous analysis of the processes operating across the Central Dogma with particular focus on the modulation of gene expression, and its implications for improving salt tolerance.

Aug 2023 | HB | 9781800623019 | 208pp
£125 | €145 | \$170

Entomopathogenic Nematodes as Biological Control Agents

Edited by **David I. Shapiro-Ilan**, USDA-ARS, Georgia, USA, **Edwin Lewis**, University of Idaho, USA

Provides a thorough review of entomopathogenic nematodes as biocontrol agents, including their biology, ecology, and application in various cropping systems and other arenas. It also covers commercialization, including mass production, formulation and marketing; and ecological considerations.

Jul 2023 | HB | 9781800620308 | 600pp
£175 | €200 | \$235

Parasitic Plants in African Agriculture

Lytton John Musselman, Old Dominion University, USA, **Jonne Rodenburg**, University of Greenwich, UK

Parasitic Plants in African Agriculture is the first book to describe the ecology, biology, damage caused, and control of all groups of African parasitic plants including introduced invasive species. The book is for researchers, extension workers, development officers, plant pathologists, food security specialists, weed scientists, botanists and plant ecologists.

Jun 2023 | HB | 9781789247633 | 224pp
£85 | €90 | \$105

Ganoderma Diseases of Tropical Crops

Carmel A Pilotti, Pacific Community, Noumea, NewCaledonia, Fiji, **Paul Dennis Bridge**, formerly CABI, UK

Diseases caused by *Ganoderma* species cause major losses of palms and other perennial crops throughout the world, and are particularly significant in Asia. This book covers all aspects of economically significant *Ganoderma* stem rots including taxonomy, biology, genetics, aetiology, epidemiology and control.

Nov 2023 | HB | 9781800620766 | 344pp
£105 | €120 | \$140

Application of Biofumigation in Crop Management Systems Sustainability, Opportunities, Challenges and New Goals

Edited by **Matthew A. Back**, Harper Adams University, UK

Provides an overview of the principles of biofumigation, different methods of application, methods used to assess glucosinolate and isothiocyanate production and factors affecting performance. Includes experiences of biofumigation practices across a range of continents and highlights additional benefits surrounding the biofumigation process.

Jul 2023 | HB | 9781789245622 | 200pp
£95 | €115 | \$135

Wattles – Australian Acacia species around the world

Edited by **David M. Richardson**, Centre for Invasion Biology, South Africa, **Johannes J. Le Roux**, Macquarie University, Australia, **Elizabete Marchante**, University of Coimbra, Portugal

The book provides a comprehensive overview of knowledge about "wattles", the large clade of more than 1000 recognised species of trees and shrubs previously grouped in *Acacia* subgenus *Phyllodineae* (Fabaceae), most of which are native to Australia, including their biology, invasiveness and practical uses.

Jul 2023 | HB | 9781800622173 | 400pp
£135 | €155 | \$175

Fungal Plant Pathogens Applied Techniques 2nd Edition

Edited by **Charles R. Lane**, The Food and Environment Research Agency (Fera), UK, **Paul Beales**, Animal & Plant Health Agency (APHA), UK, **Kelvin J.D. Hughes**, Animal & Plant Health Agency (APHA), UK

Since publication of the first edition in 2012, there is increased awareness of plant health and biosecurity. This practical manual deals with recognition of disease symptoms, detection and identification of fungi and methods to characterise them, as well as curation, quarantine, quality assurance, and new chapters on tree health and outreach.

May 2023 | PB | 9781800620551 | 340pp
£55 | €65 | \$75

Managing Microorganisms

David Smith, CABI, UK, Matthew J. Ryan, CABI, UK, Alan Buddie, CABI, UK

An essential reference for anyone involved in microorganism culture collections, it covers the management, characterisation, storage and handling of bacteria and fungi.

Feb 2023 | HB | 9781800622111 | 424pp
£125 | €145 | \$170

Plant Omics

Advances in Big Data Biology

Edited by Hajime Ohyanagi, National Center for Global Health and Medicine, Japan, Kentaro Yano, Meiji University, Japan, Eiji Yamamoto, Meiji University, Japan, Ai Kitazumi, Texas Tech University, USA

Plant omics combines a range of cutting-edge molecular techniques that are transforming plant science. This book explains the latest developments at each level and how they can help tackle global food security issues.

Dec 2022 | HB | 9781789247510 | 270pp
£95 | €110 | \$130

Microbial Biocontrol Agents Developing Effective Biopesticides

Edited by Gerardo Puopolo, University of Trento, Italy

This book analyses microbial biocontrol agents for the development of novel biopesticides, considering the main plant-beneficial traits, procedures needed for effective formulations and the processes used for their validation.

Nov 2022 | HB | 9781789249187 | 208pp
£95 | €110 | \$130

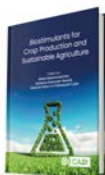

Handbook of Phytonutrients in Indigenous Fruits and Vegetables

Edited by Dharini Sivakumar, Tshwane University of Technology, South Africa, Michael Netzel, The University of Queensland, Australia, Yasmina Sultanbawa, The University of Queensland, Australia

Collation of research on phytonutrient constituents of traditional fruits and vegetables, including information on the impact of postharvest processing and cooking practices, plus the impact of biological activities of Indigenous fruits and vegetables on human health. Key resource to fight 'hidden hunger' and achieve diet diversification.

Oct 2022 | HB | 9781789248043 | 448pp

£120 | €140 | \$160

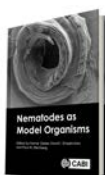

Fungicides in Practice

Richard P. Oliver, Nottingham University, UK, Janna L. Beckerman, Purdue University, USA

An up-to-date guide to the science and practice of disease control based on fungicides in horticulture and broad acre agriculture.

Jul 2022 | HB | 9781789246902 | 248pp
£95 | €110 | \$130

Nematodes as Model Organisms

Edited by Itamar Glazer, ARO, Volcani Center, Israel, David I. Shapiro-Ilan, USDA-ARS, USA, Paul W. Sternberg, Caltech, USA

Nematodes, especially *Caenorhabditis elegans* have been used as a model for research in molecular biology since the 1960s. This is a much-needed update on research on fundamental processes in areas such as genetics, developmental biology, nutrition, toxicology, ecology, pharmacology and medicine.

May 2022 | HB | 9781789248791 | 384pp
£95 | €110 | \$130

The Coconut

Botany, Production and Uses

Edited by **Stephen W. Adkins**, The University of Queensland, Australia, **Julianne Biddle**, ACIAR, Australia, **Amirhossein Bazrafshan**, The University of Queensland, Australia, **Sundar Kalaipandian**

Comprehensive book covering all aspects of coconut from origins to cultivation, ecology and physiology, pest and disease management, harvest and post harvesting management, breeding and biotechnology as well as the current and future status of the coconut as one of the most important palm species.

Dec 2023 | HB | 9781789249712 | 240pp

Apples

Botany, Production and Uses 2nd Edition

Edited by **Terence Robinson**, Cornell University, USA, **Richard P. Marini**, The Pennsylvania State University, USA, **Ian J. Warrington**, Emeritus Professor, Massey University, New Zealand

A comprehensive reference work, summarising our knowledge of apples and their production worldwide. A new edition of the successful 2003 book.

Oct 2023 | HB | 9781800620940 | 648pp
£150 | €170 | \$200

The Olive

Botany and Production

Edited by **Andrea Fabbri**, Parma University, Italy, **Luciana Baldoni**, CNR – Istituto di Bioscienze e Biorisorse, Italy, **Tiziano Caruso**, Palermo University, Italy, **Franco Famiani**, Perugia University, Italy

This book is an updated treatise on olive biology and cultivation, which covers recent advances in international research.

Aug 2023 | HB | 9781789247336 | 600pp
£155 | €185 | \$215

Edible Alliums

Botany, Production and Uses

Edited by **Haim D. Rabinowitch**, Hebrew University of Jerusalem, Israel, **Brian Thomas**, University of Warwick, UK

Allium crops include many economically important species, such as onions, shallots, garlic, leeks, and chives. They grow in a range of ecological conditions and are harvested worldwide. This book provides a comprehensive review of edible Alliums from a scientific and horticultural perspective.

Dec 2022 | HB | 9781789249972 | 328pp

The Persimmon

Botany, Production and Uses

Edited by **Ali Sarkhosh**, University of Florida, USA, **Alimohammad Yavari**, Pomologist & Consultant, Iran, **Robert Nissen**, Department of Agriculture and Fisheries, Australia

A comprehensive survey of persimmon growing from a scientific and horticultural perspective, covering its history and distribution, botany, production and growing regions, biodiversity and breeding methods, propagation, physiological disorders, pests and diseases, postharvest, processing, health, and industrial uses. Once considered as only an exotic fruit, consumer demand for persimmon is growing as it becomes more familiar in our supermarkets.

Oct 2023 | HB | 9781789249064 | 536pp
£160 | €185 | \$215

Kiwifruit

Botany, Production and Uses

Edited by **Annette Richardson**, **Jeremy Burdon**, **Ross Ferguson**, all at the Institute of Plant and Food Research Ltd. (PFR), New Zealand

A comprehensive and authoritative reference text on kiwifruit; their history, plant material, culture, vine physiology, pest and disease control, and fruit utilisation. Particular attention is given to recent threats and opportunities, e.g. climate change, the disease *Pseudomonas syringae* pv. *actinidiae*, new genetics, new growing areas and technology advances.

The Fig

Botany, Production and Uses

Edited by **Ali Sarkhosh**, University of Florida, USA, **Alimohammad Yavari**, Pomologist & Consultant, Iran, **Louise Ferguson**, University of California, Davis, USA

This book provides a comprehensive review of fig growing from a scientific and horticultural perspective, covering botany, production, processing, health, and industrial uses.

May 2022 | HB | 9781789242881 | 512pp
£135 | €155 | \$210

Vegetable Seeds

Production and Technology

Gregory E. Welbaum, Virginia Tech University, USA

Farmers all over the world share one concern: how to get the best seed and planting material for next season's crops. This book covers it, and is a replacement for CABI's Vegetable Seed Production by R.A.T. George, now out of print.

Aug 2023 | HB | 9781789243246 | 350pp
£95 | €125 | \$160

Gac Fruit

Advances in Cultivation, Utilization, Health Benefits and Processing Technologies

Edited by **Minh Nguyen**, Newcastle University, Australia, **Tuyen Chan Kha**, Nong Lam University, Viet Nam

Provides information relating to Gac fruit from cultivation to novel processing technologies, addressing several propagation and cultivation techniques to increase production and quality, including traditionally used parts of the fruit (aril) and those whose value has not yet been maximized (peel, pulp and seed).

Aug 2022 | HB | 9781789247299 | 208pp
£125 | €145 | \$170

Advances in Fig Research and Sustainable Production

Edited by **Moshe A. Flaishman**, The Volcani Center, Agriculture Research Organization, Israel, **Uygun Aksoy**, formerly Ege University, Turkey

This book provides a comprehensive review of fig research, both basics and applications. It addresses the recent scientific results in genetics, genomics, metabolomics, pharmaceutical properties, understanding of symbiosis, new management, post-harvest technology and diseases and pest management of figs.

May 2022 | HB | 9781789242478 | 568pp
£135 | €155 | \$210

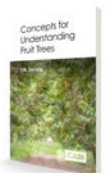

Plants for Soil Regeneration

An Illustrated Guide

Sally Pinhey, Institute of Analytical Plant Illustration, UK, **Margaret Tebbs**, Institute of Analytical Plant Illustration, UK

This book gives farmers, growers and gardeners information and a visual guide to the plants which can be used to improve soil quality without the use of agrichemicals.

Mar 2022 | HB | 9781789243604 | 192pp
£55 | €63 | \$75

Concepts for Understanding Fruit Trees

Theodore M. DeJong, University of California, Davis, USA

This book provides a clear set of integrative concepts for understanding how fruit trees work. The emphasis is on overarching principles rather than detailed descriptions of tree physiology or differences among the numerous species of fruit trees.

Chrysanthemum

Edited by **M. SharathKumar**, Wageningen University and Research, The Netherlands, **Ep Heuvelink**, Wageningen University and Research, The Netherlands

This book serves as a practical reference for researchers and growers with comprehensive and accessible information on all aspects of production, physiology, genetics -breeding and biotechnology of the chrysanthemum crop.

Jul 2023 | PB | 9781789248265 | 256pp
£49.95 | €60 | \$70

Date Palm

Edited by **Jameel M. Al-Khayri**, King Faisal University, Saudi Arabia, **Shri Mohan Jain**, University of Helsinki, Finland, **Dennis V. Johnson**, **Robert R. Krueger**, USDA-ARS, University of California, Riverside, USA

A new comprehensive standard reference work on modern practices in date palm cultivation for researchers in horticulture and producers.

Apr 2023 | PB | 9781800620186 | 568pp
£75 | €80 | \$95

Peach

Edited by **George Athanasios Manganaris**, Cyprus University of Technology, Cyprus, **Guglielmo Costa**, University of Bologna, Italy, **Carlos H. Crisosto**, University of California, Davis, USA

New book providing comprehensive, fundamental and up-to-date information on the production processes for fresh market and canning peach, including orchard establishment, production, postharvest handling and uses. Highly illustrated in full colour. Essential reading for students and professionals in pomology, including growers, consultants and extension specialists.

Mar 2023 | PB | 9781789248432 | 320pp
£49.99 | €60 | \$70

Food Ethics and the Food Industry

Putting Theory into Practice

Ralph Early, formerly Professor of Food Industry at Harper Adams University, UK

The book aims to provide a practical approach to the topic of food ethics. It will describe what food ethics is and how to apply food ethics thinking and evaluation to real-world food systems issues and problems.

Oct 2023 | HB | 9781789246476 | 304pp
£85 | €100 | \$120

Practical Control of Mosquitoes as Disease Vectors

Edited by **J. Derek Charlwood**, Liverpool School of Tropical Medicine, UK and Instituto de Higiene e Medicina Tropical, Portugal, **Carla A. Sousa**, IHMT, University of New Lisbon, Portugal

Disease vector control is rapidly changing, and this book provides a practical review of conventional control methods, and new and underused techniques. Also considering issues such as resistance, mosquito behaviour change, cost and climate change, it concludes with the politics and practicalities of method choice and implementation.

Sep 2023 | PB | 9781789248821 | 144pp

Tourism, heritage and commodification of non-human animals

A post-humanist reflection

Edited by **Álvaro López-López**, senior researcher at the Institute of Geography, UNAM, **Gino Jafet Quintero Venegas**, Instituto de Investigaciones Sociales, UNAM, **Carol Kline**, Appalachian State University, USA

Non-human animals are present in various heritage and tourist environments: they may be the heritage focus of interest or it may be that they are agents involved in heritage tourist setting working. From a posthumanist perspective the involvement of non-human animals as heritage elements implies their commodification and zooslavery.

CAB eBooks

CAB eBooks offers anytime, anywhere unlimited access to CABI's renowned book list via our web-based platform. That means complete applied life science coverage with no limits or restrictions to concurrent users, downloads, printing, sharing or interlibrary loan.

CAB eBooks Front File (2020–present)

The **CAB eBooks Front File** is a dynamic subscription product that grows as newly published books are added. There are over 150 books in this collection published from 2020 onwards, with 40-50 new titles added each year.

Fixed collections

All of CABI's fixed, multi-disciplinary eBook collections are available for one-off purchase with perpetual ownership.

CAB eBooks 2017–2019: 135 titles

CAB eBooks 2014–2016: 119 titles

CAB eBooks 2007–2013: 341 titles

CAB eBooks 2000–2006: 353 titles

CABI Choice Collections

CABI Choice Collections are precision tools for selecting exactly the right content for your library. With flexible pick and mix options, you can choose from over 900 titles and you own your collection with outright purchase.

Choice Annual Collections

Yearly collections are available from 2017 in concise packages of CABI's most recent content.

Choice Reference

CABI reference eBooks are available to buy for site-wide access. Easy-to-search PDFs bring encyclopedias, dictionaries and taxonomic keys straight to readers' fingertips.

Your Choice

Choose any titles from the entire Choice Collections list: no minimum or maximum number, select exactly the eBooks you want.

Subject Collections

Seven subject collections available on a subscription-based model. These collections are continually growing as new titles are published.

- Agriculture: 247 titles
- Environmental Sciences: 258 titles
- Forestry: 71 titles
- Human, Food and Nutrition Sciences: 101 titles
- Plant Sciences: 347 titles
- Tourism, Leisure and Hospitality: 191 titles
- Veterinary and Animal Sciences: 203 titles

More information
